How favored we are these days in having with us the bonnie Prince, who smiles his way into all hearts! What pleasant stories will be treasured to be told again and again, in the years to come! And in so many ways he is so like our own wholesome, clean-living boys—princes by nature.

A young horse belonging to H. Lester, which was fastened outside Whitmore's store on Saturday p.m., became frightened at a ladder being carried by Filo Haskin, and bolted. Crossing the street, it started up the street inside of the pavement. Two small sons of Mr. H. Warren, who were playing in front of their home, narrowly escaped being run over. The elder boy, aged about 5 years, pulled his smaller brother through a gate just in time. The harness and buggy were badly broken, and the horse had a cut on one shoulder.

Wisdom is never dearly bought provided the article is genuine.—Horace Greeley.

In canned goods there are two kinds of spoilage. The first is called "flat sour" which includes all kinds of bacterial growth that develop within the food. The second type of spoilage to guard against is mould, a plant growth that is distinctly different from the bacterial growth. Moulded foods are seldom more than surface affected because air is necessary for its growth, but the "flat sour" spoilage means that the entire can must be discarded. Bulletin No. 93 of the Dominion Experimental Farms, "Preservation of Fruits and Vegetables for Home Use," which may be had on application to the Publications Branch, Department of Agriculture, Ottawa, gives full information on the various methods of canning including old and valuable recipes as well as new ones which have been found valuable. Canning has become the most popular means of preserving large quantities of fruit and vegetables, and since these are plentiful during the summer months and at other times difficult to obtain, it is important to preserve quantities during the growing season for use in winter. Moreover the use of an abundant supply of fruit and green vegetables is essential to health at all seasons of the year.
