## HORICON JUNCTION.

rat Dunleith, Ill At the southern end of Horicon Lake this station is situated, on the C. ural district note. & S. P. R. R., fifty-four miles from Milwaukee. Near the Junction a large trade of tlarge dam was erected many years ago, and the back-water resulting from his obstruction flooded the country for miles around. Deprived of their old highway to other waters, the fish in Horicon lake increased in number mtil the water was literally alive with them. The neighboring farmers nin at Milwauke weeks in visities to back their wagons into the current, when the boxes would at once portsman, angle come filled with fish; a little energy on the part of the drivers enabled e which would a hem to get on land with a load of their finny prey, and the victims were f Schlesingervillt once devoted to the fertilisation of the land. Later, when the dam was at 115 miles from emoved, the subsidence of the water left a vast extent of marsh, which hicago, Milwaukery soon became the breeding ground of myriads of wild fowl. The old Topularity of the place as a fishing ground gave place to equal favor with he lovers of field sport. Here the sportsman may find all the varieties of n favorite rese the memory of ear he wild duck, besides brant, goese, and swan. Large parties visit this llent shooting a cality every season for the hunting and fishing, and every facility is found of water and on the spot for the full enjoyment of a visit. Comfortable accommodations tate, is only thr nd good boats are to be obtained without difficulty.

BEAVER DAM.

bass fishing, a The Beaver dam, a manufacturing town, and popular summer resort, is lon the South. the sanitary comated on Beaver Dam River, an outlet of Beaver lake. The lake is eight facturing is carrilles in length, by a about two wide, its trend being northwest and southaid to be adequalast. The town possesses a valuable water power, which supplies the nany manufacturing establishments along the river. There are six flourbeing the senting mills, a large agricultural implement factory, two extensive woolen habitants, on the soil of the nukee 68, and freighboring country is rich and fertile, and a prosperous grain growing and
