

Rheumatism, whether in the acute or chronic stage, is a constitutional disease, and requires such a remedy as MILBURN'S RHEUMATIC PILLS, which go right through the system, neutralize and destroy the rheumatic poisons, and clear them out by way of the bladder and bowels.

The effect of the pills is soon evident, the pain becomes less acute, the swelling subsides, the joints become more limber, to get up and sit down is easier, sleep is obtained, and work that could not be attempted can now be performed with ease.

If you've suffered for years and tried all sorts of remedies, and obtained but little relief, these statements may seem to you incredible. All we ask you to do is read the testimonials published, and you will be convinced that MILBURN'S RHEUMATIC PILLS can and will do all that is claimed for them.

SCIATICA.

The Sciatic Nerve is about the size of the little finger, and is the largest nerve trunk in the body. It and its branches are distributed along the back part of the leg right down to the foot; hence, when there is anything wrong with the nerve the pain is felt from the hip to the toes.

Having a clear idea of this nerve, we can readily understand how the suffering is so intense when it is diseased.

The old method of treating Sciatica by searing the leg with a red hot iron was cruel and barbarous, and worse than the disease itself, yet ineffectual in producing a cure.
