## Trade Notes

THE NECESSITY OF PROVIDING clean and comfortable quarters for farm animals has been repeatedly urged of late in the Government bulletins and the press. There is a marked improvement in plans and materials in buildings for both farm stock and poultry.

Perhaps the best example for the new order of things is to be seen in the large present use of ready roofing and siding. There has been and is now an enormous demand for light, easily handled and applied, vermin proof and absolutely water proof ready roofing. Happily the demand has been met in Paroid with a roofing with all the requisites and which is at the same time inexpensive.

The great drawback to ready roofing has been that the nails and tin caps used for fastening have quickly rusted out, causing leaks. The caps have been attacked by rust not only from above but also from beneath out of reach of protecting paint. The result is they are short lived.

This rust trouble we understand has now been fully overcome by a patented appliance. It consists of a roofing cap which is thoroughly rust-proof on both sides, above and below, and gives no chance for rust or corrosion. The nails used are also rust proofed. Incidentally, the caps are made square which gives more binding surface and holds the roofing firmer than the round caps.

These new caps are the patent of F. W. Bird & Son, East Walpole, Mass., and are furnished only with PAK-UP ROOFING. They fully justify the claims of the Makers that Paroid makes a permanent roof with a permanent cap. Prospective users of roofing are advised to keep in mind "the ready roofing with the squares, rust-proof cap." We believe samples not only of the roof but of the caps and nails are sent on application. Address as above or apply to Chicago, Ill., or Hamilton, Ontario.

HIGHLAND PARK COLLEGE, Des Moines, Iowa, opens its new school year with an increase in attendance of 15 per cent. over that of any previous year. Students are in attendance from more than half the states of the Union and from Canada, Germany, Austria and Mexico.

Highland Park College has grown to be one of the largest and most complete educational institutions in the West. It was established some seventeen years ago and no money has been spared in making it one of the leading institutions of learning in the country. Besides containing the regular College Courses there are special departments for preparing teachers for the public schools, a large College of Pharmacy and one of the most completely equipped Engineering Schools in the country, including Civil, Electrical, Mechanical, Steam, Gas and Telephone Engineering, and in addition to this there is a thorough Machinist's Course which is one of the best in the West. Besides these special courses there is a thorough course in

## MANGE

NOTICE is hereby given that, by Order in Council dated August 21st, 1907, the period during which cattle are required to be dipped within the area set forth in the Order in Council of June 10th, 1907, has been extended to the 15th September, 1907, and that in case of any owner failing to treat, or to make satisfactory preparation for treatment of his cattle on or before first September, 1907, the provisions regarding compulsory treatment shall go into force and effect.

J. G. RUTHERFORD,  
Veterinary Director General.  
Ottawa, August 22nd, 1907.

Business College, a College of Shorthand and Typewriting, Special Penmanship, Telegraphy, and one of the largest and best Colleges of Music in the country. The expenses have always been reasonable and the work in the school is of the highest grade. Every member of the faculty is a specialist in his department.

Students are admitted at Highland Park College any time they wish to enter. Special terms, however, open October 14th, November 26th and January 6th. If any of the readers of this paper are interested in sending their children away to school this year it will be well for them to write President Longwell for catalogues giving full and complete information relative to the school. We can endorse this school as one of the leading institutions of the West.

## QUESTIONS AND ANSWERS.

### ABORTION IN A MARE.

Three-year-old mare was bred last year but "slipped," the foal when about five months old. Bred her again this year in June and believe her to be with foal. Is she likely to abort again and is there any particular time when it is liable to occur? What can I do to prevent it?

Sask. T. G. R.  
Ans.—Your mare might have met with an accident which caused her to slip her foal the last time and she may not do so again. But if you wish to use a preventive you might give her a few doses of Fluid Extract of Cramp Bark, in one ounce doses, about the fifth month and again at nine months.

### MORTAR FOR FINISHING COAT.

Could you tell me how to make up mortar for finishing coat with hard sand?  
Sask. S. W. B.  
Ans.—To prepare mortar for finishing the coat proceed as follows: Slake one part of fresh quicklime with water to the consistency of paste. Mix from one to one and one-half parts of this with about one part of sand. It is best to use the quantities used by the masons, which the mixture hardens to a strength, etc., make it a mixture about half and half.
