Legal Witticisms

A Book of reminiscences, "Forty Years at the Bar," by Mr. Balfour Bowne, K.C., of the London bar, contains these English legal stories:

One of them concerns a colleague of his, Mr. Herbert Saunders, K.C., whose father was secretary of the Great Western Railway.

This gentleman once came to a committee in deep mourning, and one of the counsel asked, "Who is Saunders in mourning for?"

Some one answered, "For the late Great Western train, of course."

The other story has to do with Mr. Will, K.C., the well-known Chancery advocate, who was once appearing in a tight-of-way case in which he held a brief for the public resting in the owner's claim to shut up a footpath.

The owner, who was in court, saw him in his wig and gown, and said, pointing to him, "Who is that?"

"That," said his solicitor, "is Mr. Will."

"I don't like that," said the owner, "for where there's a will there's a way."

Fishery News

Mequito Point to Byant's cove—Total landed 1334 for last week 1188; 35 traps and 29 hook and liners are fishing. Prospects are better than last week. There is a good sign of fish about the ground. Caplin and squid are plentiful. Some few traps have done fairly well and many others very little.

Spaniard's Bay to Upper Island Cove—Total landed 116 quintals, last week 68 quintals; 16 traps and 12 skiffs are fishing. Prospects are poor. Caplin and squid are plentiful; hook and line men are doing nothing.

River Head, Bay Roberts, to Jugler's Point—Total landed 270; 28 traps are fishing. Prospects are poor. Caplin and squid are plentiful but there is nothing doing with hook and line.

South Point, Brigus, to Bay Roberts Point: 280 quintals have been landed to date (June 30) of which 130 quintals were caught during the week, 54 traps and 30 small boats are fishing in this section. Prospects are not bright; at Port de Grave 35 traps have taken about 115 quintals this week of which three crews took the greater part. At Bigus and Burnt Head nothing has been done; hook and line almost nil.

"Imperial" Engine

The first cost of a motor engine is important. The life of the engine is also important. Some engines wear only a short time; others go on doing duty for years. The cooling or water circulation has a lot to do with it. This an "Imperial" has. You can run the "Imperial" at the highest speed and yet keep it as cool as you wish.
