

**Cape Enrage Light.**—A new Light House has been lighted on Cape Enrage in Westmorland, nearly opposite Apple River Harbour. The House is painted white.—A plain white light.

N. B.—As the order for painting the Light Houses of New-Brunswick and Nova-Scotia of various colours, arrived late in the Fall, it may so happen that Head Harbour and the Machias Seal Island Light Houses may remain of plain white till next year.

\* \* \* The half of the expense of the Cape Sable and Brier Island Lights is paid by New-Brunswick, as they are so highly useful to vessels trading with this Province.

### LIGHT HOUSES IN NOVA SCOTIA.

[In addition to the Light Houses in Nova Scotia, before noticed, there are the following.]

**Sambro**—Sambro Island, mouth of Halifax harbour—a fixed light.

**Roseway**—M'Nutt's Island, mouth of Shelburne Harbour—two lights, one above the other. [volving light.]

**Liverpool**—Coffin's Island, mouth of Liverpool Harbour—one re-

**Canso**—Island, Gut of Canso—two lights, one above the other.

**Halifax**—Meagher's Beach, Halifax—one light.

**Pictou**—Entrance to Pictou Harbour—one fixed light.

**Low Point**—Entrance to Sydney Harbour—one fixed light.

**Cross Island Light** is situate at the entrance of Lunenburg Harbour, in lat. 44 22, North; long. 64 6, West. The Light House is situated on the South East end of the Island,—and displays two lights—one a *flash light*, thirty feet above the ordinary fixed light. In clear weather these lights can be seen so soon as a vessel loses sight of Sambro Light, and, under favourable circumstances, it is visible at the distance of five leagues, and distinguishable at three leagues.

**Scatarie Light House.**—This building is placed near the North Eastern end of the Island, is painted white, and elevated about ninety feet above the level of the sea, exhibiting a revolving light, visible one minute, and invisible half a minute. The light can be seen from a southward or seaward position, and without interruption from any high-land, until the compass bearing becomes to the eastward of N. E. by N. when it will be speedily obscured, and a vessel so placed on that side of the Island, is in danger either of the rocks of Scatarie or the southern shores of Cape Breton Island.—From any position to the Northward or in the Gulf of St. Lawrence, the light can be seen while the distance admits, but when it bears to the Eastward of S. E. a ship is in danger on the N. E. shores of Cape Breton, therefore as a present rule, whereby due warning may be obtained, the light house should never be brought to bear Eastward of N. N. E. or S. E. by S. by compass, nor, yet approach nearer than one and a half or two miles.

**Saint Paul's Light Houses.**—Two Light Houses have been erected on the North and South extremes of the Island of Saint Paul's.—The one on the North East end of the Island is a very brilliant fixed light, and is elevated about 130 feet above the level of the sea. The one on the South West end of the Island is a Flash Light. One of the light houses will be always open until a ship is on the rocks near the centre. The Northern light can be seen to the southward, on any bearing except between N. by E. and E. by N. when it is obscured by the hills to the southward of it. The southern Light can be seen from the northward on any bearing except between S. S. E. and W. when that is obscured by the hills to the northward of it.
