### SPORT NEWS OF A DAY; HOME AND ABROAD

#### BOWLING.

Wellington League.  
The Purley Ice Cream team took the C. N. R. bowlers into camp to the tune of four points last evening in the Wellington League match rolled on the G. W. V. A. alleys. The winners had a narrow margin of victory in the second string when C. Carleton's score of 106 gave them the string by two pins.

C. N. R.	Total.	Avg.
Magee	66	82
McDonald	78	97
Wall	77	82
Evans	89	91
Brown	71	70

Purley Ice Cream	Total.	Avg.
Rowley	79	78
Wright	77	88
H. Stern	78	80
McGowan	71	82
K. Carleton	88	106

Match Game.  
An interesting match was played on the Victoria alleys on Thursday night between the Bakers and the All-Stars, the latter taking three out of the four points. A return game will be played next Thursday night. Following are the scores:

Bakers	Total.	Avg.
Shepherd	62	76
St. Charles	77	106
Gambell	75	100
Angel	76	72
Copp	86	80

All-Stars	Total.	Avg.
Wilson	86	85
R. J. Elworthy	87	87
Smith	82	85
Fullerton	87	81
R. J. Elworthy	78	72

Manufacturers' League.  
In the Manufacturers' League, T. S. Shinn Co. defeated the St. John Works on Black's alleys, last night, by a margin of twenty-three pins. In the Commercial League, the Bakers defeated the Maritime Mail Works by a margin of 108 pins. The following is the score:

T. S. Shinn & Co.	Total.	Avg.
Sheppard	90	82
R. Power	78	85
Patridge	79	83
Pugh	70	86

St. John Works	Total.	Avg.

### OVERSEAS VETERANS MUST GUARD AGAINST HARDENING ARTERIES

Thousands of Canadian overseas veterans have not given sufficient thought to their health since returning. Physicians recognized that these brave men lived through more emotions during the war than most people encounter in a lifetime. Some lived fifteen years in three, four, or five. Doctors advised veterans to live cautiously.

While hardening of the arteries formerly developed after the fortieth birthday, the war upset this rule, for the reasons given. Veterans must keep fit. Blood pressure is regulated by the state of the arteries, and the best means of reducing blood pressure and preventing hardening of the arteries is by keeping the system well regulated.

Constipation must not be permitted to exert its harmful effects (it is the cause of auto-intoxication—self poisoning—headaches, biliousness, lack of energy, sleeplessness, indigestion, and hardening of arteries).

The use of medicines for constipation is harmful. Pure warm water, applied with the J. B. L. Cascade, is the natural method. It cleanses and purifies the intestinal tract, removes the poisonous waste which accumulates there, and eliminates danger of hardening of the arteries by striking at the root of 90 per cent of human ailments.

The J. B. L. Cascade is shown and explained at E. Clinton Brown's, Drugist, Union and Waterford streets, F. N. Munro, 337 Main street, St. John, N. B.

Ask for the free booklet, "The What, Why, How, Way of Internal Bathing," or write direct to Tyrrell's Hygienic Institute, 168 College street, Toronto, Ont.

Y. M. C. I. League.  
The Y. M. C. I. Bowling League will resume activities next Monday evening when the first match in the House League will be played between the Eagles and Swans. On Tuesday evening the Falcons and Sparrows will meet. On Wednesday the Owls and Gulls and on Thursday evening the Robins and Hawks.

RING.  
U. S. Boxers Win.  
Toronto, Oct. 21.—United States boxers carried away the laurels of five of the seven finals in the international invitation boxing tournament which opened here last night. Four of the finals went to New York and one to Pittsburgh. Winners were: Kellner, Pittsburgh, heavyweight; Covert, New York, middleweight; Carter, New York, welterweight; Belcher, New York, featherweight; Kochanski, New York, bantamweight.

BOXING.  
Sid Marks Knocked Out.  
New York, Oct. 20.—Charley White, Chicago lightweight, knocked out Sid Marks, Canadian lightweight champion, tonight in the second round of a twelve-round match at Madison Square Garden.

ATHLETIC.  
McAuley Coming.  
Victor McAuley, of Windsor, champion long distance runner of the east, will appear here at the big indoor athletic meet in the new rink on the night of November 6 next. Others include Harold LaPierre, the local runner, and Barney Francis, the P. E. I. Indian, who took LaPierre's measure at the maritime championship games this summer. The usual athletic programme has been arranged.

FOOTBALL.  
High School Team.  
The high school football team to play against Fredericton this afternoon will be as follows: Forwards, Kincaide, Heveron, Ewing, Linton, Spaulding, Fox, Gunn, quarters, Rice, Fritz, Mulvey; halves, Humphrey, Snodgrass, McInerney, Donohoe; full, Peters; spares, Case, Clifford.

Federicton High School football team defeated Rothesay Collegiate School team 17 to 0 in the inter-scholastic league fixture played on the Rothesay campus yesterday afternoon. The Fredericton boys converted five tries, one of which they secured. The work of Captain Eric Snow of the Rothesay team was a feature of the game. The line-up for both teams follows:

Federicton	Rothesay
Fullback	Fullback
Steen	Steen
Halves	Halves
McCauley	Scott
Keen	Matheson
Wilson	Douglas
McCordick	Young
Quarters	Quarters
J. Sterling	Thornton
Scott	Snow
Forwards	Forwards
McEnihan	Montgomery
Winters	Flinder
Hanson	Dalsell
Harrison	Macaulay
Hills	Potts
Woods (Capt.)	Green
A. Sterling	Richards
Reserve	Reserve
Ellis, Dunphy	Robinson, Coleman
Vivien, Babbitt	and Walker

BASKETBALL.  
Trojans Reorganized Team.  
The Trojans have reorganized and strengthened their basketball team and on paper have one of the strongest in the maritime provinces. Their line-up will be as follows:

Forwards—C. L. Urquhart, K. M. Willet, Wm. Lee, R. W. Shaw, P. B. Cross.

Centre—A. Malcolm.

Defence—A. N. MacGowan (Capt.) L. S. Kerr, P. S. Garrett, J. M. Willet.

Willet was captain of the U. N. B. team last season. Lee and Wilson played for St. John.

ONE BROKEN AND ONE EQUALLED

New Record at Track and Field Meet of College Athletes in Montreal.

Montreal, Oct. 21.—One record was broken and another equalled at the annual intercollegiate track and field events meet held here yesterday at the

## The World's Greatest Organist

Marcel Dupre, Grand Prie de Rome, Organist of Notre Dame Cathedral, Paris

Centenary Church  
Tues., Oct. 24th  
at 8.15 p. m.

The Programme Includes

Bech—Pantaleo and Fugue in C minor.  
D'Aquin—Noel avec variations.  
Franck—Fantaisie in A.  
Vienn—Finals of the third symphony.  
Gordon—The Chimes.  
Dupre—Prelude and Fugue in G minor.  
Improvised symphony on themes submitted by the audience.

Undoubtedly the  
Outstanding  
Musical Event  
of the Season

Tickets \$1.00. For sale by Gray & Richey, King street; E. G. Nelson, King street; Ross Drug Co., King street; Townsend Piano Co., King street; J. & A. McMillan, Prince William street; Lockhart & Ritchie, Prince William street; F. W. Munro, Main street.

Admission to this event will be rigidly limited to the normal seating capacity of the church. Tickets should be secured at once in order to avoid disappointment.

This is positively the only occasion, despite rumors to the contrary, on which M. Dupre will appear in this city.

Molson Stadium. Only Toronto and McGill competed. Queen's scratching at the last moment when the two entries found that nothing less than a team of eight entries could count for points. The contest with McGill again carrying off the honors for the fourth year in succession, with a total of 83 points against Toronto's 42.

W. R. Kennedy of McGill was the outstanding performer of the afternoon, accounting for 16 points for the McGill team and breaking the record in the high jump where he cleared five feet, eight and seven-eighths inches, the former record being five feet, eight and one-half inches, held jointly by O. S. Waugh, McGill, and H. C. Davis, Toronto. Cecil Hay, captain of the McGill team, came second with 18 points. He equalled the intercollegiate 100 yards record of 10 seconds flat.

MORNING NEWS  
OVER THE WIRES  
The board of conciliation which arbitrated the dispute between the Canadian National Railways and some of its clerical employees has disagreed. The minister of labor has received a majority report from F. T. Costello, chairman, and Howard S. Ross, K. C., representative of the employees. It is expected that George D. Kelley, who acted for the company, will submit a minority report. The report will not be made public until it has been received by the parties to the dispute.

As two men were passing a house about twenty miles from Toronto recently they noticed moving flashlights in the house which they knew to be occupied. Leaving their car they approached the house cautiously and one of them, Edward Johnson, opened the door. As he did so he was struck a heavy blow on the head and two men rushed out by him and escaped. An examination of the house showed that a quantity of silverware and other articles had been gathered up and made ready to be carried away by the burglars who were foiled in their operations.

"Face Disfigured From Eczema"  
Writes the Nurse who finally tried D.D.D.  
"The disease had eaten her eyebrows away. Her nose and lips had become disfigured. Since the use of D. D. D. her eyebrows are growing. Her nose and face have assumed their natural expression."

Cases can be sent you from your own vicinity. Write for testimonials, or secure a bottle of D. D. D. today. Way sufferer itching, weeping, oozing, or crusting. If you don't get relief on the first bottle we will refund without question. Send a bottle. Try D. D. D. soon. 10c. Write to D. D. D. Co., Dept. 88, 27 Loyal Ave., Toronto, and they will send you free trial bottle, which merely pays postage and packing.

English Season Early Marked by Casualties—The Play Much Speedier.  
London, Oct. 20.—(Canadian Press). Although only in its early stages, the football season has already lived a heavy toll, the list of injured players

being unusually lengthy. The matches, with a very few exceptions, have been somewhat difficult to assign a cause for the many accidents. Foul tactics are no more prevalent than in former years, and so far as first-class game this season are concerned, football has never been cleaner.

The desire for speed, and the accomplishment of this desire is held in some quarters to be the main reason for the long trail of accidents this autumn. Football is very much faster than it used to be and consequently when two players come into contact while going at full speed there is more likelihood of injury, if only because of the

greater momentum. Again, if a player running at top speed, in seeking to pass his opponent, happens to lose his balance when tackled, he falls very heavily, and where a defender has blocked a ball the attacking player frequently wrenches his ankle or knee, owing to the sudden jerk with which he is brought up. As a result of this latter cause, considerable number of injuries have been sustained.

Opponents of the "speed system" say that these accidents are unavoidable and must be expected so long as the present style of playing continues. They charge that the value of speed or pace has been much over-rated and that time devoted to its development is not warranted by the results obtained, and they point to the result of the last two international matches with Scotland as justifying their criticisms.

In the last two internationals between England and Scotland, the English side was admittedly the faster, but was lacking in combination and the speed was soon reduced to helplessness by the determination and skillful anticipation of those whose business it was to keep the ball from entering the Scottish goal. At Birmingham last April the English forwards must have scored again and again if they had kept their heads when in the neighborhood of goal. They over-ran the half shot wildly or hesitated until they were robbed, or they failed completely to place in possession when tackled, or just before they were tackled, a colleague who was exceedingly well-placed to defeat the Scottish goal-keeper. There was pace in plenty in the English attack, but there was not enough skill.

Mr. Edison is ASTONISHED  
Sees at Big Schenectady Plant Electrical Marvels That Grew from His Inventions—First Visit in 25 Years.

Schenectady, N. Y., Oct. 21.—Thomas A. Edison, who has dealt in marvels all his life, was amazed at some of the things he saw in the General Electric Company's laboratories on his first visit here in twenty-five years.

He saw a mercury boiler so much more efficient than steam that when it is perfected it will mean a saving of one-third in coal used to produce power. He saw a machine for registering the voice by light on a moving picture film, and he saw a vacuum tube which has produced the vacuum tubes which are the basis of the modern radio.

The day was in all ways a tribute to Edison, for although the application of electron energy, as demonstrated to him, is the beginning of a new science, the future of which is so vast that physicists dare not predict what may be found in it, they traced it all to his invention of the three vacuum tubes of the incandescent bulb, the study of which has produced the vacuum tubes which are the basis of the modern radio.

Edison said, "It is destined to revolutionize our present methods of generation, transmission and utilization of electricity." So they called him "Master of Light" and showed him things of which he had not dreamed when he blazed the path.

Lighting Bolts Juggled for Him.  
Steinmetz juggled his lightning bolts for him, splintered wood and dissipated metal in a flash of fire until Edison's eyes sparkled. Langmuir showed him tubes that Edison thought might mean much in long-distance transmission of power and you can't tell where it will end," and he held a 100,000 candle power incandescent lamp which made his own first bulb seem like the glow of a firefly, a bulb which he did not believe could have been built. It was a great day for Edison and a great day for the physicists of the company, for it marked the achievements of forty years.

There were meetings also between Edison and some of his old employees, men who worked with him in the two little buildings that he bought in 1886 and which are still a part of the General Electric plant.

HAMBURG'S POOR MAY GET GOVERNMENT HELP  
Hamburg, Oct. 2.—(A. P. by Mail).—Two hundred and eighty million marks are required to help the poor of Hamburg city and state through the winter, according to an estimate of the public welfare office which has been submitted to the state senate.

This sum would include the following provisions:—100,000,000 for war sufferers, 50,000,000 for fuel for the needy, 10,000,000 for clothing and shoes, 25,000,000 for reducing the prices of milk, 40,000,000 for lowering the cost of foodstuffs, 30,000,000 for the establishment and conduct of school children's feeding, and 5,000,000 for aiding aged persons and limited wage-earners.

The likely sources of these funds have not yet been specified, although large contributions are expected from the central government.

### MANY HURT IN FOOTBALL GAMES

English Season Early Marked by Casualties—The Play Much Speedier.

London, Oct. 20.—(Canadian Press). Although only in its early stages, the football season has already lived a heavy toll, the list of injured players

being unusually lengthy. The matches, with a very few exceptions, have been somewhat difficult to assign a cause for the many accidents. Foul tactics are no more prevalent than in former years, and so far as first-class game this season are concerned, football has never been cleaner.

The desire for speed, and the accomplishment of this desire is held in some quarters to be the main reason for the long trail of accidents this autumn. Football is very much faster than it used to be and consequently when two players come into contact while going at full speed there is more likelihood of injury, if only because of the

greater momentum. Again, if a player running at top speed, in seeking to pass his opponent, happens to lose his balance when tackled, he falls very heavily, and where a defender has blocked a ball the attacking player frequently wrenches his ankle or knee, owing to the sudden jerk with which he is brought up. As a result of this latter cause, considerable number of injuries have been sustained.

Opponents of the "speed system" say that these accidents are unavoidable and must be expected so long as the present style of playing continues. They charge that the value of speed or pace has been much over-rated and that time devoted to its development is not warranted by the results obtained, and they point to the result of the last two international matches with Scotland as justifying their criticisms.

In the last two internationals between England and Scotland, the English side was admittedly the faster, but was lacking in combination and the speed was soon reduced to helplessness by the determination and skillful anticipation of those whose business it was to keep the ball from entering the Scottish goal. At Birmingham last April the English forwards must have scored again and again if they had kept their heads when in the neighborhood of goal. They over-ran the half shot wildly or hesitated until they were robbed, or they failed completely to place in possession when tackled, or just before they were tackled, a colleague who was exceedingly well-placed to defeat the Scottish goal-keeper.
