

An Opportunity of a Lifetime is Here Offered—An Investment in One of the Largest Mining and Developing Companies, That Has 600 ACRES OF TOWNSITE PROPERTY AS AN ASSET in Addition to 160 ACRES OF MINING CLAIMS.

The only available property suitable for a town, that has well drained soil, spring and lake water, and railway facilities adjacent to Cobalt and its great mines. Read every word of this advertisement. It will interest you.

COBALT DEVELOPMENT CO., LIMITED

(INCORPORATED UNDER ONTARIO MINES COMPANIES ACT)

Authorized Capital \$5,000,000.

DIRECTORS:

Shares Par Value \$1.00 Each.

EWAN MACKENZIE, President Director
 Railroad Contractor, Toronto, Ont.
 THOMAS AIKENHEAD, Vice-President Director
 President Aikenhead Hardware Co., Toronto, Ont.
 PERRY L. HOBBS Director
 Metallurgist, Cleveland, Ohio.
 FRANK H. POTTS, Secretary, Toronto, Ont.

R. K. MCINTOSH Director
 Proprietor P. McIntosh Food Co., Toronto, Ont.
 HENRY D. McNAUGHTON Director
 Ex-County Clerk, Rochester, N.Y.
 G. STEVENSON, Treasurer Director
 Broker, Toronto.
 Solicitors—MESSRS. BICKNELL, MORINE, BAIN & STRATHY.

J. F. MILLS Director
 Director Iroquois Motor Car Co., Buffalo, N.Y.
 A. R. BICKERSTAFF Director
 President Deer Park Sanitarium, Toronto.
 W. C. CAMPBELL Director
 Proprietor Union Dairy Company, Toronto.
 CROWN BANK OF CANADA, Bankers.

Every dollar invested in this company gives the investor a dollar interest in 160 Acres of Mining Claims and 600 Acres of Townsite Property—Total 760 Acres—and also in all other properties they may purchase or which are acquired by the company's prospectors.

PROPERTIES OWNED

40 Acres Bucke Township
 S.W. 1-4 of S. 1-2 of Lot 7, First Concession.
 This claim has four well-defined veins, on which development work has been done. Shaft has been sunk 20 feet on one vein from which assays taken from various depths show marked improvement. Test pits have been sunk on other veins which show them to be regular and well defined.
 This claim is adjoining the property of Temiskaming & Hudson Bay, McKinley-Darragh and McCormick mines, and adjacent to Thretheway and Amalgamated properties.

20 Acres Coleman Township
 E. 1-2 of N. E. 1-4 of S. 1-2 of Lot 9, Sixth Concession.
 This claim has two veins traced across entire lot, on which a shaft of 50 feet has been sunk. Assays taken from various depths show greater amounts of silver according to depth.
 This claim is adjoining properties of Cleveland Cobalt and Lake George, and adjacent to Silver City and Albert properties.

20 Acres Portage Bay District
 N. 1-2 of S. E. 1-4 of N. 1-2 of Lot 19, Con. 3, called the "Little Bonanza."
 This claim has six veins on which active development is being pushed. A shaft has been sunk on one vein on which native silver has been found. Over 500 feet of vein has been uncovered.

80 Acres Portage Bay District
 Known as Claims 1404 1-2 and 1405 1-2.
 This is one of the best properties in the district, having up to the present time five veins uncovered and a number of cross-out veins, all carrying silver. One vein has been traced across the entire 80 acres and runs from six inches to two feet wide. An assay taken from 3-foot level shows \$93.00 silver, or six times greater than on the surface.
 These claims are adjoining the Edison, Calumet, Prince Rupert and Nadeau mines.
 All claims have been inspected by experts and the presence of silver has been established beyond question.

600 Acres Townsite of North Cobalt
 The most valuable asset of a mining company is the finest land in Northern Ontario, is surveyed and suitably laid out into wide streets—main streets being 100 feet wide, and divided into 4000 splendid building lots.
 The townsite is located mostly in clay lands, on firm level ground with just sufficient incline to make excellent sanitation. It is situated on the Temiskaming and Northern Ontario Railway, 320 miles north of Toronto, and on the shores of the beautiful Lake Temiskaming, where it has half a mile of shore, with scenery that cannot be excelled. A syndicate has been formed to erect an hotel on this property, on the rising ground overlooking the lake, which

will probably cost in the neighborhood of \$100,000.—A beautiful location for a summer resort.
 There is also a valuable water power on this property, which is sufficient to supply power to pump water for the town and supply electric energy for lighting purposes.
 North Cobalt Townsite has an abundant supply of spring water, and plenty of building material close at hand. The land for this townsite was purchased previous to any discovery of minerals being made in that district. At this date it is completely surrounded by mines in active development, among them being the Green-Mechan, Red Rock, The Ruby, Big Ben, Lady Thompson, Rochester and others. Valuable silver deposits have been located and claims are being actively developed.
 An electric railway company is being organized to build in this district running north from Cobalt. Preliminary surveys show it to cross the townsite property.
 Building operations on townsite are active; many people who have purchased lots are now building homes; applications have been received for lots on which it is desired to erect a church and school.
 With influx of prospectors, permanent residents and tourists to the Cobalt district in the spring and summer months, for whom there is no adequate accommodation, it is expected that these will locate permanent homes and summer cottages on the townsite.
 We anticipate that a city of 25,000 people will be located here and neighboring shores in a short time.

An investment endorsed by Bankers, Manufacturers, Wholesalers and men of wealth and prominence. Fortunes are being made in Cobalt Stocks. These shares are fully paid and non-assessable.

CUT THIS OUT AND MAIL WITH REMITTANCE WITHOUT DELAY.

A. R. BICKERSTAFF & CO., Brokers, 20 King Street East, Toronto

Gentlemen: Enclosed find \$_____ in full payment for _____ shares of the Capital Stock of the COBALT DEVELOPMENT COMPANY, LIMITED, at the special price of 20 cents per share (par value \$1) full paid and non-assessable. Certificate to be issued in name of _____

Street and No. _____ P.O. _____

COCHRANE'S MINING BILL HAS IMPORTANT FEATURE

Assessors to Be Appointed, Who Will Report Upon Properties Annually.

The new mining bill of Hon. Mr. Cochrane was ready yesterday for distribution in its printed form. Besides the tax on profits and acreage, the bill provides for the appointment of a mining assessor with wide powers. Extensive reports are to be furnished and half the tax is to go to the school sections in unorganized districts. A tax is also to be imposed on natural gas, half to be refunded on what is not exported.
 Owners will be requested to notify the bureau of mines of the fact that a mine is in operation within ten days after said operation commences, together with the following information: Name of mine, name of owner, occupant and operator, name and address of manager. Notification of any change in these or any cessation or recommencement of operations must also be made. From this the bureau of mines is to keep a list showing all operating mines in the province with names and addresses so given.
 It is made illegal to ship ores without first notifying the bureau of mines that such mine is in active production, and mine owners, in addition to other statements, must before Aug. 1, 1907, and March 1 in every year, furnish a statement containing the following information: Name and description of mine; name and address of persons owning or occupying quantity of ores shipped or treated on the premises during the year ending Dec. 31; name of smelter to which sent; cost per ton for transportation; cost per ton for smelting; value of ore shipped, after deducting charges; value of ore treated on premises. Books must be kept at or near the mines, containing account of ore and value.
 One or more officers, to be known as mine assessors or mine assessors, shall, annually, or oftener, "prepare lists and descriptions of, and ascertain and report the facts concerning all mines,

and to make such investigations as may be required by the minister." This officer is to be given power to enter mining premises at all times for the purpose of making enquiries and obtaining information, and "he shall be allowed to take samples for assaying values of ore, and he shall have access to all books and letters, but any information of a private or confidential character shall not be disclosed."
 One-half the amount collected by the acreage tax shall be refunded to the trustees of the unorganized school sections in which the lands are situated. Trustees have to furnish a list of the mining locations in their districts. In unorganized territories, it is provided that lands shown to have been used during the preceding year shall be exempted.
 Methods for the preparation of the tax roll are defined, appeals from which must be filed within fifteen days. These appeals are to be referred to the mining commissioner on the railway and municipal board. Any person causing an investigation by reason of false or untrue statements may be compelled to pay costs as taxed by officer of the high court. Where a very large sum is involved an appeal may be made from the commissioner or board to the court of appeal. In lieu of an appeal the minister may conduct an enquiry into the facts.
 All mines in the province operated under the same general management shall be dealt with as one, and not as separate mines. The annual profits shall be ascertained from the gross receipts on the year's output, or, in case any part of the output is not sold, but is treated for the owner, then the actual value at the pit's mouth, the market value to be ascertained by the mine assessor after deducting certain defined expenses. The taxation shall be upon the basis of the business of the preceding year. For non-payment of taxes the location or claim becomes forfeited after two years have been in default, and after due publication. But such claims so forfeited shall not be open to staking or recording as mining claim unless so declared by order-in-council. In case of dispute the minister retains the right to compromise. The crown retains the right to exempt any property from the tax by agreement.
 A clause provides for a tax at a rate per thousand to be fixed on all gas produced, and another clause provides for remission of one-half the tax on the quantity used in the province. Similar machinery is provided in reference to mines in this provision.
 Any person knowingly making or signing any false statement or furnishing

any false or incorrect information to the bureau of mines or any mining assessor, or keeping or causing to be kept any false or incorrect book or accounts regarding anything done under this act, with intent to deceive, shall, in addition to any other liability, incur a penalty of \$200 for every such offence. Neglect of any person to furnish statement asked for, shall be punishable by a fine of \$20 per mine and double taxation on the mine.

WORTHY OF CONFIDENCE.
 Says Mining Engineer of the Brooks Hudson Silver Co. Properties.
 Through the fiscal firm of Haynes, McLeod & Heron of New Liskeard, 5000 shares of the Brooks Hudson Silver Mining Company are being offered. The authorized capital of this company is half the usual capital of the Northern Ontario silver properties, being only \$500,000. The company have an area of 1000 acres of mineral lands in Hudson, from which assays made show good returns in gold, silver, copper, cobalt and zinc. Jacob M. Eggert, M. E., ends his report on the properties as follows: "I feel certain that what you have will prove to be mining claims of no mean rank and claims worthy of confidence." The stock is par value \$1, but subscriptions for the first offerings are being taken at 75 cents.

ENGINEER LAWRENCE
 Reports Some Good Finds in the Lake George Claim.
 The report of S. Lawrence, the engineer of the Lake George Cobalt Mining Company's two forty-acre claims in Coleman Township, states that ore samples taken from a 40-foot shaft on the south claim assayed 16 ounces of silver to the ton, while lower a strong vein 18 inches wide showed considerable amount.
 In the northern part of the claim true contact and diabase formation for highly mineralized finds. Native silver has been struck at 45 feet deep on the lot cornering southwest on the north claim, and he concludes that at a greater depth a lode of much value will be found in the Lake George property.
 Christian Science Lecture.
 Mr. Bicknell Young, C.S.B. of Chicago, who lectures at Massey Hall on Friday evening, the 22nd, is an eloquent exponent of Christian Science, having given up his business in Chicago to devote his entire time to the lecture field. He is authorized by the Christian Science Church in Boston, and his lecture will deal somewhat with the misconceptions held by many persons as to what Christian Science really is and what it teaches.

THE COMPANY'S EVENING.
 Employees Are Entertained by the Copeland-Chatterton Company.
 Brampton, Feb. 15.—Last night the Copeland-Chatterton Company marked the close of the largest fiscal year in its history with a supper and concert given to the staff of its factory here. The affair was remarkable in that it gave a practical demonstration of the very cordial feeling existing between the employees and the company, represented on this occasion, by Mr. A. E. Chatterton.
 The first part of the evening was devoted to a program of entertainment, in which much excellent talent was unsharped in the factory staff, and this was further assisted by Mr. James Fox of professional fame, and some few members of the Toronto office staff.
 Mr. Chatterton concluded the first half of the performance with an address, sharply timed by an alarm clock at 25 minutes. In his speech there was no line of "shop talk," but just some bright remarks interlarded with many humorous hits, and concluding with a very sincere and hearty voice of appreciation for the services of his employees, and words of encouragement to them to live up to the standard they had adopted in Brampton, both in their work and daily living. Their example was an inspiration to others and a source of pride to him. He promised that the company would assist them in the future as it had in the past. It would also give generous aid to the development of athletic and social clubs connected with the factory. A splendid ovation was tendered Mr. Chatterton on the conclusion of his address.
 Mr. R. M. Copeland made his debut as an entertainer, and found great scope for his natural flow of humor in a short sketch, which a ridiculous costume and make-up made uproariously funny.
 The affair altogether must be interesting to manufacturers generally, as

Liquor and Tobacco Habits
 A. McTAGGART, M.D., C.M., 75 Yonge St., Toronto, Canada.
 Testimonies as to Dr. McTaggart's professional standing and personal integrity see Sir W. R. Meredith, Chief Justice; Hon. G. W. Ross, ex-Premier of Ontario; Hon. J. A. T. D. Victoria College; Rev. Father Teet, President of St. Michael's College, Toronto; Rev. Wm. McLaren, D.D., Bishop of Toronto; Hon. J. A. T. D. Victoria College; Hon. J. A. T. D. Victoria College.
 Dr. McTaggart's vegetable remedies for the liquor and tobacco habits are beautiful, safe, inexpensive home treatments. No deleterious injections, no publicity, no loss of time from business, and a certainty of cure. Consultation or correspondence invited.
