Trading in the gold mining issues predominated on the mining exchanges

again to-day, interest in the Porcupine stocks continuing the leading feature

in governing the action of the market.

The list had not entirely recovered

from the profit-taking movement which

obtained yesterday, and the market

was still under pressure from this class of transactions, the not to the same extent as was in evidence during the

The Gold Boom in Porcupine Gold Stocks has just commenced. Now is the time to buy these stocks before the advance, which is sure to come. I offer a few shares of the above stock at 10 cents. This will shortly be selling at 15 cents, and will sell very much higher. A vein 350 feet has been opened up nearly 3 ft. wide, which pans gold at the grass roots. When a few shots have been fired the results look good for the finding of spectacular values. Our clients who went through the Cobalt boom are commencing to buy Porcupine stocks at the low prices. Stock buyers will do well to buy quickly.

We recommend the purchase of PEARL LAKE GOLD MINES, LIMITED, adjoining the HOLLINGER. This stock is now selling at 50 cents a share, and the mines have valuable showings. UNITED PORCUPINE is now selling at 15 cents a share. These claims are exceedingly well located, and are the best purchases on the market to-day.
