THE BLOOR VIADUCT ROADWAY.

It will need over five hundred loads It will need over five hundred loads of crushed stone to make the roadway for wheeled traffic along the Bloor street diaduct between Sherbourne and Parliament streets. The grading has been finished for the stone, but the engineer's department say tho they have the stone in sight they have not much hope of getting it down and rolled this season. This will be discouraging news for the public who have to go by the narrow, crooked and dangerous Howard street. But if the city commissioner made up his mind to take advantage of the good weather and exerted his staff, it can still be done. Will he do this?
