*Mr. Martin*—On Monday next—The following proposed Resolution:—Whereas the creation by Parliament of a Board of Grain Commissioners indicates governmental interest in the movement of grain throughout Canada for both domestic and export sale;

And whereas, from time to time Parliament has enacted measures dealing with the grain trade, providing for inspection and other necessary services;

And whereas, in the South-western peninsula of the Province of Ontario the bulk of the production of corn in Canada is to be found, this production being an important factor in the income of the farming community and the economy of the area generally;

And whereas, the facilities for the marketing of the said production are inadequate,

Therefore be it Resolved,—That, in the opinion of this House, the Government

(a) should consider the necessity for improved marketing facilities;

(b) should consider the need for providing adequate storage, drying, government grading and inspection facilities in order that the quality of the corn be improved and its production increased.
