**FARMERS**  
Consider Parity in Paint  
in Preference to Price.

You wouldn't pay the regular price for Sugar that analyzed 10% of sand. You wouldn't pay "all wool" prices for cotton-and-wool clothing. Why should you pay your good money for impure Paint, when you can get

### MARTIN-SENOUR "100% PURE" PAINT

We guarantee Martin-Senour "100% Pure" Paint (except a few dark shades that cannot be prepared from pure Lead and Zinc alone) to be 100% pure White Lead, pure Oxide of Zinc, pure Linseed Oil, pure Colors and Turpentine Dryer; and to be entirely free from adulteration or substitution; and sold subject to chemical analysis.

Every experienced Painter knows that the above formula is right. It is the standard of the paint world.

You get absolute purity — extreme fineness — uniform quality—when you insist on "100% Pure" Paint.

SENOUR'S FLOOR PAINT The old reliable.  
RED SCHOOL HOUSE PAINT for the barn and sheds.  
MARTIN-SENOUR WAGON and IMPLEMENT PAINT for wagons, tools, etc.

Write direct to the Martin-Senour Co., Limited, Montreal, for their 1916 Booklet, "Town and Country Homes", showing many new color schemes and giving valuable paint information.

### BULBS IN A BOWL.

An Easy Way to Cultivate Miniature Floating Gardens.

A novel way of growing bulbs, such as crocuses, has been tried with good success. After securing the bulbs the next thing is to get one or two rather large corks. Through these holes are bored and the bulbs fitted into the openings in such a way that the under side, from which the roots spring, is near the lower part of the cork.

Now obtain a large shallow bowl and fill this with pure water. Float the corks, with the bulbs in place, on the surface and set the whole thing aside in a rather shady position for two or three weeks. At the end of this time it will be noticed that the roots are growing down into the water; therefore forward a place in a sunny window should be selected.

The upper shoots of the bulbs will start to grow rapidly, and at this time it is a good plan to arrange a little moss to hide the upper surface of the corks, or, if preferred, however, grass or some other seed, such as cress, may be sown to provide a green covering.

There is nothing to do but to keep the bowl well supplied with water and change this now and again. Finally the flowers emerge, and then the effect is extremely pretty. The bulbs may be planted in this way any time up to early January, though naturally the sooner they are started the earlier they will bloom.—S. Leonard Bastin in St. Nicholas.

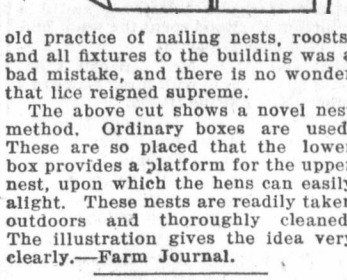

The Earliest Maps.

It was among the Egyptians that the first maps appeared. They were wooden tablets on which land and sea, roads and rivers, were fairly accurately outlined. The evidence of such maps is not only furnished in the old Egyptian papyrus rolls, but some of the actual maps have been discovered. It was once contended that the Greeks were the inventors of the art of cartography, but it has been proved that the Egyptians and Babylonians antedated them in this respect some 2,000 years or more.

Always Serviceable.—Most pills lose their properties with age. Not so with Parkelee's Vegetable Pills. The pill mass is so compounded that their strength and effectiveness is preserved and the pills can be carried anywhere without fear of losing their potency. This is a quality that few pills possess. Some pills lose their power, but not so with Parkelee's. They will maintain their freshness and potency for a long time.

### Make Nest Boxes Movable.

Everything in the henhouse should be movable—nests, roosts, dust boxes, etc. This gives an easy chance to fight vermin and also give the house a thorough cleaning. The

old practice of nailing nests, roosts, and all fixtures to the building was a bad mistake, and there is no wonder that lice reigned supreme.

The above cut shows a novel nest method. Ordinary boxes are used. These are so placed that the lower box provides a platform for the upper nest, upon which the hens can easily alight. These nests are readily taken outdoors and thoroughly cleaned. The illustration gives the idea very clearly.—Farm Journal.

### POULTRY NOTES.

Better hens, better care.  
Better care, better egg yield.  
Better egg yield, better purse.  
Better purse, better farmer.  
Better farmer, better hens.

If your hens are not laying these days the one great desideratum that will make them commence is ground bone and meal. These are rich in albumen, phosphate of lime, and phosphoric acid, which go to make eggs and shells.

Too much leniency shown toward sick fowls and a failure to remove them from the rest of the flock in a hope of their ultimate recovery often lead to the inoculation of the entire flock and the ruin of the enterprise.

Sometimes when a fowl is thick in the molt it will be seen constantly pecking at one particular place on its body. This may be caused by one or more of the new feathers failing to pass through the skin and causing great irritation. If a needle is passed under the covered end of the feather it will enable it to be drawn above the skin.

Do not allow the hens to get in the habit of standing around all day doing nothing. When they do this it is an indication that they are too fat, diseased, or fed in such a manner that they do not have to work for it. Activity and egg laying go together. To promote exercise a good plan is to hang up, about three feet high in the henhouse, pieces of meats, sugar beets, cabbage or turnips for them to pick at.

### Do Not Scare Fowls.

Make friends with your poultry and things do away with frightening the fowls, and you will get better service from them.

### Should Plan Work.

With the increasing scarcity of labor, planning your work is more necessary than ever this year.

### CURIOUS ORIGIN OF A LAW.

It Was Passed in England on Account of Peter Thellusson's Will.

The Thellusson law, once enacted by the British government, was a law to regulate the disposition of property by will and to prevent the excessive accumulation of estates. It had a curious origin.

On the 27th of July, 1797, one Peter Thellusson, an English merchant of French birth, died in London, leaving a certain sum to his widow and children and the remainder of his property, then amounting to several hundred thousand dollars, to trustees to accumulate during the lives of his children, grandchildren and great-grandchildren living at the time of his death and the survivors of them. The accumulation would have been enormous.

The will was contested, but was held valid. In order, however, to prevent such a disposition of property in the future, parliament passed what was called the Thellusson act, or accumulations act, regulating and limiting bequests in such a way as to make great accumulations impossible.

When Peter Thellusson's last surviving grandson died, in 1856, a question arose as to whether the eldest male descendant or the male descendant of the eldest son should inherit the property, and this question was decided on appeal by the house of lords in June, 1850. The Thellusson will and the legislation growing out of it were a subject of much discussion by lawyers.

Warts are disfigurements that disappear when treated with Holloway's Ointment.

## PILES.

You will find relief in Zam-Buk! It eases the burning, stinging pain, stops bleeding and brings ease. Perseverance, with Zam-Buk, means cure. Why not prove this? All Druggists and Stores—See box.
