Electric transfer of the Devideor Miss.

> Orders are coming in daily, and the volume of business being handled by times as large as last year.

The London and Petrolea barrel works employs fifteen more men now than last year, and an \$8,000 addition the is being erected. The money is being spent in two buildings, one 140 by 40 feet, and the other 120 by 40 feet. Good at McClary's.

Superintendent King, of McClarys south end works, states that there has been a general resume of 1907 conditions; supplies are more difficult to secure, and reports from all quarters show that manufacturers are not stocked up as they were a year ago.

The London Concrete Machinery Company is running night and day, and already this year over four times as much business has been done as during the whole twelve months of 1908. During July about one-third of last years trade was handled, and July is considered a dull month in the

A new plant, with 30,000 feet of floor space will be erected, work to com-mence immediately after the Western Fair, and about forty men will placed at work when the building is completed about the first of the year. The building trades are also rushed, and real estate is on the boom through-

Business Picking Up.

Here is what some of the men interviewed have to say: and Petrolea Barrel Works - Trade is picking up very rapidly. We have now there were but 70 a year ago. Material is advancing in price, and we have great difficulty in securing it. These fact that another kind of paving block, said to be of equal quality, was finishing an \$8,000 addition to the finishing an \$8,000 addition to the

plant. Superintendent King, of McClary's the contracts he had passed through men on the payroll here, an increase withdrawn after proceedings were en- have great difficulty in handling the tered in the courts in relation to them. trade. Trade is from 15 to 20 per cent

Big Improvement.

Mr. Henry Pococke, of the London Concrete Machinery Company - Business thus far has been four times greater than the entire trade of 1908 out about three-quarters of our work as much trade as we did in months of last year, and we are figuring on at least eight times the bustness before the end of 1909. We are ABSORBS BEAL'S figuring on a new shop now, and work vill be commenced immediately after the Western Fair. We have now about 8,000 feet of floor space, but the new plant will have 30,000 feet. It will be completed at the end of the first year and about forty men will be employed However, the city must give us much been absorbed by the Jones Engraving better treatment than we have been accorded here. We were unable to secure a sewer connection, but that must all be settled before a brick is oncern, which will continue to do busi- laid. I have received offers from two places in Western Ontario lately, but we have not decided where to locate the new plant. The Car Works.

The officials at the car shops state that they are unable to secure the required number of carpenters, and that new men are being taken on every day. At the G. T. R. roundhouse the staff is rushed, and more men will

probably be taken on shortly. "Business on the whole is much better than a year ago," said Mr. Ed Hyatt, the contractor. "Building is brisk, and we have 22 men on the staff at present. have about 35 hands employed. We have commenced work for the new Niagara power station and pumping plant, and will have it going in full

swing in a couple of weeks." A Full Staff.

George White & Sons are running full-handed with 170 men on the pay roll, but business is litte better than last year owing to the poor crops in Real Estate men speak well of conditions and state that there is a great demand for houses at the present

A TRIFLE SKEPTICAL AS TO KING CRAB Learned Discussion on Verte-

brates Before the British

Scientific Association. Winnipeg, Aug. 26.-Addresses of the presidents of various sections and discussions of new theories, resulting from recent discoveries, marked today's sessions of the British Association for the Advancement of Science. The properties of radium were discussed by Prof. J. H. Poynting, and in the engineering section John Thornecroft read a paper on

ydroplanes. In the zoology section Prof. Godrick of Oxford, reviewing various theories to account for the origin or vertebrates, favored origin from primitive, worm-like forms, rather than from the more highly specialized forms, such as the limulus (king crab), as has been suggested by such scientists as Dr. Patten the United States, and Dr. Gaskell in England. Prof. Boulenger of Cambridge, dealt with certain curious fat bodies found in the skin of a large number o

European and American toads, Shorter Hours for Workmen. In the geographical section President Duncan Johnston reviewed the principal results of exploration during the

past year, including Lieut. Shackleton's Antartic discoveries. In the section of economic science and statistics, Prof. Chapman advocated shorter hours for workmen. A paper by Prof. Steel Maitland, a member of a royal commission appointed to inquire declaration mainly from that class known as casual workers.

In the anthropological section the president's address was read by Prof. Myers. The purpose of the paper was a refutation of the current belief that of all of application to the practical affairs of Daughters of the Empire situation. No
