

for the young are admirably suited to their years. They at once attract the eye, instruct the mind, and regulate the heart. How preferable in every respect to the poisonous trash which amused the youth of former days, and still amuses too many in the present day. From the Catalogue of this Society the friends, guardians, and parents of youth may make a selection with perfect confidence, as none of the publications contain any thing pernicious, while all exhibit something truly good and useful.

#### DEPOSITORY.

The business of this Auxiliary is still carried on, in connexion with the Montreal Auxiliary Bible Society and Canada Sunday School Union, in the same premises as last year.

#### IMPORTATIONS.

The amount of importations during the year have been comparatively small; the Committee being desirous of reducing the stock of Books and Tracts. They have been constrained to do this on account of the heavy debt due to the Parent Society. And, as the Society has but little *capital*, if a large stock is kept it must be at the expense of the Society in London, whose funds should be relieved from every unnecessary burden.

The number of Tracts received into the Depository since last Report, is 12,700; of bound Books and other Publications of the Tract Society, 1,111; Bibles and Testaments, with the Psalms and Paraphrases, 754; making a total of 14,565 Publications. The value of which amounts to £92 1s. 4d. sterling.

#### ISSUES.

For the year the issues from the Depository have been, of bound Books and other Publications, Tracts

excepted  
71,137.
