Some of Fashion's Latest Features

Farm and Dairy patterns shown in these columns are especially prepared for Farm and Dairy's Women Folk. They can be relied upon to be the latest made, and include the most modern features of the paper patterns. When sending Farm and Dairy your order please be careful to state, not only measure for adults, age for children and the number of patterns desired. Price of all patterns to Our Folks, not each address all orders to Pattern Dept., Farm and Dairy, Peterboro, Ont.

1031—Coat for Girls and Misses—This style of coat should appeal to the young girl for the comfortable and practical wrap for fall. The loose sleeves are in quite popular this season in both coats and blouses. The collar, cuffs and belt may be made of contrasting material. Four sizes: 14, 16, 18 and 20 years.

1035-1036—Lad's Costume—A very neat and attractive costume could be developed from these illustrations. The blouse would make up nicely in some of the flowered materials with vest, collar and cuffs of contrasting material, or if desired the sleeves may be made long. The skirt 1035 has a decided flare at the bottom, which adds to the width of the skirt it measuring two yards at the lower edge. The blouse is cut in size from 32 to 42 inches bust measure, and the skirt from 22 to 30 inches waist measure. This illustration calls for two patterns, the for each.

9730—Lad's House Dress—More and more we are making winter house dresses of some sort of cotton material rather than heavy goods, as they are quite warm and can always be kept fresh and neat looking. In 9730 we have a very simple and practical style of house dress cut in size from 32 to 42 inches bust measure.

1021—Lad's One-Piece Anorak—This style of apron is especially easy of construction, being in one piece and fastening with straps at the shoulders. It can be worn over a dress when we especially wish to protect it, and yet not crush it in any way. Three sizes: Small, medium and large.

9741—Child's Rompers—When making those new rompers for the little boy or girl, take a look at this style and we believe it will appeal to you. It is very simply designed, having no trimming except pocket and belt, but is all the more practical on this account. Four sizes: 6 mos., 1, 2 and 3 years. It requires 2½ yards of 36-inch material for a 3-year size.

1037—Outgame for Misses and Small Women—Almost every style that we see nowadays of fall dresses has some sort of tunic attached. In 1037 we show an attractive style for the young girl. If desired the blouse and tunic might be made from contrasting material to that of the skirt. The blouse has the long shoulder and either long or elbow length of sleeves. If preferred the rumples which was so popular last fall and winter might be used to advantage here instead of the low neck. A soft crushed belt will add the finishing touch to this attractive design. Four sizes: 14, 16, 18 and 20 years. The skirt measures about 3½ yards at its lower edge.

1043—Girl's Dress with Linings—As the cold weather approaches some mothers when making the new dresses for the little women will wish to make them warm by adding lining. This dress is especially suited for that purpose. The style is an attractive one, having an inverted pleat down the front and the popular raglan sleeve. Sleeves may be made long or elbow length. The long-waisted effect still remains in the dresses for young girls, and is becoming to the majority of them. Four sizes: 6, 8, 10 and 12 years.

HOW ARE YOU GOING TO SPEND Your Winter Evenings?

Isn't there something you would like to "study up"?

Then why not get our Catalogue of Rural Booklets? You will find it covers practically every farm subject. You can have this catalogue merely for the asking. Send a card for it to-day.

Reading Broadens Your Knowledge

Why not do some studying this winter on your own line of business?

Our best farmers are almost invariably heavy readers. At least 75 per cent of our information comes through printed matter—papers, books, etc.

Get our Catalogue of Books. Select something in which you are interested and "Make this winter count."

If you can put into practice what you learn, it should mean many dollars to you next summer.

ADVERTISE in these popular columns, which others find so profitable—costs you only \$1.50 an inch.

THIS WASHER MUST PAY FOR ITSELF.

AMAN tried to sell me a horse once. He said it was a fine horse and had nothing the matter with it, I wanted a horse, but, I didn't know anything about horses much. And I didn't know the man very well either.

So I told him I wanted to try the horse for a month. He said "All right," but, without saying pay me first, and I'll give you back your money if the horse isn't all right."

Well, I didn't like that. I was afraid the horse was "all right" and that I might have to wait for my money if I once parted with it. So I didn't want the horse, although I wanted it badly. Now, this set me thinking.

You see I make Washing Machines—the "1000 Gravity" Washer.

And I said to myself, lots of people may think about my Washing Machine as I thought about the horse, and about the man who owned it. But I'd never know, because they wouldn't write and tell me. You see I sell my Washing Machines by mail. I have sold over half a million that way. So, thought I, it is only fair enough to let people try my Washing Machines for a month, before they pay for them, just as I wanted to try the horse.

Now I know what my "1000 Gravity" Washer will do. I know it will wash the clothes, without wearing or tearing them, in less than half the time they can be washed by hand or by any other machine.

I know it will wash a tub full of very dirty clothes in five minutes. I know neither machine ever invented can do that. I know neither machine does the work so easy as my "1000 Gravity" Washer does. I know I can run it almost as well as a strong woman, and it doesn't wear the clothes, they say the age-old wring buttons, the loss of other machines do.

It just drives soap water clear through the pores of the clothes like a force pump might. So, said I to myself, I will do with my "1000 Gravity" Washer what I wanted the man to do with the horse. Only I won't wait for people to tell me. I'll tell them, and I'll make them ask me to let them try it.

Let me send you a "1000 Gravity" Washer on a month's free trial. I'll pay the freight out of my own pocket, and if you don't want the machine after you've used it a month, I'll take it back and pay the freight too. Surely that is fair enough, isn't it?

Doesn't it prove that the "1000 Gravity" Washer must be all that I say it is?

And you can pay me out of what it saves for you. It will save its whole cost in a few months in water and soap. It will save the man to do it will save 50 to 75 cents a week over that in washwoman's wages.

After the month's trial, I'll let you pay for it out of what it saves you. If it saves you 50 cents a week, send me 50 cents a week. I'll take it. I'll take that cheerfully, and I'll wait for my money until the machine has paid for itself.

Drop me a line to-day, and let me send you a book about the "1000 Gravity" Washer. I'll send you a book about the "1000 Gravity" Washer. I'll send you a book about the "1000 Gravity" Washer.

—L. MOHRIS, Mgr., 1900 Washer Co.
