To cure a headache in ten minutes use Kumfort Headache Powders, 10 cents.

Smoked shoulders, 12c. A regular box chocolate for 25c. at The Bakers, Ltd., 100 Princess street, 111 Baskerville and 443 Main street.

Now is the time to have your clothes cleaned, repaired and pressed at McFarland, the Tailor, 73 Princess St., Clifton Block. Phone 161-11.

Great sales for Friday and Saturday at the Union Clothing Company, 22-24 Charlotte street, opposite City Market.

Many of the visitors in the city are planning to attend the Victoria Boller rink this evening. Ladies might occur tonight and the band will render a fine programme of music.

The ladies who are to assist in the Women's Department of the Exhibition will kindly meet at the King's Daughters Guild this afternoon at three o'clock.

Ernest J. Dick, whose son met a tragic death yesterday at Meserve, Charlotte county, left for Saint George this morning. The body of his son Frank E. Dick is expected to reach the city on tonight's train over the Shore Line.

The Enterprise Foundry Company will rebuild their plant at Sackville. The contract for one of the new buildings has already been let and it is expected that the rebuilt foundry will be turning out its finished product by the first of next year.

The regular quarterly meeting of the county W. C. T. U. was held at the Clifton hall yesterday afternoon with a large number of the ladies present. Encouraging reports were received from all the branches. Mrs. John McAvity presided.

The band concert given in the King square last evening was much enjoyed. The City Cornet band gave a very good performance. The band had a very busy day yesterday, going up river in the afternoon and giving the concert in the evening.

When you buy tea it is just as easy to get the best as to get the next best. The best housekeeper cannot make a good cup of tea with tea of poor quality, but anyone by using "Solade" Tea can make a delicious and healthful drink. With "Solade" you can make more tea and better tea at all prices.

Master Thomas McGowen, a student of the Queen's College, who has been visiting his relatives in the city, returned to London by the Calcutta steamer to take up his studies. He has been talking in the St. John river, camping out, and went home greatly benefited by his trip to the land of cool breezes.

"The Book Beloved or The Mystery Play" will be presented this evening on E. M. Shadob's lawn, Germain street. This piece was given here in March and created an excellent impression. Thirty different characters will be impersonated. Seats have been arranged on Mr. Shadob's lawn and there will also be the latest electric light effects. A full rehearsal of the play given last evening. A fine treat is assured those who attend tonight.

The case against Henry J. Hardy, who is charged under the Alien Labor Act with bringing workmen into the city contrary to law, was resumed in the police court yesterday afternoon. Daniel Mullin, K. C., appeared for the defence. There were lengthy arguments from both counsel and Magistrate Ritchie reserved judgment until a week from today. Hardy was again admitted to bail amounting to \$450.

Rev. F. D. Anderson of Toronto, general secretary of the laymen's missionary movement, met a representative delegation from the Protestant churches of the city in St. John's (stone) church yesterday afternoon and arranged for meetings to be held in the city between September 16th and 19th. These meetings are to be addressed by Campbell White of New York, who was in St. John last winter when the laymen's missionary movement was inaugurated in this city.

Rev. Geo. D. Milbury, of Hampstead, and Rev. Thomas Stebbings, of Gibson, have been registered, to solemnize marriages.

The attention of the public is requested to attend the grand clearance sale of the Parisian Store, 47 Brussels street, Friday, 23rd a. m. For particulars see our ad. on page 3. The Parisian Store, 47 Brussels street.

A meeting of Canterbury A. C. will be held this evening, 7:30 p. m., at the R. Macdonald's office, 43 Canterbury street, for re-organization purposes. All members and friends of the club are requested to attend.

A large number attended the dance at the Telegraphers' Club, last evening, making it one of the most successful of the season. Upon the request of those present, the committee decided to continue holding the same every Wednesday night for some weeks.

Charles A. Ferris, of 46 High street, is confined to his home as a result of a serious accident which he sustained by falling down the hold of the steamer Manchester Corporation while at work on Tuesday afternoon. While his injuries are serious Dr. Stewart Skinner, who is in attendance, is confident of his recovery.

An inquest into the death of Albert W. Poshay, who was killed on the I. C. R. last Saturday, was held by Coroner Berryman last night. Eight witnesses were examined including L. B. Ross, terminal agent, and David A. Sinclair, mechanical foreman of the I. C. R. here. The jury brought in a verdict that death was caused by his accidentally striking his head against the switch lamp in the island yard.

A vigorous protest against the holding of boxing exhibitions in the city was made by the ministers attending the Methodist financial district meeting held in Zion Church yesterday, and Mayor Bullock was criticised for his action in granting a license for the exhibition held on Tuesday evening. A resolution condemning such bouts was passed and a committee appointed to wait upon the mayor and ask him to refuse to grant any licenses for further exhibitions.

It is understood that Solicitor General McLeod, who lately made a fishing trip to the headquarters of the Little South-west Miramichi, unearthen evidence of a recent game law violation carried on in that vicinity during the past season. He will report the matter to the Surveyor General and it is likely that prosecutions will follow. It is pretty generally understood that while North Shore game wardens have been active on game violators who have violated the law, the big game has been able to get off in a coach.—Herald.

A peculiar and very sad accident occurred in Milltown on Tuesday evening last. B. H. Kerr had returned from the field with a load of hay and was holding it to his left by the aid of a horse. His little girl, three years old, had held their reins as the horse moved out to the yard. Some of the gearings caught suddenly and the horse was jerked back with such force that it fell on the little child, crushing its life out instantly. Some cuts were found on the little one's head, but death had been caused by the ribs penetrating the lungs. The parents are prostrated by the sudden blow.—Bacon.

LABOR DAY.

Labor Day will be a public holiday throughout Canada and many municipalities will be keeping ready to move back to the city again. City folk should get their homes in readiness for the long winter months by going to Amland Bros., Ltd., Waterloo street, and purchasing the new Carpet Squares, Oilcloth, Linoleum, or Furniture, as they are recognized by every good housekeeper as the cheapest and most reliable firm to secure up-to-date house-furnishing in the lower provinces. Their prices are marked to suit everyone's taste and pocketbook.

TELLING TALES.

Unsupervised Visitor (trying to use the telephone)—Kitty, what do you say when you take this thing off the hook? Little Girl—Papa always says, "Darn, you, central, you've given me the wrong number!"

In Montclair, New Jersey, U. S. A., owners of dogs will in future be fined a dollar for each bark uttered by their dogs between the hours of 9 p. m. and 6 a. m.

VANCOUVER WOMAN MARRIED A HINDU

VANCOUVER, B. C., Aug. 26.—The first wedding in this country between a white woman and a Hindu occurred last Monday morning, at St. James' church. The ceremony was performed by Rev. H. C. F. Clinton, pastor of the church, the bride having been for several years an attendant at that church.

The bride was Mrs. Annie Wright, an attractive looking woman in the early thirties. She has a daughter nine or ten years of age. The bridegroom was Joseph Munchi-Singh, a Hindu, who has been in British Columbia for five years. He is 28 years of age, well educated, speaks and writes English very fluently. I have known him for a long time and he is a good man. Some of my relations object to the marriage, but my brother who has lived in Vancouver for twenty years, knows my husband well, and quite approved of the match.

THE INVENTOR OF THE SEWING MACHINE IS DEAD

BOSTON, Mass., Aug. 26.—The death is announced at the home of his daughter in Brookline, of John James Greenough, inventor and former superintendent of the patent office at Washington. He was the first to take out a patent on a sewing machine, invented the first shoe-sewing machine and assisted in the construction of the first electric locomotive. He held the position of superintendent of the patent office from 1837 until 1841. In 1833 he commenced the publication of the American polytechnic journal and was born in Boston, January 19, 1812.

BASEBALL

NATIONAL LEAGUE

At Chicago—Chicago, 6; Brooklyn, 4. At Pittsburgh—New York, 4; Pittsburgh, 2.

EASTERN LEAGUE

At Rochester—Newark, 1; Rochester, 4. Second game: Newark, 3; Rochester, 6. At Buffalo—Buffalo, 0; Baltimore, 11. At Toronto—Toronto, 2; Providence, 1 (8 innings). All American League games and all New England, rain.

Maine State League Games.

At Bangor—Bangor, 2; Augusta, 1.

THE RING

Mike Twin Sullivan is to box Dan Littlejohn at St. Stephen on September 8th, during the carnival. The Twin leaves for the border town either today or tomorrow. The bout will be six rounds. Jerry Wilson is one of the promoters. On leaving St. Stephen Sullivan will return to St. John, where a six round boxing contest with Foley or Beth McLeod is to be arranged. Jack Power is making the arrangements and will handle the bout.

THE JURY

AT NEW GLASGOW.

There were about 1,500 people at the New Glasgow horse races yesterday. The 117 trot and 2:20 pace was won by Buchanan in four heats. The 27 trot and 30 pace was won by Lou Helen in the last three heats of a five heat race.

AT BANGOR.

At Bangor yesterday Alice Bell was in the 23 trot and 21 pace. In the 21 trot and 21 pace Lou Foster won in straight heats. Little Sweetheart was second and Miss Leatha third.

TALES OF TAILS.

Members of the cat family seldom actually wag their tails. In this they differ from dogs, who wag their tails to show delight. As cats can purr, they have no need to do this.

A cat's tail is, however, useful as a sort of vent for superfluous nervous energy. Watch a cat stalking a bird. The tip of the animal's tail is never still; it is always curling and uncurling. If we could see it, it would be the same when a lion stalks a man.

Animals of the cat tribe which climb use their tails for their tails. They use these appendages as balancing poles. When a cat walks along the top of a fence, its tail serves the same purpose as the long poles carried by tight-rope walkers. It is shifted here and there to preserve the balance of the animal.

STARTLING SPECULATIONS AND CONCLUSIONS ABOUT STARS

Are there countless beings watching us in this little world of ours from out of the limitless regions of space and if so, what do they see and know? That is the question which has agitated the mind of man since the astrologers of Assyria made bold to tell the fortunes of their fellows from gazing at the twinkling points of light in the heavens above them. Modern science has made vast strides since those days and with the aid of the telescope and the camera is able to provide a comparative answer to the world old question.

SOME STARTLING SPECULATIONS.

The latest attempt to answer the question has been made by Candide Flammarion, the celebrated French astronomer. M. Flammarion is satisfied that some of the millions of planets about us are the habitation of intelligent beings. A few of the startling speculations and conclusions, which he has made are presented here.

The moon practically has been given up as hopeless. Its examination has been so exact that it is certain that it life exists at all on our satellite it must do so in a most primitive and rudimentary form. With our nearest neighbor, Mars, however, it is different. We know now that Mars possesses a climate far finer and more agreeable than our own. That season occurs with greater regularity than with us, and that there exists every condition requisite for life in a high form of development.

MARTIAN SUMMER TO BE ENVIED

While Peary, Nansen, Abrial and all their brotherhood are striving vainly as yet to penetrate the mystery of our poles, we know all about the Martian world. We can watch the snow line gradually disappearing and the appearance of summer. There is little rain and few clouds at Mars, and our presumptive neighbors enjoy a summer which would make the inhabitants of the South Pacific islands green with envy.

Every bit of evidence that has been added to our knowledge strengthens the theory that a race of intelligent beings inhabits Mars, and the evidence presented by the Martians would seem to demonstrate that they are our superiors in the mechanical arts. The Martians are said to be children of the planet.

But while we know something about Mars, we know almost nothing about the countless millions of planets which revolve in their individual systems, many times bigger than the earth, and so far away that the mind reels at the figures which the astronomers present to us?

If there are inhabitants on Mars it is at least reasonable to assume that there also are inhabitants on such other of the planets which have reached a stage where life is supportable.

STRANGE AND INCREDIBLE BEINGS.

Strange and incredible must be the beings who exist on those far distant planets. On many of them the conditions of life are not exactly the same as those of our own world and some of them are so vast that the discovery of an American continent would affect their inhabitants as little as the discovery of a new island would to us. Jupiter is just eleven times bigger than the earth, and just at present is about about to start on its terrestrial existence. That is, it probably will have finished its preparations in approximately ten million years. That sounds pretty long, but it really is, a mere bagatelle, astronomically speaking.

SUN IN ITS OWN RIGHT.

Some ago Jupiter was a sun all in its own right. It had a little system of seven worlds that basked in its heat, but those worlds have all gone out into the dark void. Jupiter died one day and his satellites perished at our day. Our world probably will perish when our sun dies. But Jupiter only died to be born again in a new shape. If finished his solar career, it rapidly passing through its stellar existence, will presently start on its terrestrial life.

There is a little red patch visible on Jupiter, which the astronomers declare is a continent in the making. If we could get near enough we would be able to see a new world in the making of its birth. The tremendous machinery of the sphere is revolving, and with the thunder of the infinite continents which will unite them for countless ages.

A Jovian year consists of a mere trifle of 10,465 days, but in that vast chaos the sun shines only five hours each day. The great bulk is in shadow at the equator at the incredible speed of a revolution every nine and a half hours. It moves now at the poles. This proves that the process of solidification is not yet complete and that the infant world has not yet come to its own.

But there are other worlds, innumerable in number as stars of the sea, stretching away into infinity until imagination is numbed and senseless attempting to grasp the fact of their existence. Not only worlds, but entire systems, with two or three suns and many moons, where beings with powers undreamed of by us mortals may, and in all probability do exist and work out their existence in spans of time which are to our brief lives as we ourselves are to a butterfly.

ONE REVOLUTION PER 347 YEARS.

The planet Castor, which is in reality is two stars revolving around one another, takes 347 years for one revolution. While one annual period has been elapsing on that planet generations have grown up and passed away among us. The last Castorian year ended two earthly years ago. It commenced in 1851, when the Armada had sailed and when America was naught but the happy hunting grounds of the Indian, with a few adventurous riskers their lives in attempts to find the fastnesses. In the course of this tremendous year might powers have risen and fallen on earth and our modern world has emerged from the stress and storm of the middle ages.

LIGHT TRAVELS AT SNAIL'S PACE.

But much stronger than all this is

the contemplation of what the people of these unknown worlds are seeing if they are occupied with the concerns of this little world at all. Light travels at what to us is the inconceivable speed of 186,000 miles a second, but in the languages of the spheres that is merely a snail's pace.

The light from many stars has been travelling towards us for centuries and has not yet arrived. Similarly our own light has taken centuries to reach distant worlds and is still travelling towards others which are so far from us that when that light will have reached them this world will have long since ceased to exist.

If then the people of those distant stars are looking for us they do not see us to the world as we know it, but the world as it was generations ago. Way off in space there may be a watcher who at this moment with his marvelous telescope is passing in review the battle of Thermopylae or another nearer who is gazing with a bewildered look at the red carnage of Waterloo.

Some of these watchers of the stars could tell us the history of the garden of Eden from the point of view of an onlooker. And the fall of Troy is a spectacle of today for them. The actors in the Crucifixion are living men and women to them, while of us and our little concerns they have no knowledge.

THE RING OF SATURN.

One of the most interesting of the many stars which are known to our astronomers is Saturn. No satisfactory explanation ever has been given of the luminous ring which surrounds this planet, and it forms a fruitful subject for conjecture to the scientists.

Millions of miles beyond Saturn there is an even stranger star called Gamma. Gamma is of a beautiful green color with orange stripes. To complete a delicate pea green may prove more in harmony with their surroundings. As for the vegetation and fauna, what is the use of trying to conceive flowers which grow in a green and orange world with a blue moon shining down on them at night!

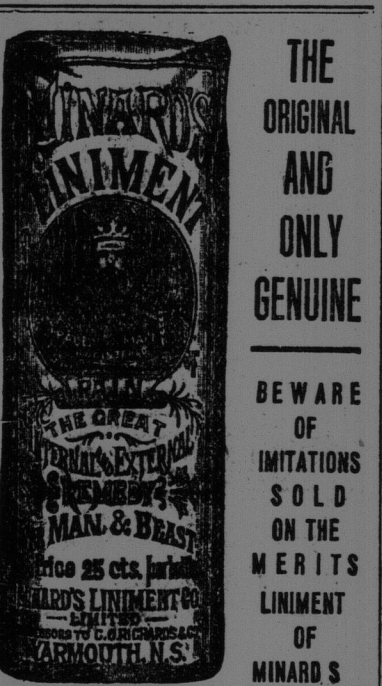

THIS WORLD A LITTLE STAR.

Away off in Sirius old mother earth looks like a little bit of a star. That is if our light has yet reached there, which is improbable. Sirius started sending its rays down to us before Eve had tempted Father Adam to eat that apple and commenced all our troubles. The Sirius may have gone to live in Sirius when they got snubbed by Ulysses.

A few trillions of miles away there is a small and discreet star called Alpha. It is just 200,000 times as far from us as the sun, but that does not bother Alpha in any way because it has two suns all of its own and so is in no danger of freezing to death. Alpha's two suns sometimes alternate, a combination which must prove trying when the inhabitants go to bed at sunset and find that it is really sunrise. Perhaps they dispense with sleep altogether.

DIES IN PENITENTIARY

TORONTO, Aug. 26.—John E. Anderson, 1 school inspector for Brownville, who was sentenced to seven years in the penitentiary for bigamy, his victim being Miss Margaret Anderson, a Methodist minister at Renfrew, died in the Kingston penitentiary today, aged fifty-two years. He had suffered from throat trouble since his incarceration, three months ago.

On Monday evening two ladies were at the HAPPY HALF HOUR. Here's their conversation as they were going out: "I had no idea that they gave such an excellent show here. Why it's the best in the city." "Yes, and so clean, and such good air." "There are lots who don't know that the Happy Half Hour is the best show in town. Are you one? If so, invest 5 cents and see what you think of it."

Activity Lurks

LIONS FOHTL

Excited by a thunderstorm two massive African male lions—Nero and Brutus—at Earl's Court, London, got into the cage of a young lioness. A terrible fight ensued between the two lions, and it was only after great exertions on the part of the staff that the beasts were eventually separated, after having badly mauled each other. It is feared that Nero will lose the sight of his young eye. Both the animals show signs of their struggle.

DIARRHOEA

There is no need of anyone suffering long with this disease, for to effect a quick cure it is only necessary to take a few doses of

Chamberlain's Colic, Cholera and Diarrhoea Remedy

In fact, in most cases one dose is sufficient. It never fails and can be relied upon in the most severe and dangerous cases. It is equally valuable for children and is the means of saving the lives of many children each year. In the world's history no medicine has ever met with greater success.

PRICE THIRTY-FIVE CENTS.
