### FIRST STAGE OF CATARRH.

#### A Serious Mistake Which Thousands Are Making.

The first stage of catarrh is what is commonly known as "catching cold." It may be in the head, nose, throat or lungs. Its beginning is sometimes so severe as to cause a chill and considerable fever, or it may be so slight as to be hardly noticed. It is a mistake to suppose that it is a trifling matter. If it is not treated at once, it will become a chronic catarrh, and hence it is that nearly one-half of the people have chronic catarrh in some form.

To neglect a cold is to invite chronic catarrh. As soon as you notice the first symptoms of catching cold, be sure to begin the use of Peru-na.

Peru-na is a powerful medicine, and it is a mistake to suppose that it is a trifling matter. It is a serious mistake which thousands are making.

according to directions on the bottle and the cold is sure to pass away without leaving any bad effects. Unless this is done the catarrh is almost sure to end in the second stage of catarrh, which is making so many lives miserable. If Peru-na was taken every day one has a good cough, chronic catarrh will be practically a thing of no account.

Miss Elizabeth Uber, No. 67 Bassett street, Albany, N. Y., writes: "I have always been a sufferer from catarrh because of my extreme liability to catch cold. I have tried many remedies, but none have done me any good. I have taken Peru-na and within two weeks I was completely cured."—Sibyl A. Hadley.

Miss Sara McGahan, No. 137 1/2 street, Albany, N. Y., writes: "A few months ago I suffered with a severe attack of catarrh, which was very painful. My hearing became so bad that I could not hear. I tried many remedies, but none did me any good. I took Peru-na and within two weeks I was perfectly well."—Sara McGahan.

If you do not derive prompt and satisfactory results from the use of Peru-na, write at once to Dr. Hartman, giving full statement of your case, and he will be glad to give you his valuable advice gratis.
