

(f) provisions for the verification in CW Convention will include methods and mechanisms for the verification of the prohibition to use chemical weapons.

(g) separate mechanism for investigating suspected use of chemical weapons and biological weapons in combat;

(h) including the prohibition of use in the definitions of the chemical weapons convention;

(i) in the interests of enhancing the effectiveness of the Convention, the States Parties shall agree in due form to prevent any actions aimed at deliberately falsifying the actual state of affairs with regard to compliance with the Convention by other States Parties.

"III. Co-ordinator's proposals for 'a working hypothesis' :

"In the event that consensus is reached that Element I of the future convention may not include a reference to the prohibition of use, this question could be handled as follows:

In the preamble of the Convention, a paragraph will recall the 1925 Geneva Protocol and reaffirm the prohibition to use chemical weapons; Element VII will also contain a reference to the Geneva Protocol stating that the Convention should not be interpreted in any way as limiting or affecting the obligations assumed by States on the basis of the 1925 Protocol;

In addition, a new article will be included in the Convention recognizing that any use of chemical weapons will ipso jure constitute an evidence of a violation of the CW Convention and, accordingly, the provisions on verification included in CW Convention will apply to such situations as well.

"Prohibition of the planning, organization and training in chemical warfare capability

"In the last meeting of the Group, a short exchange of views on the possible inclusion of the prohibition of the planning, organization and training into a CW convention took place. It appeared that the basic positions expressed on this subject remain the same. It was consequently agreed to postpone a discussion on this item till after further discussions on other problems like verification or non-use.
