estment Bankers Bank Building, Toronto

Many Business Men Endorse It-Cedarvale Avenue Conserva-

tives Meet To-Night.

NORTH TORONTO, Feb. 20 .- (Special.) -Sentiment around town generally is favorable toward the extension of the boundaries of the town east and west as indicated in the notice of motion introduced by Councillors Ball and Baker on Saturday last. It is felt that their regular monthly meeting at the North Toronto must now build for the Masonic Temple, Annette-street, tofuture, and in the matter of railway night. control on the two leading thorofares paralleling Yonge-street, Bayview. avenue and Bathurst-street indications are that very shortly these highways will diphtheria, was held this afternoon confe in for action along this line. That the land is already much of it broken. up into biulding districts is looked upon as a strong reason why the move-ment should be prosecuted with vigor.

Discussing the question to-day, W.
G. Lits said: The matter is a big one and will ladnif of a good deal of argu-ment pro and con, out I am free to acoust that the resolution of Council-lers Ball and Baker has a good deal to lors Ball and Baker has a good deal to confimend it, especially on the west. I as not know that I would interfere with the eastern boundaries to any extent at the present time beyond squaring up the line, but the proposal to extend to Bathurst-street, while a big one and probably too drast'c, might will be considered."

well be considered."
Touching on the failure to get along with the Mount Pleasant Cemetery road, Mr. Eills said: "It is a question which is to prevail, the Burlal Trust or the people. I think the North Toronto council would be well advised to take the advice of Assessment Commissioner Clarke of York Township to apped to the greeness of the agree. missioner clarke of York Township to embody the grievance in the agreement and get before the legislature just as quickly as they know now."

While there might be some opposition from the owners of property in the township area the York Township long age adopted the principle that where any portion of the municipality takes the ground that their interests where any portion of the municipality takes the ground that their interests are better served by joining with another no interference will be tolerated. "This idea of squaring the town up is a good one and commends itself strongly to me." said T. W. Banton, president of the Ratepayers' Association to-night, "but there is this point to be considered: We are now applying for legislation to enable us to assess lands in the town at other than farm properties and if we secure this right—or are likely to secure ti—I will heartily support the extension of our borders to Bathurst-stret and Bayview-avenue as suggested." Mr. Banton further stated that he had called a meeting of the Ratepayers' Association for Saturday night to discuss this very project.

roadway, he said: "Get our position placed before the legislature as quickly

Natural Cure for Catarrh Obviates Taking Drugs

It Has Superseded the Old-Fashioned Stomach-Dosing Remedies, and Invariably Oures Quickly.

Mrs. Wm. E. Risebrough has left to join her husband, who is located 100 miles north of Edmonton.

The racing carnival held in the Caledonian rink here to-night was a great success, big crowds and good prizes. ARE UNDULY ALARMED. Men Who Know Say Opposition is

Uncalled for.

At the farm stock sales now being held at many points thruout the county and province at large good prices are being paid for horses and cattle. Good draught mares and geldings and general purpose teams, as well are in good demand, while maich cows and springers bring nearly as good prices as at any time last year. The scarcity of hay, straw and coarse grains generally does not seem to have had much effect, while the stock offered has been for the most part in good condition. When you can get \$250 to \$300 for a 3-year-old draught filly or gelding, times are surely prosperous. Good cows run up as high as \$65 and \$70, and this, too, is a pretty good indication of widespread a pretty good indication of widespread and general presperity.

In money, in delay, in worry, in inconvenience? OWER is the heart of your factory—it must supply

the life-blood - energy - to every department, must make every machine sensitive to the operator's touch.

What Does Your Power Cost You?

Heart-failure is the one disease for which science knows no relief and cannot cure.

9 Power-failure is the one industrial ailment which cannot be prevented by the same methods that keep your other departments 100 per cent. efficient. With a private plant you must always face the danger of a breakdown, with its penalty of worry, expense, and demoralizing delay. But there is a permanent cure for power-troublesa positive insurance against their effects-CENTRAL STATION POWER. رابندا والداند العالمان

The plant you attempt to run yourself will always have serious limitations. The manufacture of power is a highlyspecialized business. It has been developed by specialists. Efforts have been made to reduce it to an "anybodycan-run-it" basis. They have been only partially successful. An automobile engine, for instance, is as nearly automatic as any power plant invented. But even it frequently demands expert attention. Your industrial power plant, so much bigger, so much more expensive — upon which so much more depends—is far more in need of expert handling. If you hired men competent to give it that expert attention, your pay roll would soar beyond reason. So you must needs employ "Semi-experts"—an admitted makeshift. And you know that "makeshifts" are a handicap to any business.

9 "Central-station" service is always in the hands of experts. Specialists have directed every step in the construction of the plant, Specialists are directing the operation of that plant. They are paid specialists' salaries to see that not a horsepower of energy is wasted, and that the power flows as steadily and as constantly as water over the brow of Niagara.

I You can get the benefit of their watchfulness.

I Let our experts assume your power responsibilities. I And, at the same time, pay less for power!

I Central Station Electric Power is "the power that pays."
