

### 3. Additional Information

Import and export statistics on beer (in thousands of hectolitres):

|                           | <u>1986</u> | <u>1987</u> | <u>1988</u> |
|---------------------------|-------------|-------------|-------------|
| Import                    | 112         | 114         | 142         |
| Export                    | 146         | 185         | 222         |
| Per Capita<br>Consumption | 4.3         | 4.4         | 5.47        |

The trend shows a 30% increase in per capita beer consumption.

Beer production capacity: Increasing due to higher consumption of local beer by Singaporeans as well as higher demand of local beer by other Asian countries.

Domestic malting capacity: Nil

Market potential for Canadian malt: There is a market potential provided that Canadian price is competitive.

### III. OILSEEDS

#### 1. Trade Policy

Import tariffs: None

Non-tariff import barriers/export assistance measures: None for oilseeds, wheat or feedgrains.

Import/export structure: Oilseeds are imported/exported by private firms.

#### 2. Additional Factors

The majority of imported oilseeds are re-exported to neighbouring countries.
