Chicago Markets.

Marshall, Spader & Co. (J. G. Beaty),
King Edward Hotel, reported the following fluctuations on the Chicago Board

Crop news to-day much the same as of late; some reports of existence of Hessian fly and green bugs, but damage slight, so far the market being purely professional.

J. R. Heintz & Co. wired R. B. Holden: Wheat—The local crowd were sellers of the market from the start; and prices eased off to %5c for May. The trade has been light. We do not see anything but scalping market for the present. There was no news to affect prices, except the Argentine shipments, which were a little larger than the trade expected—6,762,000, against 7,176,000 last week and 4,632,000 last year. Modern Miller says condition of growing crop is generally favorable.

Corn—Would be cautious about shorting this corn. We know prices look extremely high, but there is a very strong element behind the May deal, and considerable outstanding short interest.

Oats—Oats have followed corn very closely, selling off a cent or more. It is officially stated that a cargo of Argentine oats is on the way at about 50c, delivered in New York.

Most Other Issues Are Inactive But Steady at Local Mining Exchanges.

World Office, Friday Evening, March 20. Cobalt Central and New Temiskaming were the only active shares at the local mining exchanges to-day. Purchases of Cobalt Central were traced to the party from Chicago now making an inspection of the mine. The more widely distributed securities were absolutely dull and the operations were again in the hands of scalping floor traders. Trethewey is said to be sold by one rather large holder, who needs money, but elsewhere in the market no force is being exercised to liquidate. The talk of a possible strike at the camp again, this spring is against the market, and a present deterrent to some would-be purchasters. Cobalt Central and New Temiskam-

## COBALT NEEDS A LEADER.

All that Cobalt needs to-day is a new market leader and one that Canadians have confidence in. Canadian investors have stood nobly by their investments in Cobalt stocks, and by this is meant in the stocks of shipping mines and

those properties that are gradually becoming shippers. There is nothing to-day that should weaken confidence in Cobalt and its shipping and dividend-paying mines; but the manipulation and uncertainty as to what "Nip" will do, prevents the activity that ought

Take any group of shipping mines—the Silver Queen, Foster and Trethewey-what a triumvirate they would make.

The O'Brien, LaRose and Lawson would make a combination that would command the acreage, the values and the shipping possibilities. The early mistakes regarding overcapitalization could be avoided in any amalgamation of properties, and the control of the mines would remain in Canada. An opening would be created for the permanent investment of English capital that would be of great benefit not only to the camp but to Canada.

Briefly, this is what one of the shrewdest brokers in Toronto said to a World man to-day. Cobalt mine-owners, think it over !
