### DELIGHTFUL DAY

There were more small craft of all sorts afloat on the St. John river as far as Brown's Flats yesterday than on any previous Sunday this summer. On the beaches all along shore were picnic parties who went up in motor boats and a number of sailing yachts were also out along the lower reaches of the river. Last evening from eight till after ten o'clock there was a procession of small craft down the main river, with quite a number out of the Kennebecasis. With reluctance did the excursionists leave the lovely shores to return to the city.

When the Queen left Indian town on Saturday afternoon the city was still enveloped in fog. As she passed into Grand Bay the village of Grand Bay could be seen lying bright in a slant of sunshine, and in Long Reach the weather, though partly cloudy, was delightful. It was an intense relief after the dull weather for several days in the city. Yesterday was a glorious summer day, and the country after the rain was very beautiful. The dances at the pavilions at Public Landing and Belvoir were greatly enjoyed. The masquerade at the Landing on Wednesday evening was a success about twenty young people going up from the city.

Wild raspberries are now plentiful. There is also a good crop of hard nuts this year, the first for a number of years. Blueberries are reported a heavy crop in the places where they are usually found.

For several hours last evening the street from the Power Boat Clubhouse to Main street witnessed a steady procession of people who had arrived from up river points.

## VISHART STREET EXTENSIONS ARE DISCUSSED

Report Presented by Commissioner Jones—Await Deed-ing of Street to City.

A proposal to extend the water main and sewerage to Vishart street, North End, evoked a lengthy discussion at a committee meeting of the common council this morning. The matter was taken up recently and this morning Commissioner Jones submitted the following report regarding the matter:

"Repeated requests from residents of Vishart street have been made to this department for water and sewerage facilities. I have been informed that twelve or fifteen families who live in that locality are obliged to carry water for domestic purposes from the free hydrant in Adelaide street; in some instances from 800 to 500 feet. This task in summer is irksome enough but during the winter season the experiences of some of these people are very trying, and in some cases great hardships are imposed, especially on those residing farthest from the source of supply.

The residents of Vishart street are experiencing the trials of many of our citizens who plan and build their homes on solid rock foundations and are for years deprived of water and sewerage facilities because of the excessive cost the city has to face to provide them. Necessarily there must be delay as the funds of the city are not sufficient to meet all such demands and it is but natural that the residents of Vishart street are heard to bitterly complain of their condition.

I am anxious to afford relief to these people as soon as it is possible for me to do so.

The engineer estimates that \$18,500 will be required to place water and sewerage in Vishart street, as he says the excavation will be nearly all in solid rock, which in some places will have to be drilled to a depth of twelve feet.

In his report to me on the subject the engineer says:

"If Vishart street were graded, or if we knew just where the final grade will be, we might perhaps take a chance and not place the pipe as deep as we are estimating, but in view of the probability that it may be many years before the street is graded it is not wise to expose the pipe to frost. I have estimated the solid rock at 910 cubic yards at \$10 per cubic yard and you will therefore see from this that the excavation is the heavy end of the estimate.

"Not until the commissioner of public works decides to grade this street do I feel it would be justified in doing this work, the expense of which must be met by a bond issue."

Commissioner Thornton said that if it was a matter of grading the street the commissioner of public works should immediately take the matter in hand. In reply, Commissioner Frink said it was brought out that Vishart was not a public but a private street. If it was incorporated he was willing to go ahead with the work. He said he would send the road engineer here to get the proper grades and make up an estimate of the cost.

It was brought out that there were a number of streets, especially in the north end of the city, which are not owned by the city. Commissioner Thornton said it was time the city took steps to take them over.

Commissioner Bullock said that any street in the city where fifteen families are crowded together and have no water and sewerage should be taken over by the city. He also made reference to the mill pond and said that he had seen evidence which induced him to think it was not conducive to public health.

Commissioner Frink said that the practical way was to find out the owners of Vishart street and have the street deed to the city. This was unanimously agreed upon.

## R. M. A. TAKE UP HOTEL PROJECT

Decide to Open Subscription List—Another Meeting on Wednesday.

Various organizations about the city are taking a hand in the new Champlain hotel project, realizing what it will mean to the city to have an up-to-date hotel. This morning at ten o'clock a meeting of the St. John branch of the Retail Merchants' Association of Canada was held in their rooms, 49 Germain street, with the president A. W. McLean in the chair. Everett Hunt acted as secretary. After considerable discussion it was decided to start a subscription list and to ask all members to subscribe. Another meeting will be held on Wednesday morning at ten o'clock which will be addressed by members of the Commercial Club hotel committee. It is gratifying to see the different bodies in the city getting behind this proposition and, it is to be hoped, pushing it to a successful conclusion.
