

of grain and 167 tons of straw, per acre, heading the list, White Russian Campbell's, white Chaff came next. In oats Danish Island led with 77.9 bus. of grain and 1.19 tons of straw to the acre. In corn North Dakota

led, producing 11.6 tons per acre. In potatoes Empire State was the best yielder, producing 234.9 bushels to the acre.

Eight varieties of wheat and 4 varieties of oats were sown. The

wheat was sown on May 14 and the oats on May 23, on plots 1.40 of an acre in size. In wheat, the White Fife seems to be the best yielder, and Danish Island has led in the oat list for two years.

MAY & JUNE

are the Best Months to Make Money Raising Chickens

Chicks hatched then grow more rapidly and require less care than at any time of year, and the knack of running the business successfully is acquired under the most favorable circumstances.

One good May or June hatching will bring out a brood of chicks that sell about October 1st for enough to pay for an incubator and another batch can then be started that will get the chicks out in time for the Christmas market. The next batch will be ready for the March and April market, "broilers" commanding the very highest market prices.

A good incubator is the foundation of real success in poultry raising, bringing the whole matter from guess-work to certainty. -We furnish you with a

Chatham Incubator

on easy terms. No cash to pay until November, 1905. By that time it should have paid for itself.

Nothing else raised on a farm pays like this, and the beauty of it all is that the women folks or children can easily attend to the very small amount of work there is to be done. Half an hour or so a day is all the time required.

Getting the right Incubator is pretty nearly the whole thing. The Chatham is the safest and surest Incubator made. It does the trick; 100 per cent. hatches every time if the eggs are fertile. Rather than go into details of construction here, we will print a few out of many hundreds of testimonials:

Brighton, Ont., April 15th, 1905.

The Manson Campbell Co.,
Chatham, Ont.

Dear Sir,—I told you when I received my Incubator and Brooder that I would let you know what success I had with my first hatch. When the Incubator arrived I went and got eggs to put in it, and as I was anxious to get it started I took all the eggs I could from the party, and he had only enough so I could not pick them over. There were some small ones and some long and narrow, and as I afterwards found out he was keeping twenty-seven hens with one cockrel, so they did not look very good on the start. I put fifty-six eggs into the incubator and followed the instructions closely, and I got fifty chicks, two having died in the shell, which I think is first-class. They are all strong and lively. I am sorry I did not order the 100 size instead of the 50. I have it now filled with sixty white Wyandott eggs I wish you could

tell me where I could get a good poultry paper, something that would suit a beginner.

Yours truly,
E. H. BARAGER,

Box 234,
Brighton, Ont.

P.S.—I would rather attend to an incubator than one hen now. There is some satisfaction in knowing that if you look after them you will get chicks.

Valens, Ont., April 15th, 1905.

The Manson Campbell Co.,
Chatham, Ont.

Dear Sir,—The incubator that we purchased from you on the 15th Jan. has been certainly a dandy. Out of a No. 2 incubator with 83 fertile eggs I got 76 chickens, and they are all strong and healthy. I used 1½ gallons of oil. I think there is no better incubator in the world.

Yours truly,
MRS. JOHN ROBSON,
Valens P.O., Ont.

MANSON CAMPBELL.

We have similar letters from every State in the United States, and every Province in the Dominion.

Every Incubator we put out is the best kind of advertising we do, for it sells many others for us by its never-failing results.

The Chatham is built on honor, and its construction and workmanship are as perfect as an experience of fifty years and ample capital can make them.

The Chatham was the first Incubator made that was good enough to admit of its makers taking chances that it would make its cost for the poultryman before it was paid for.

Don't imagine for a moment that it is any longer possible to make big poultry profits by setting hens. As hatching hens are as out of date as stone hatchets.

If these erratic, uncertain birds are kept busy egg-laying instead of wasting their time setting, the poultryman will pocket a good many extra dollars in profit.

If you want to get full particulars on the subject and learn all the details of successful Incubator hatching and profitable poultry raising send to-day for our superbly printed book, "How to Make Money Out of Chicks." It's FREE.
