

PUBLIC OWNED TELEPHONE SYSTEM

MANITOBA WILL BUILD NEW LINES

Chief Ordnance Officer Drowned While Skating at Fallias--Fire at Edmonton.

Winnipeg, Jan. 3.—The legislature of Manitoba convened to-day at three o'clock. The speech from the throne was in part as follows: "The government in the recess has been pressing upon the government of Canada the just claims of Manitoba for an extension of boundaries. A conference has been held at Ottawa, consisting of representatives of Ontario, Saskatchewan and Manitoba, with members of the federal government, but I regret to inform you with no substantial results favorable to our province. Strong protests have been made also as to the methods, delays and costs in selecting swamp lands that properly belong to the province under agreements made between the Dominion and the province in 1885. The results of such protests, however, have not so far been of any effect, and as a consequence we not only suffer direct financial loss, but are losing large blocks of land that probably belong to Manitoba. The recent vote taken on the principle of a public owned system of telephones has been accepted as a declaration of approval, and my government has already taken the necessary steps for the laying of at least 1,000 miles of long distance lines during the coming summer, which is a guarantee of greatly reduced rates for that very important service. A bill for the purpose of amending the public schools act will be submitted for your consideration. The main feature will consist of provisions for the fixing of the Union Jack upon all public school houses in the province." The address in reply was moved by G. Ashdown, of the opposition, by Glen Campbell, of Gilbert Plains.

Major Odevaite Drowned.

Halifax, Jan. 3.—Major Odevaite, chief ordnance officer of the Royal Canadian Regiment, was drowned in Williams lake last evening. He went skating with Capt. French. The latter did not think the ice safe and came home. Major Odevaite skated on the lake. He did not return and his appearance caused a party to be sent out. Towards midnight a hole was found in the ice near the middle of the lake, and by means of an ad spear his body was recovered. Deceased was a native of Ireland, was formerly in the Royal Artillery, and was with the Canadian government taking over the garrison he was made major and chief ordnance officer. He was 55 years old and was married to a Halifax lady. He leaves a wife and child.

Game Protection.

Calgary, Jan. 3.—The Calgary Fish and Game Protection Association had a meeting here this evening to elect officers, etc., in their branch of what will be termed the Alberta Fish and Game Association. Communications from all parts of the province have been received to the effect that they will join this new association. The provincial meeting will be held in January at Calgary, when a provincial association will be formed. Each association will send a delegate and another for every ten members.

Call From Montreal.

Montreal, Jan. 3.—The vestry of St. George's church has offered the vacancy created by the resignation of Bishop Carmichael to Rev. Dr. Patterson Smith, rector of St. Anne, Dublin, canon of the cathedral and professor of pastoral theology at the university.

Cars Damaged.

Montreal, Jan. 3.—Heavy losses and inconveniences have been suffered by the Montreal Street Railway Company during the last two days owing to the condition of the city streets since the thaw. No less than 150 cars were taken to the shops for repair on Monday, and as many more on New Year's day, while other loss was caused by frequent delays from rigs getting stuck on the tracks in the busier parts of the city. Water entered into the motors and damaged them to such an extent that it was necessary to have the cars called in and given a thorough overhauling.

Will Entertain Regiment.

Montreal, Jan. 3.—At a reception given yesterday by the officers of the Sixty-fifth Regiment, Rodolphe Forget, M. P., extended an invitation to the entire regiment to spend a couple of days at his summer residence, St. Irene.

Liberal Elected.

Dalhousie, N. B., Jan. 3.—William Currie, Liberal, in the provincial bye-election, was elected for Restigouche over James Stewart, Conservative, by 127 majority.

To Be Investigated.

Rosthern, Sask., Jan. 3.—Answering a board of trade telegram, Mr. Killam, chairman of the railway commission, wires that an investigation into the railway situation on the Prince Albert branch will be made.

New Buildings.

Edmonton, Jan. 3.—The building permits for the past year in Edmonton totaled \$1,866,096, compared with \$762,224 in 1906. The totals of buildings in the principal cities in Canada show Edmonton to be in fifth place.

Fire at Lethbridge.

Lethbridge, Jan. 3.—The Beeth building, containing several tenements, was badly damaged by fire to-day. It was caused by an overheated stove in Hanover street. The fire brigade succeeded in getting the blaze under control, but not before a considerable amount of damage was done to the contents of the building. Mrs. L. A. Scott, the Lethbridge Electrical Co. agent, W. W. Handford and A. R.

Needful, all of whom carried but little insurance.

Mysterious Disappearance. Toronto, Jan. 3.—A package containing \$2,000 in bills was mysteriously lost at the local office of the Traders Bank. The parcel was dispatched from St. Mary's by express four days ago and was received here, but has since disappeared.

THE BEEF COMMISSION.

Province of British Columbia Said to Be Delaying the Work.

Edmonton, Jan. 3.—The province of British Columbia is delaying the work of the beef commission according to the Alberta government. Everything was in readiness for the work, and British Columbia had appointed a commissioner, who was not in a position to act. When this was learned, another appointment was made, but made irrelevant, and when the gentleman arrived at the meeting which was to have been held in Calgary he was not in a position to proceed. Though pressure has been brought to bear upon the government ever since, no appointment has been made, and for that reason nothing has been done. The province of British Columbia seems indisposed to take any action until after the election, desiring to make enemies of no one. In the meantime the other provinces are waiting.

LIVING IN THE SHADOW OF DEATH

GRAND DUKE MICHAEL AND PREMIER CONDEMNED

Are Among Prominent Personages Who Have Been Sentenced by the Terrorists.

St. Petersburg, Jan. 4.—The general search of the lodgings of persons under police observation was made here during the night in the hope of discovering the accomplices of assassin of Prefect of Police Von Der Lantuitz. Many arrests were made, but no important terrorists were captured. The assassin is still unidentified. The vice-prefect, Sosnovick, is conducting the investigation pending the appointment of a successor to Von Der Lantuitz. The persons condemned to death by the terrorists are reported to include Grand Duke Michael, Premier Stolypin and the Conservative members of the cabinet, who lately received letters of warning.

Newspapers still comment on the inability of the prefect of police to protect his own person against the attack of a single resolute terrorist, who unflinchingly took upon himself the firm determination not to survive his victim, and the papers ask how long a time will ensue before prominent personages are stricken by terrorists bullets.

The press unions in demanding protection against the regime of assassination which is now resorted to by reactionists as well as terrorists. BRIDGES SWEPT AWAY. Utica, N. Y., Jan. 4.—Constant rain falling from yesterday morning to this morning in the Mohawk valley has raised the Mohawk river to flood stage, and exceedingly high water prevails throughout the valley. Trains are delayed because of flood conditions, and it is said all the passenger trains will be from Toronto to this hour late. The water is still rising and more serious delay may be caused. Two highway bridges over the new channel of the river at this city have been carried away, and the village of Deerfield and north of there cannot be reached without making a long journey in order to avoid the high water. The rain has carried away. The rainfall for 29 hours was 5.28 inches, or considerably more than the rainfall of any one day during 1906.

THE ONTARIO BANK.

Toronto, Jan. 4.—The newly elected president of the Ontario Bank and board of directors have repudiated any responsibility for the pamphlet, a copy of which has been forwarded to each shareholder, containing the speech made by the former president, George R. E. Cookburn, at the final meeting of the old board of directors on December 11th. The new board of directors are annoyed at the pamphlet having been issued without first being referred to them, hence the advertisement disowning it.

LORD STRATHCONA ARRIVES.

St. John, N. B., Jan. 4.—Lord Strathcona arrived here this morning and occupied General Manager Neil's car, which carries him to Montreal. He said in reply to a question: "My present visit to Canada is rendered necessary by my personal affairs."

WILL INVESTIGATE.

Ottawa, Jan. 4.—Captain Spain will make a searching inquiry into the loss of the mail train on the 21st.

ARRIVED TOO LATE.

Notice of Commutation of Death Sentence Reached Sheriff After Execution of Negro.

ENDED HIS LIFE.

Mexico City, Jan. 4.—H. McDougall, a widely known railroad man, committed suicide by shooting himself last night. McDougall was especially well known in Toronto.

PREMIER SCOTT'S CONDITION.

Regina, Jan. 4.—Premier Scott was not so well yesterday, his heart being affected. He fell again last night and is still a very sick man.

CAPTAIN DISMISSED.

Ottawa, Jan. 4.—Capt. Pratt, of the government cruiser Curlew, is to be dismissed. This is a result of the inquiry into charges against him.

RUSSIAN POLICE OFFICIAL SLAIN DURING SERVICE IN INSTITUTE CHAPEL

Before He Could Escape Assassination Was Cut Down by an Assistant Officer.

St. Petersburg, Jan. 3.—Major-General Von Der Lantuitz, prefect of police of St. Petersburg, was shot and killed by a young man at the institute experimental the forenoon. Prince Peter Alexandrovitch, Duke of Oldenburg, husband of the Grand Duchess Olga, youngest sister of Emperor Nicholas, was attending the consecration of the institute chapel. During the service there and while standing near several high officials, he was approached from the rear by a young man, who drew a revolver and shot him in the base of the brain. Von Der Lantuitz fell forward and died in two minutes. As the assassin turned to flee one of the officers present drew his sword and cut the man down killing him. The charges against the assassin has not been established.

After dissolution of the Russian parliament powers little short of those of a petty dictator were conferred upon the Prefect of Police Von Der Lantuitz. He issued a long proclamation explaining the government's reasons for dispersing the legislators. The act, he declared, did not signify the suppression of representative institutions, but was intended to give the people an opportunity to choose conscientiously deputies to the new parliament and to cooperate with the government in solving the problems upon which the welfare of the country depended. Last September Von Der Lantuitz refused to legalize the Constitutional Democratic party on the ground that its programme did not clearly show its political views, and he also refused to legalize the October party because of the omission in its proclamation of the address of its headquarters.

Some of his activity may be judged by the figures which he caused to be published on December 28th. Last week he announced that the "flying section of the secret police" had made 188 arrests in St. Petersburg during the three days preceding December 28th. The prisoners who included women, were charged with revolutionary activity and illegal election agitation. It was added that 187 arrests and searches were proceeding vigorously.

The leaders of the revolutionists by an overwhelming majority resolved ceaselessly to pursue their just campaign of removal. The only effective weapon against the iniquitous regime.

On November 23rd last Von Der Lantuitz acting, it was said, upon a hint from higher authority, dispersed a meeting of the Constitutional Democrats in St. Petersburg, which he himself had previously sanctioned.

On November 14th Lantuitz suppressed the Russ because of an article by M. Karavaev, a well known jurist, who attacked what he termed the baseness of all moral conceptions in Russia.

In this article the writer instigated the executions of women prisoners and laid particular stress upon the case of Anna Bendicova, the girl student, who was executed at Kronstadt on October 20th last.

The plot to blow up the building where the court-martial trying the mutiny cases was sitting. At the last moment the woman announced she was pregnant and soon to become a mother, and M. Karavaev quoted from a Russian statute, which postponed the infliction of the death sentence upon a pregnant woman until forty days after the birth of the child, and recalled the clemency which was shown towards the woman who killed Alexander II. in 1881.

Attempted Suicide. St. Petersburg, Jan. 3.—The police have not yet succeeded in identifying the terrorists who shot and killed Major General Von Der Lantuitz, prefect of police of St. Petersburg, and who coolly turned his revolver against himself when he was falling from the hands of the prefect's escort. The authorship of the crime, however, has been traced to the fighting organization of the revolutionists, who have been resolved to resume full terrorist activity. The organization to-night issued the customary proclamation, avowing and justifying the assassination, and a card of admission to the dedication of the church, but it bore no name. The authorities have not been able to learn how he obtained this invitation to the ceremony, which was extremely secret.

Prince Alexandrovitch, Duke of Oldenburg, is a patron of the institute. Among the guests present were his wife, Grand Duchess Olga, youngest sister of Emperor Nicholas, Princess Eugenia Emilianova and a number of other persons prominent in court. That General Von Der Lantuitz was to attend the consecration of the church of the institute, the prefect was accompanied by his usual body guard of secret service men, but not one of them had the slightest suspicion of the murder.

The fall of General Von Der Lantuitz was followed by indescribable confusion. The Duke of Oldenburg seized the assassin's hand after he had fired twice, and succeeding bullets were discharged into the ceiling. But before the duke could disarm him one of the officers who accompanied the prefect, with his sabre struck the assassin a blow on the forehead which completely cut out a piece of his skull. As the man was falling he shot himself in the stomach with

the last bullet in his revolver. His death was instantaneous, but several officers continued to fire until his body lay until the Duke of Oldenburg forced them to desist.

RAISULI HAS BUT FEW FOLLOWERS TRIBESMEN MAKE SUBMISSION TO SULTAN

Bandit Chief is Afraid of Being Captured and Always Carries His Rifle.

New York, Dec. 4.—A dispatch to the Times from Tangier says that Raisuli remains at Zinat and watches the gradual withdrawal of his former friends in impotent rage. He has abandoned all the signs of his position including the flowing robes of a Moorish official and has returned to his mountaineer's costume. He carries his rifle always in his hand and scarcely leaves it out of his sight.

Wednesday night a small band of his followers issued from his stronghold and carried back to their master an influential man of the Faha tribe who resided in a neighboring village. It was probably a case of private revenge or an attempt to show that Raisuli was not only a powerful man, but that the raid had been to increase the energy of the Maghzen and further incite the tribesmen against him.

Practically every tribe in the neighborhood has made submission to the Sultan.

WHARF IN FLAMES. Sulphuric Acid Causes Conflagration and Mixing With Water Generates Great Heat.

Fire of unusual origin, shortly after midnight, seized the department to the foot of Madison street on the waterfront, says the Seattle Times. Two carboys of sulphuric acid had been placed merely on Pier 3 and threatened to set fire to the dock. The prompt discovery and action of Capt. Elliott's fire crew from the fire house adjoining the others was not needed, however, to regulate the acid to pour the acid into the water, instead of vice versa, at no time did the solution without the greatest precaution.

A condition of this nature developed in the heavy glass carboy cracked and the acid poured out. The fire was evidently a leak and some of the free acid was loose in the packing. A heavy rain began to fall a few hours before, and when it reached the acid, heat was generated.

This heat eventually became so great that the heavy glass carboy cracked and the acid poured out. The fire was evidently a leak and some of the free acid was loose in the packing. A heavy rain began to fall a few hours before, and when it reached the acid, heat was generated.

The first water poured on the flames by Capt. Elliott's men was only adding fuel to them, and they were amazed at the fire which followed. The water supply finally weakened the acid and the fire was extinguished.

THE ROOSEVELT. Hull of Arctic Steamer Is in Excellent Condition.

New York, Jan. 4.—Commander Peary's Arctic steamer Roosevelt was hauled on the dry dock at Shedd Island yesterday for the first time since she sailed on her quest for the North Pole. When the vessel was hauled up, it was found to be in excellent condition, but the great cakes of the Arctic sea had broken havoc with her rudder. Every bit of wood work about her propellers had been crushed by the ice. What attracted the most attention, however, was the present jury rudder, the last of three that had been cleverly rigged up by Capt. Bartlett and his crew, and by which the vessel was steered all the way from Labrador to this port. The guy wires of the rudder were in excellent condition, and the most attention, however, was the present jury rudder, the last of three that had been cleverly rigged up by Capt. Bartlett and his crew, and by which the vessel was steered all the way from Labrador to this port. The guy wires of the rudder were in excellent condition, and the most attention, however, was the present jury rudder, the last of three that had been cleverly rigged up by Capt. Bartlett and his crew, and by which the vessel was steered all the way from Labrador to this port.
