

## WINTER APPLES AT BARRIE, FOR MARKET.

A member residing at Barrie asks, "What apple would you recommend to plant in quantities for market as winter apples, in a locality like this, where it appears to be uncertain whether the Baldwin and Rhode Island Greening are sufficiently hardy?"

We are still seeking for the varieties for which enquiry is made by our esteemed correspondent. There are sorts which are sufficiently hardy to endure that climate and to bear good crops of fruit, but—there is a *but* to most if not to all. The Red Astrachan, Tetofsky, Alexander, Duchess of Oldenburg, St. Lawrence, &c., are all sufficiently hardy, but they are not winter fruits. Perhaps the most profitable of all the hardy winter sorts may be the Snow Apple. We say perhaps, because in this climate and soil the fruit is very apt to be spotted with small black spots in such numbers as frequently to destroy the value of the fruit, rendering it entirely unfit for market. If it proves on enquiry about Barrie that the fruit is free from blemish, and that the trees yield as large crops as they do usually wherever planted, there is no doubt about the profitable character of the investment. The demand for well grown Snow Apples, free from blemish, has never been met. But if the fruit is subject there to those black spots that so often ruin it here, do not plant this variety for market, it will not pay.

Next to this we should expect to find the Golden Russet, the one with light colored speckled shoots, sufficiently hardy and productive to be a profitable sort. Here it does well, bears well, yields medium sized, fair, handsome apples, which sell well in the English and Scotch markets. The proprietor of the celebrated Beaver brand of Canadian apples says that it is one of the most profitable varieties in his orchard. Inquiry about Barrie ought to reveal how well it succeeds there, whether there proves to be any thing in the soil or climate of that section which lessens any of the good qualities of this variety as grown elsewhere. The tree is quite hardy and productive about Trenton, Belleville, and that section, and is there planted in considerable quantities for market.

The Ben Davis is a very hardy, vigorous, and productive tree; the fruit is of good size and handsome appearance, and keeps well. It is quite possible that this would prove a profitable variety, but—and
