

The Methodists of Steveston, B. C., will build a new church.

The Cairo Polish Company, Pictou, N. S., are applying for incorporation with a capital of \$10,000. John W. Morrison, A. J. Craig, J. A. Russell, and Archibald McKenna, all of Pictou, N. S., are the promoters.

The factories making lace and braid at Berlin Ont., and Toronto Junction, have been brought under one management. The machinery of the Berlin factory has been taken to the Junction, where the works will be materially enlarged. Mr. Hartoun, formerly foreman at Berlin, becomes foreman of the new concern. Mr. Tuerk, the former proprietor of the Berlin factory, is a director of the company formed by the amalgamation.

There was a large meeting of mill men and others at Hampton, N. B., to see the testing of a new "Allis" band mill recently put in by the Flewelling Manufacturing company of that place. The first logs cut were the toughest spruce that could be found in the boom, which were cut as accurately and smoothly as were the clear pine logs which followed. Then some birch logs were brought in, and while they were of the largest size and of the toughest quality, they were cut with equal ease, and an accuracy that could not be excelled. To illustrate the saving made by a band saw the Messrs. Flewelling formerly had so much saw dust that they had to cart it away and were thinking of putting in a burner to get rid of this expense. But now, although cutting more per day, they have not enough to run their boiler on, and are using other refuse, which formerly had to be carted off. At a low estimate, the saving effected even in low grade lumber is equal to the running expenses of a mill. The Waterous Engine Works Co., of Brantford, who furnished the machinery, as well as the Messrs. Flewelling, are to be congratulated on their enterprise. The capacity of these mills is from 40 to 60 thousand feet per day. It will repay any mill men to visit this establishment and see for themselves that a properly built band mill can be run by ordinary intelligent men and give results that show well on the right side of the balance sheet. VanMeter Butcher & Co., Moncton, are general agents for the Waterous Engine Works Co., for the Maritime Provinces.—Moncton, N. B., Times.

Mr. John Farquharson will build a large biscuit factory in Montreal.

The Toronto Batting Co. have started again at Esplanade East, Toronto, where they will manufacture batting and mattresses.

Messrs. Shaw and Cassils, Montreal, have purchased D. W. Alexander's interest in the Huntsville, Bracebridge and Port Elgin canneries. D. A. Burns is their Toronto manager.

Joseph Kidd, late of Tilbury, Ont., has accepted a bonus from the municipality of Prince Albert, N.W.T., for the purpose of constructing a roller flour mill of 100 barrels capacity. Work is being pushed on the building, and the contract for the roller mill machinery, including engine and boiler, is in the hands of Messrs. Wm. and J. G. Greely, Toronto, Ont.

EAGLE FOUNDRY
