Strike unlikely at de Havilland

No strike action appears imminent at de Havilland Aircraft of Canada plants in Malton and Downsview

The United Auto Workers contract with the firm expired June 22. Although company officials have been negotiating with UAW shop local 112 and office local 673 for over two months, "The real meaty matters will not likely be discussed until well into August' according to a de Havilland spokesman.

Initial discussions always centre around unsolved individual problems and semantics, the meaning of words and phrases to be used in the

negotiations and in the contract itself.

> The plants will shut down for two weeks official vacation, beginning July 22. Negotiations will resume after the return to work August 12. Meanwhile company and union representatives have agreed to an unofficial extension of the old contract

Strike talk among the union employees is in the whispering stage at the present time. But the company spokesman anticipates the vacation will provide a "cooling-off pe-riod" after which negotiations will resume with less pressure on both bar-

gaining teams
