MISCELLANEOUS.

Col. Watterson's Story of a Much Battered Old Lawyer.

Col. Henry Watterson tells a goo story about a much-battered old lawyer story about a much-battered old lawyer who went up into the mountain region of Kentucky to collect a claim. He was lame and half blind, and one armed. A local celebrity in the case was the district's dead shot, who had killed many men, and who was ready to shoot anything or anybody. He came in daily to see the lawyer about a case in which he was interested, until his visits became extremely thresome. Finally the lawyer exclaimed: "Get out of here had stay out of here. Get out right away. I'm sick of seeing you. Don't stand there. Go on out, I tell you." The desperado looked at the wreck of a man in incredible dismay and before he knew what he was doing he was backing out of the room. When he reached the street he burst into tears. The inhabitants crowded around and asked him what was the matter. "He druv me out," he walled, "druv me right out of the room. Said he tired o' lookin' at me and won't let me come back no more." "Why didn't you shoot him?" asked the crowd. "Shoot him," schoed the slayer of many lives. "Shoot him? see He's deaf, couldn't hear. He couldn't run and he couldn't fight. Why, feller citizens, if I'd 'a' shot him it would 'a' been murder."—Detroit Tribune. who went up into the mountain regio

MISSOURI SCALE OF JUSTICE..

(Princeton Telegraph.)
During the recent term of court harles Call was fined \$500 for killing is brother. At the present term homas Morris was fined \$1,000 for assalting a school-teacher and Curt lemm has been given two years in the enlicantiary for stealing chickens. This is a sliding scale of justice with a ven-

ST. JOHN, N. B., JULY 8, 1908.

It is surely not surprising that three of the prison laborers have made the The only wonder is that mor nained so long as they did. There i enced to hard labor find that the sent ence is a punishment. Probably if they had been left in the jail they would no not be difficult to catch the fugitive if they remain about town. If they leave the place there is authority for calling the watch together to give thanks that they are rid of the offenders. Should these escaped prisoners ap will get a heavier sentence, and it will then be the duty of their overseers in the park to give particular attention to them. Prison labor was not intended to be popular with the workers, and is and offences of certain classes. time to time, but the habitual and reis punishment or change his habits.

TOO LATE TO WITHDRAW.

The caucus of government supporters in the house of commons seems to to vote \$500,000 to the Chignecto Shir drawn. This would be a novel pro ceeding. There is no doubt that the representative of the investors reach the agreement with the government that this amount should be paid. The agreement has been made public all over Canada and Great Britain. English financial papers have made it known to their have assumed that the matter is set pression in financial circles if the ar rangement should now be repudiated. The word of the government of Cana ful sense of the weakness and fickleabroad. It may have been unwise for of this indemnity, or whatever it may is not easy to see how they can back cus is to rule it would be better here consult the caucus first and make the agreement afterward.

CITY WORKERS. lo better working here at \$1.40 than at \$1.60 on a short job outside, with their fare to pay and board more expensive than the cost of living at home if the outside work is regular and continues for a considerable time, and other things are equal, it would probably be better for those who can cor work, the city postponing such improve-The demand for labor will not always time to carry on extensive but not time to carry on extensive but not urgent civic work is when the laborers cannot easily get work elsewhere. In such times private employers may cut down wages, and the city influence could be used in maintaining a fair rate of pay when other conditions were unfavorable to labor.

B

THE GOLD HUNTERS.

There is a great rush to Poplar district of the Kootenay county. Rich prospects have been discovered there and at last accounts miners were flocking in from Kaslo and other Kootenay Lake points. At the end of June it was estimated that over one thousand men were camped about the creeks. The district is quite easily reached by rail or boat and the Cana-dian Pacific is improving both services with all possible rapidity.

King Edward dined with President hours the visitor devoted to other functions. At six-thirty this morning the President of France was up and at it again. The king returned very tired from his late visit to Paris and President Loubet must accept the same test of his powers of endurance.

St. John has attained to general re-ognition as a winter port for through sport and import business. In time t will be found to have considerable dvantages for the summer export rade from the west. A large ship-ment of cattle is about to be made by

trade from the west. A large shipment of cattle is about to be made by the Donaldson line from St. John under conditions which are likely to occur frequently in the future.

AGRICULTURAL DEVELOPMENT.
Some of the Efforts Which the C. P. R. is Making to Develop the Territory Through Which its Line Runs.

When the experiment was made by the C. P. R. of appointing an agricultural agent the co-operation of provincing government was sought and received and the first effort made was for live stock improvement.

We was believed that the Shorthorn breed of cattle was best adapted to the conditions of the St. John valley, because it is a breed which combines within itself, in the greatest degree, the dual qualities of producing helfers of large milking capacity and steers that will produce a beef carcass with a large proportion of valuable cuts. Such a breed is suited to the farms of the St. John valley because there are but few farmers who are prepared to keep nothing but milch cows. To adequately stock many of the farms along the river there should be a herd of from 40 to 70 head kept on them; while to keep this number of milching cows would no doubt be profitable there are but few man who are prepared to keep this number of milching cows would no doubt be profitable there are but few man who are prepared to the farms along the river there should be a herd of from 40 to 70 head kept on them; while to keep this number of milching cows would no doubt be profitable there are but few man who are prepared to furnish the labor, buildings and applicances necessary to make such a business successful. On the other hand a farmer may by keeping 10 or 15 cows have a dairy business which he can handle and at the same time rear acalf from each cow and feed off every year from 10 to 15 head of beeves at 2 and 3 years old. Such a plan enables the farmer to keep the largest stock with the smallest labor bill and at the same time rear and of the farms and the first and 3 years old. Such a plan enables the farmer to keep the largest stoc year from 10 to 15 head of beeves at 2 and 3 years old. Such a plan enables the farmer to keep the largest stock with the smallest labor bill and at the same time utilize his rough pasture and inferior hay. This rough pasture and poorer hay cannot be used economically when the dairy business is made a specialty.

poorer hay cannot be used economically when the dairy business is made a specialty.

The policy of the C. P. R. is to aid, not to hinder the dairy business, and the company believes that by inducing farmers who are now keeping only from one cow to a half dozen cows, to keep from 10 to 20 cows as an adjunct to their stock raising business that the milk supply of the province will be largely augmented.

The great need of more beef cattle will be apparent when it is known that one firm in St. John has, since last November, imported from Ontario an average of 35 head of cattle per week. These cattle have weighed about 1,400 pounds live weight each, and have cost 5c, per lb., or 370 per head. The same firm has arranged to import during the summer and autumn 3,000 lambs and several cars of sheep.

Since the 20th March last 44 pure bred Shorthorns have been brought to the province through the agency of the C. P. R. and every effort will be made to increase the demand for breeding stock of this breed.

Last week a valuable lot of cows, bulls and heifers were brought to Fredericton and distributed from there. The consignment included a very choice young bull for Hon. L. P. Farris, of pure Scotch breeding, from the herd of Wm. Smith, ex-M. P., Columbus, Ont. From the herd of J. Walker, Uxbridge, Ont., a bull, whose mother has a record of 27 lbs, of butter in one

herd of Wm. Smith, ex-M. P., Columbus, Ont. From the herd of J. Walker, Uxbridge, Ont., a bull, whose mother has a record of 27 lbs. of butter in one week, for F. A. Hubbard, Burton; a bull and two cows for P. C. Powys, Fredericton, from the herds of Isaac Moore, Greenwood, Ont., and the Glenhodson Farm Co., Myrtle, Ont.; one of the cows has a record of over 12,000 lbs. milk in one year, the other is a young cow, which promises equally well. A very fine two-year old helfer, that dropped a nice heifer calf en route, from the same herd, go to John A. Little, Harvey. Two of the choicest animals in the consignment were brought down by N. F. Phillips, Pembroke, Carleton Co., from the famous dairy Srothorn herd of A. W. Smith, Maple Lodge, Ont. Both are out of noted milking cows, one being in the dairy test at the World's Fair at Chicago and the other in the test at the Pan-American at Buffalo.

PARLIAMENT.

PARLIAMENT.

In parliament yesterday the house went into concurrence on Hon. Mr. Fielding's supply bill.

The next matter under consideration was Mr. Blair's railway commission bill. An amendment was offered by the minister which proposed to only prevent railways which may hereafter be chartered from entering and using the streets of any municipality. This provoked considerable discussion, and Mr. Blair admitted that it would be unfair to take any powers from the municipalities. He consented to compel all tramways to go to the provincial legislature for charters.

The Grand Trunk Pacific matter was not discussed with a view to finality, and the matter was held over till Thursday.

PRINCIPAL POINT OF DIFFER.

PRINCIPAL POINT OF DIFFER-ENCE.

(Yonkers Statesman.)

"What is the difference between hens and poultry, pop?"

"Why, hens, my son, are things that belong to our neighbors, poultry is something a man owns."

A. O. H. PILGRIMAGE TO QUEB ST. ANNE AND MONTREAL

The A. O. H. societies at Bath, Me., Woodstock, St. Stephen and Frederiction have arranged with the Canadian Pacific and Quebec Central railways for a special low rate excursion to Quebec and the Shrine of St. Anne de Beaupre and return.

The Rishon's Address Other Matters

The Bishop's Address—Other Matters.

The Diocesan Synod is gow in annual session in Woodstock, St. Luke's church being used for the meetings. Yesterday morning at the service Holy Communion was celebrated by the bishop, assisted by the dean and two archdeacons.

Among the important questions to be dealt with by the synod is a motion to appoint a committee to consider establishing a divinity chair at Fredericton in affiliation with the University of New Brunswick, and the question of holding blennial instead of annual sessions of the synod.

The bishop delivered his charge after the meeting came to order. After re-

the meeting came to order. After re-ferring to the pleasure it gave the synod to meet in Woodstock, the bishop spoke feelingly of the death of three

Justice Hanington:
Resolved, that this synod learns with great satisfaction of the defeat by the board of governors and alumn of King's Cillege, Windsor, of the proposed scheme for the amalgamation of that college with Dalhousie.

And further resolved, that the determination to reorganize King's with another president and such changes as will make it efficient and place it in a position to deserve and win the confidence of the people of our church, and of the public, meets with the approval of this Synod,

And further resolved, That upon the re-organization of the college on an economical and efficient basis this Synod would urge upon our people to give the college such sympathy and substantial aid as will enable it to successfully carry on the good work intended by its founders, not only as a divinity school and also as a university of the highest standard.

Justice Hanington gave notice of this motion:

this motion:
Whereas it is expedient that this
Synod should be authorized to appropriate and pay out of the interest of
the funds and property transferred by
the late Madras board to this Synod
and held for educational purpose

not as this synod is action to the control of the c

LUMBER TONNAGE.

DETROIT, July 8.—At a meeting of DETROIT, July 8.—At a meeting of the Lumber Carriers' Association yesterday the Great Lakes Company submitted a proposition that will, if carried into effect, place lumber tonnage on a more equitable footing than has heretofore existed. Instead of 20 per cent, discount from tariff rates at the end of the season allowed to other tonnage the lumber carriers under the new agreement will get 80 per cent, except at the ports of Chicago and Tonawanda, where a 35 per cent, discount from the tariff rates will be granted to members of the association. The cash discount will be 40 per cent. Instead of five per cent, as given other tonnage.

tonnage.

A flat price of \$5 is also made for taking lumber tow barges into the locks at Sault St. Marie, thus doing away with the necessity of the steamer handling a long tow in the locks.

Bicyclists and all athletes depend of BENTLEY'S Liniment to keep the joints limber and muscles in trim.

YEAR OF DISCOVERIES.

Sir Clements Markham, as presiders of the Royal Geographical society, delivered his address at the society's anniversary meeting on May 18.

He said that the two most memorable events of the past year, and of many past years, had been the discoveries in the Far North and the Far South.

Captain Sverdrup, in completing our knowledge of the Parry Archipelago, had also completed our general knowledge of Arctic geography. It was this completeness which was the distinguishing feature of his great achievement. The whole problem of Arctic geography had now been solved.

There were many isolated pleces of work, however, which the president would like to see undertaken. One of them had been undertaken by Captain Amundsen, who was just about to commence his daring voyage in a very small vessel to the north magnetic pole.

In the evening the anniversary dinner was held. The president said the King had evinced his interest in the Antartic expedition, and it was understood that he had consented that the land discovered by Captain Scott should be named after his majesty.

Referring to the success of the Antartic expedition, and it was understood that he had consented that the land discovered by Captain Scott should be named after his majesty.

Referring to the success of the Antartic expedition, the president said the ice had not allowed their friends to escape from its clutches this time. That would involve an expenditure of £14.000 or £15,000, as the relief ship Morning must go south again next December.

ber.
They intended to make an appeal to
the government, and he thought there
could be no question as to the reply.

OVERWORKED.

"Yes," remarked the sawmill owner,
"We're so busy now, we have to keep
our plant running day and night."
"Why," returned the visitor, "I
thought this was your dull season."
"Well, it is usually, but we've got a
rush of orders from the breakfast food
companies."
