Decided Change for Better PORCUPINE IS READY Shown in the Mining Markets FOR WINTER'S WOR

MORNING

Resumption of Strenuous Demand Puts Percupines on Up-grade Three Nations Lake District Again-Cobalts Still in the Dumps. Centre of Industry-Trek to

World Office, Thursday Evening, November 23.

A decided change for the better was in evidence in the local mining markets to-day. A resumption of the strenuous buying demand, which characterized the exchanges last week, was evolved, and prices scored sharp advances in most instances thruout the

From the manner in which the up-

ward movement was conducted, it looked much as it a short covering inevement was under way, and this led to the benef that the recent de-cline was due largely to the putting cut of short stock by traders who were engaged in scalping the market lor quick profits. This was more plainly in evid

in relation to Vipond than any other security. The market for these shares in relation to Vipond than any other security. The market for these shares was distinctly buoyant and under a strong demand, the shares scored a sharp advance to 60 1-2, a gain of 4 points for the day. Trading in the stock was active in the extreme, and at the close bids were only fraction ally removed from the high point. The movement in Vipond found its reflection thruout practically the whole list, the only issue to show no re-sponse to the improved sentiment be-ing Dome Extension. A 3-point advance in Pearl Lake, which got up to 47 on small trading, was the feature of the general list, Other strong spots were Swastika, Presten. Crown Chartered and Foley-O'Brien, all of which scored advances. Dome Extension dropped a full point from yesterday at 74 on the liquidation of some weakly held stock, but al slightly improved then was observ-able in the shares at the close. In the big issues indications of strength were evident from the very inception of trading. Hollinger scor-ed a 30-point advance at 11.20 and clos-ed bid there; Big Dome was quiet, but from. '

and a turture is sold off to nearly so, was the only feature. The market on the whole manifested Trethewey ... a distinctly improved tene, and the U. P. Cobalt. matority of the active issues showed Timiskam. clearly the underlying strength of Porcurines-their position. Sentiment was decided ly more favorable, and it was felt their a further advance should be re-alized, in view of the improved public demand in evidence. BACK FROM PORCUPINE

Broker H. B. Smith Sees Favorable

Nipissing A. J. Barr & Co. returned yesterday morning from a week's trip to the Porcupine camp. He was favorably impressed with the situation there and reported excellent progress being made at all the mines visited. Mr. Smith brought back with him some fine looking samples of ore from the Eldorado property in southeastern Whitney, these showing free gold Whitney, plentifully. "They are already in the throes of

winter in Porcupine," said Mr. Smith to The World. "Three feet of snow covers the ground and the lake is frozen hard. The mining properties are readily accessible, as excellent sleigh-ing is possible over the forest route."
