REPORTS OF GOVERNMENT CHEMISTS As to Printy and Wholesomeness of the Royal Baking Powder.

"I have tested a package of Royal Baking Powder, which I purchased in the open market, and find it composed of pure and wholesome ir gredlents. It is a cream of tartar powder of a high degree of merit, and does not contain either alum or phosphates, or other injurious substances.

E. G. Love, Ph.D."

"It is a scientific fact that the Royal Baking Powder is absolutely pure.
"H. A. Mott, Ph.D.")

"I have examined a package of Royal Baking Powder, purchased by myself in the market. I find it entirely free from alum, terra alba, or any other injurious sub-stance. HENEY MORTON, Ph.D., President of Stevens Institute of Technology."

"I have analyzed a package of Royal Baking Powder. The materials of which it is composed are pure and wholesome. S. Dava Haves, State Assayer, Mass."

The Royal Baking Powder received the highest award over all competitors at the Vienna World's Exposition, 1873; at the Centennial, Philadelphia, 1876; at the American Institute, New York, and at State Fairs throughout the country.

No other article of human food has ever received such high, emphatic, and universal endorsement from eminent chemists, physicians, scientists, and Boar's of Health all over the world. Health all over the world.

Note-The above Diagram illustrates the comparative worth of Various Baking Powders, as shown by Chemical Analysis and experiments made by Prof. Schedler. A pound can of each powder was taken, the total leavening power or volume in each can calculated, the result being as indicated. This practical test for worth by Prof. Schedler only proves what every observant consumer of the Royal Baking Powder knows by practical experience, that, while it costs a few cents per pound more than ordinary kinds, it is far more economical, and, besides, affords the advantage of hetter work. A single trial of the Royal Baking Powder will convince any fair minded person of these facts.

* While the diagram shows some of the alum powders to be of a higher degree of strength than other powders ranked below them, it is not to be taken as indicating that they have any value. All alum powders, no matter how high their strength, are to be avoided as dangerous.

Twenty years ago there was neither priest, monk nor nun in Wyoming Territory. There may have been a few Catholics, for Catholics can be found everywhere; but there was no Catholic church, no Catholic school, no Sisters' hospital. Now Wyoming has a Catholic bishop, ten priests, two religious orders of men-Jesuits and Franciscans, and two religious congregations of women—Sisters of the Holy Child Jesus and Sisters of Charity. The Catholic population of the Territory cannot be less than ten thousand.

The Jesuit Fathers have relinquished charge of St. Michael's parish, Iron Works, South Troy, N. Y., and presented the church, which they built 14 years ago, at a cost of \$60,000, with the schools, etc., to the Rt. Rev. Bishop McNeirney. The Bishop has gratefully accepted the splendid gift and placed the Rev. James Flood, late of Fonls, N.Y., in charge of St. Michael's. It is the spirit of the Jesuit order that all itsmembers should live in community. and moreover it was not desirable that another house of the order should be so close to St. Joseph's, hence the reason of the transfer.

Make it a rule to kill every white butterfly seen in the cabbage patch, as they are the parents of the cabbage worm.

A New England farmer concludes that a farmer can keep a sheep with every cow without any additional expense. An exchange recommends sheep for feed-

ing orchards rather than swine. They leave no safe cover for insects to breed and will keep the orchard healthy and trees manured. The way to build up the sheep industry is to weed out the flocks, go for greater capacity for mutton, and increase in the individual, worth a cent a pound.

Much that is often allowed to go to waste upon the farm could profitably be gathered up and made into good fertilizer and applied to the land to aid and increase the yield of the crops. Give, as far as possible, the kind growth and yield.

A New York dairyman says he can get

bushels per diem to the cows, than from ensilage. The milk yield ran up to twenty quarts. He asserts that he can produce beets at a cost of four cents a bushel, one thousand

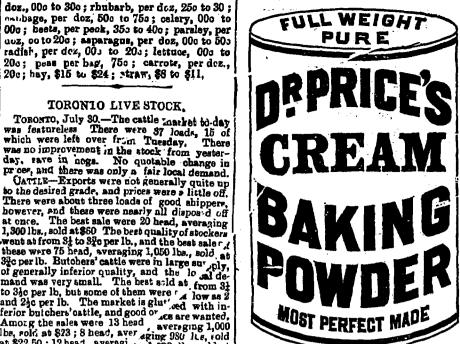

off a bud here and there will save labor in the future. If deferred, the saw and pruning knife must be resorted to. The first year of the life of a tree is the period when it should Farmers, are you dissatisfied with your

work? Is it because it is of a low grade, or that you are not successful in the field? Do not say yes and convict yourselves of being low grade laborers. Farming is hard work, but then it is a beautiful work. It tires, but it brings a good appetite and sound slumber, a clear consolence, and a place that ought to

be a second Paradise.

Bestle—Do not hesitate to Paris green the potato plants. Every bestle destroyed reduces the number next year. The war of exfew beetles appear no thought is given the caught across the face by a swinging limb and small damage that may be done, but the damage will be tenfold greater the following rapidly proved fatal.

KIDNEY DISEASES.

BRIGHT'S DISEASE, DIABETES, and kindred maladies have been very largely treated and cures effected in thousands of cases which had been pronunced beyond hope. These dis-cases are readily diagnosticated, or determined, eases are readily diagnosticated, or determined, by chemical analysis, without a personal examination of patients, who can, therefore, generally be successfully treated at their homes. The study and practice of chemical analysis and microscopical examina ton in our consideration of cares, with reference to correct diagnosis, in which our institution long ago became famous, has neutrally led to very extensive practice in has naturally led to very extensive practice in diseases of the urinary organs. Probably no other institution in the world has been so largely patronized by aufferers from this class of maladies. Our Specialists bave acquired, through a vast and varied experience, great expertn: ss in determining the tract nature of each case, and hence have been successful in nicely adapting their remedies for the cure of each in-

year. The aim should be to destroy them, no matter how few the number. A New York farmer writes to Farm and Home: "We had a valuable cow choked with a potato. A neighbor ordered fine-cut

tobacco put down her throat, and we inserted a piece about two-thirds the size of a hen's egg. The cow was bloated hard, but the remedy was successful and the bloat all disappeared in fifteen minutes, the cow going to work as naturally as though nothing had oc-curred. We had tried a variety of means by which to remove it, but without avail."

KICKING COWS.

A writer says he once had a very valuable heifer which was an exceedingly vicious kicker. To cure her of the habit, he put a common garden hoe end in front of her off hindleg, and behind and above gambrel joint of the nigh hindleg. Then sitting down on the right to milk, he put the handle of the hoe well up under his arm and began milking. The heifer could not stir other hindand put a small flock on every farm where leg, and after one week the could be milked they will pay their way, even if wool isn't safely without fettering, and proved to be a valuable and gentle animal.

CARING HORSES.

The steady advance in methods of treating horses and caring for their health is note-worthy. A fast trotter or runner receives all the care and attention which men can give. to each crop best adapted to secure the best He is tended like an infant. His food is ingrowth and yield. horse doctor is called in. If he becomes too more milk from the cows fed on beets, two healthy he is trained down. There are horse dentists who file and fill the teeth as fir a human belog. The latest wrinkle, hower, is a Turkish bath for horses, in which my are put through the same sweating and oc. The time to train young trees, wheather for is run in connection with a stable in N w shade or fruit, is the first season, as pinching York, and its patronage has become lar, e ing processes as human beings. Such a hand profitable.
