STANDARDIZE CAR STEPS RAILWAY BOARD DEGIDES

First Lift of Open Double Trucks to Be From 14 to 16

Judgment was delivered yesterday by the Ontario Railway and Municipal Board on the application of Dr. Helen MacMurchy for an order fixthe height of the first step on street and electric cars, on railways under the board's jurisdiction, at from 9 to 12 inches from the ground, and the other steps with a rise of from 7 to 9 inches.

The judgment, which is a compromise between what is desired by the applicant and the conditions which obtain, recites the various stages in the investigation. The Toronto Railways ompany equipped a special car for demonstration purposes, and another car was built with the body 38 inches

Standard Height. The judgment of the board is as fol-

"The board have come to the conclusion that to be safe the floor of the car should be not less than forty inches above rail level. From the evidence adduced the board are of opinion as to all cars hereafter built and put in operation, they would be safe in standardizing the steps of open double-truck cars at from 14 to 16 Rev. J. T. Pitcher of Gananoque, was inches for the first step, and 14 and 12 inches for the two upper steps. On open single truck cars from 12 to 15 inches for the first step, and 12 and 9 inches for the two upper steps would be reasonable. On closed double-truck cars the first step should be from 14 to 16 inches from the ground, and on closed single-truck cars. closed single-truck cars from 12 to 15 inches.

Sundays. Dr. Pitcher, as chairman, said the report was wrong. The minister di ddo insurance business during the week, but the stationing committee "A regulation will be promulgated by the board to the above effect. As the was aware that he intended to do so, and placed him on a circuit which would give him the necessary time. Ministers were too scance to fill the conditions of operation in Toronto are more difficult than in any other city or town in Ontario, the regulation will apply to all street and electric rail-ways under the board's jurisdiction." Dr. MacMurchy Satisfied.

Dr. Helen MacMurchy, who originated the application, stated to The World last night that she was well satisfied with the result, and the standardizing of car steps thruout the prowork in Palestine. Rev. Dr. Work-man pronounced the benediction after vince would prove a boon to woma and children when traveling.
