

## Cures Rupture!

What's the use of torturing yourself wearing the cold steel or badly fitting elastic truss when you can be cured at home without pain or danger, and no time from work, not a drop of blood lost. Away with the old truss, off with the wretched feeling as though you were held in a vice. Feel as you should feel—strong and healthy. I can make you do so, that you will wonder you ever contented yourself with the torturing pain of an old truss.

Mr. William McShane, 673 Ross Ave., Winnipeg, Man., whose portrait here appears, was cured 5 years ago. Read what he says:

Dear Dr.—It gives me great pleasure to tell you I am positively cured of my bad case of rupture. It is now some 5 years since I quit using my truss, and I have had no trouble whatever from my old complaint.

### AGED 84 AND CURED.

Dear Dr.—I am glad to say that I am permanently cured of my rupture by the use of your Method. My health is better than it has been for years past. The 22nd of this month will be my 82nd birthday, and I am hale and hearty. You are at liberty to use my testimony to convince skeptics that they too can be cured.

Yours very truly,

WM. MILNER.

### OPERATIONS NOT NECESSARY.

Dear Dr.—Your Method cured my son 3 years ago, and he is a very strong child. You may publish this, as our doctor considered it a very bad case, and gave no hope, saying "that in a few years he would have to undergo an operation." We fooled him—you have him cured. Thankfully yours,

WM. A. KEELINGTON.

### NO TIME FROM WORK.

Dear Dr.—It is indeed a pleasure for me to inform you that your Method has been a complete success in my case. Words fail to express my gratitude to you, and I will ever recommend your cure.

Yours gratefully,

BENJ. TREKLY.

### SUFFERED 25 YEARS, AND CURED.

Dear Dr.—I have worn many trusses, and all were a failure, but your Method has done the work which I considered it impossible to do. I can honestly recommend your Method, and advise all sufferers from rupture to write you. I am,

Yours very truly,

EDWARD CASE.

### TWO RUPTURES CURED.

Dear Dr.—In answer to your letter of recent date, I am thankful to say both my ruptures are cured. You can use my name, and I will do all I can to recommend your Method. Believe me,

Very truly yours,

RICHARD TOOP.

You ruptured people who have tried every truss, and have even undergone operations with the ill result that you are still ruptured, will welcome this glad news that you can be cured. No one too old; no case too bad. FREE TRIAL: To prove to the ruptured what a Godsend my Method is to them, I will send to those who write at once a FREE TRIAL of my wonderful discovery.

FREE BOOK: My valuable book, "Can Rupture be Cured," which is the best book ever written on rupture, and which deals in detail with the Cause and Cure of rupture, also FREE to all ruptured who write at once. None but those who are interested need apply.

DR. W. S. RICE,

2 EAST QUEEN ST. (DEPT. 283),

TORONTO, ONT.

### GOSSIP.

Not merely the earth we live on, but our own especial life—our work, our study, our daily toil—may live in the light of God.

"Do you believe," she asked, "that a genius can possibly be a good husband?" "Well," he modestly replied, "I would prefer not to answer that question. But my wife ought to be able to tell you."

The office boy to a large firm of publishers was a smart lad, and when recently he was sent to one of the operative departments with a message he noticed at once that something was wrong with the machinery. He returned, gave the alarm, and thus prevented much damage. The circumstance was reported to the head of the firm before whom John was summoned.

"You have done me a great service, my lad," he said. "In future your wages will be increased \$1 weekly."

"Thank you, sir," said the bright little fellow. "I will do my best to be worth it, and to be a good servant to you."

The reply struck the chief almost as much as the lad's previous service had done.

"That's the right spirit, my lad," he said. "In all the years I have been in business no one has ever thanked me in that way. I will make the increase \$2. Now, what do you say to that?"

"Well, sir," said the boy, after a moment's hesitation, "would you mind if I said it again?"

At Cornell University all the mechanical engineering students have to learn seven trades. One of these trades, that of blacksmith, is very distasteful to some of the students, but it has to be learned all the same. One young fellow, who was unusually averse to soiling his hands, begged hard to be exempted from wearing the leather apron; but the professor took special care that there was nothing lacking in the thoroughness of his training at the forge.

Last fall the student went to the professor and thanked him for being compelled to learn blacksmithing. "You see," he said, "I am now superintendent of a mine away back in Colorado. Last summer our main-shaft broke and there was no one in the mine but myself who could weld it. I didn't like the job, but took off my coat and welded that shaft. It wasn't a pretty job, but she's running now."

"If I couldn't have done it, I'd have had to pack that shaft on mule-back and send it three hundred miles over the mountains to be fixed; and the mine would have had to shut down till it got back. My ability to mend that shaft raised me in the eyes of every man in the mine, and the boss raised my salary."

"Usually a cow does not stand much chance when she engages in a hand-to-hand conflict with a grizzly bear," said Michael Ayres, a Colorado stockman; "but several years ago one of my cows killed one of those animals and came out of the struggle without a scratch. The cow had recently given birth to a calf. It being her firstborn, the mother was exceedingly vicious, and it was unsafe for a stranger to approach her, as her horns were long and pointed. The cattle-shed had a thatched roof, and was scooped out of the hillside a short distance from the house.

"One night a bear, having smelt the presence of a cow and calf, mounted the roof of the shed and proceeded to force an entrance by scratching through the thatch. The cow at the same time detected the presence of the bear, and held herself in readiness to receive the intruder. The noise of a terrible struggle aroused me, and grabbing a lantern I rushed from the house, and opening the shed door found the cow in a frantic state, luttling and tossing to and fro some large object, which evidently had lost all power of resistance. It turned out to be a good-sized grizzly, which had been run through and through the body by the courageous mother. The little calf was nestled in a corner, sleeping peacefully, and seemed unmindful of the maternal struggle. I suppose that as soon as the bear gained entrance through the roof it was pinned to the ground by the cow's horns before it had time to do any damage."

## Lice, Mange, Itch,

and other parasitic skin diseases, if they appear on an animal will surely spread to the entire herd. The remedy is the prompt use of a dip, wash or spray of

### Chloro-Naphtholeum Dip And Live-stock Disinfectant

which never fails to cure when properly applied. Owners of large herds, breeders and State Experiment Stations know the value of this quick-acting, non-poisonous and economical promoter of healthy stock. It pays for itself many times over. Hog Cholera cannot secure a foothold when Chloro-Naphtholeum Dip and Live-stock Disinfectant is used as an external and internal remedy.

Chloro-Naphtholeum Dip and Live-stock Disinfectant comes concentrated. You add 50 to 100 gallons of water to each gallon of this Dip you buy. No other preparation necessary. 1 gal., \$1.50; 5 gals., \$6.75; 10 gals., \$12.50, prepaid. Sold by dealers everywhere in sealed trade-marked cans. Valuable booklets sent FREE on the Preventive Treatment of Diseases Peculiar to Stock.
