John Adams' Opinion of Washington After dinner one night a visitor stepped into the hall to help Adams put on his coat. Adams thanked him. "Don't mention it," was the solemn toady's reply. "No attention is to great, no trouble is too much that we of this century have the pleasure of taking for the patriots of the Revolu-tion—for George Washington and your-self, sir."—Adams' sharp retort was: "Don't mention Washington to me, sir! Washington was a dolt!"-Sanborn's Reminiscences of Emerson."

What does it profit a woman if she gain the whole world of knowledge and lose her own health? Young women students, and school teachers, erger, ambitious, and full of energy, very often neglect their health in the struggle to gain education. They extinsufficient food, and at irregular hours, they allow irregularity of the womanly functions to be established, and the result is that they become chronic invalids with all their educamen students, and school teacher and the result is that they become chronic invalids with all their education practically worthless. There is a plain road back to health for such as these, marked by the feet of thousands. It is the use of Dr. Pierce's Golden Medical Discovery for discussed of the stomach and digestive and nutritive organs, and Dr. Pierce's Payorite Prescription for discussions. avorite Prescription for diseases of the delicate organs of womanhood. A cure so certainly follows the use of these remedies that out of hudreds of thousands who have tried the treatment, ninety-cight in every hundred have been perfectly and permanently cured. Constipation, with its calamitous consequences, which is a common ailment of students, can be entirely cured by the use of Dr. Pierce's Pleasant Pellets. cure so certainly follows the use of

Montreal's Cathedral. The great landmark in Montreal is the Cathedral of Notre Dame, which, next to the famous cathedral in the City of Mexico, is the largest church building in America and has a seating capacity of 12,000. The church was built in 1829 and is noted for its mag-

nificent chimes, one of the bells of which, called "Le Gros Bourdon," is one of the largest suspended bells in the world and weighs 24,780 pounds.

IN A LAND OF PLENTY

NATURE'S ROYAL SITE FOR AMBITI-OUS CITY OF HAMILTON.

The Birmingham of Canada at Work and at Play-Its Industrial Development Bears Abandant Fruit, While the Language of Sobriety and Truth Describes It as the Cornucopia of Canada.

Nature planned a royal site for the city of Hamilton, towards which so many eyes recently turned during the holding of its highly successful summer carnival. There sits the thriving municipality on the shores of Burlington Bay. In the background tow-Ington Bay. In the background tow-er the heights, commanding a view of the garden of Canada, To the front is the spacious land-locked bay, the head of navigation on Lake On-tario. This city, known to fame as the Birmingham of Canada, then gathered its children under its wing from far and near. It entertained om far and near. It entertained great concourse of visitors. so, moreover, in a way that reflects infinité credit on its natural adaptability to summer sports, and upon the loyalty and public spirit of its

In a Land of Plenty.

Two features are specially characteristic of the City of Hamilton. It is the centre of a district such as a Biblical writer would describe as flowing with milk and honey. To speak of Hamilton is to recall scenes of plenty. The farm produce that seeks a market there is famous for its abundance and quality. The fruit farms that surround the city are overburdened with their luscious crops If Hamilton were described as cornucopia of Canada it would more than the language of sobriety

and truth.

While the cultivation of the land in While the cultivation of the land in the vicinity is carried to this high point of excellence, and the city is a great market for all things harvested by the tiller of the soil, the most striking feasure of Hamilton is its industrial development. Manufacturing takes root there, flourishes, and bears abundant fruits. Hamilton is a great industrial centre. Its factors a great industrial centre. Its fact ies are kept up-to-date and energetic ally operated. Their products com Their products comally operated. Their products com-pete successfully in many markets at home and abroad. Thus, with its ingathering of the harvets, and its output of the factories. Hamilton contributes its share, and a large one ti is, to the nation's prosperity and the nation's wealth. On this strong and enduring foundation is built the city which in sportive mood recently entertained its guests as few cities are able to do.

Mamilton's First Visitors.

If one would trace this stream of city life back to its sources he would pass through many interesting phases of its history and recall many stirring scenes. As a city Hamilton is now fifty-six years of age, which is now fifty-six years of age, which is no slight achievement in this land of newness. But long before the possibility of a metropolitan career dawned upon Hamilton the site was given an historic interest. Here it was that the intrepid La Salle, the explorer of the Mississippi, stood 284 years ago. La Salle and the small band of Frenchmen, who set out from Montreal in July, 1669, when Charles. II, was still enjoying his riotous reign, were the first white men to set foot on the spot where Hamilton now stands. There is a tradition that La Salle landed near the site now occupied by the Grand As a city Hamilton the site now occupied by the Grand Trunk station, and that his camp, at first located near by, was shortly afterwards moved across the bay to Oaklands. Of this, however, there are no records, so that the tradition remains only a tradition. La Salle must have been satisfied with the result of his venture, for he returned forthwith to the East. For a century thereafter no white man saw Burlington Bay, or set foot on its shores.

Robert Land, First Settler.

Among the U. E. Loyalists who found conditions no longer tolerable when the thirteen colonies revolted was Robert Land, a farmer, living in the Delaware Valley. The story of his flight after his home and, as he supposed, his family had been destroyed is full of romance. How he tramped his weary way to British soil and sought to forget his sorrows and wrongs by carving out a home for himself in the dense forest has been many times told. And how his wife and sons, who had escaped, followed him, and were reunited with him, has also been narrated with all fowed him, and were reunited with him, has also been narrated with all the details that are necessary to give life and color to the picture. It is a pleasing story, and so we can af-ford to believe it all. The site of the ford to believe it all. The site of the old Land homestead, at the corner of Leeming and Barton streets, is still well known. The family were the pioneers of the city and of Wentworth County. It is not surprising that they considered their home an earthly paradise, and that soon after they had become comfortably settled many others were attracted to the charming neighborhood.

Very of Development.

The gradual growth of the set the gradual growth of the set the written. The trend of trade was in that direction. For a long time navigation ended at Burlington Buach, and thence freight was hauled by wagon routes to the interior. Then came the Burlington Canal, which was opened in 1832 and carried navigation forward to the present site of the city. At this time Hamilton was without a rival. Immigration flowed in its direction. By the construction of the Desiardins Canal, Dundas was established, and enjoyed a promising shipping business, which was subsequently diverted from it by the Western Railway. When the cite of Hamilton was without a rivy-one foundies, including the first settle. Nearly half a century later, 1940, the city was incorporated with a population of less than seven thousand.

How it has grown and developed

since then is within the recollection of many now living. The conditions that gave the city its first impetus have been modified by the change in the methods of transportation. But the great fertility of the district, the numerous manufacturing enterprises, electrical power and radial railways have amply ensured the prosperity of Hamilton. It is now a very beautiful, as well as a busy city, lacking in none of the improvements that make city life attractive, and enjoying the confidence of all who are joying the confidence of all who are in any way interested in its future.

AN UNKNOWN LAND.

Enewledge of Labrador's Interior May

Selve Problems. While the explorers are trying to reach the poles and to search into the far corners of the earth, there remains a wilderness practically untouched near home, in the heart of Labrador. This country lies along the George River— an unmapped stream rising near the sources of the Hamilton River, and flowing north into Angora Bay. Only one white man, John McLean, of the Hudson's Bay Company. has ever been there. Bay Company, has ever been there. He ascended the George about 60 years ago. He said the ascent of the Gorge River was the hardest years ago. He state the hardest the Gorge River was the hardest task of his life, and describes the Indians as living in absolutely prim-itive conditions. Among other itive conditions. Among other things they kill their old people. McLean tried to establish posts, but these were abandoned.
Since McLean's journey many pe

ple have tried to reach this untouched country, but none have succeeded.

This is the only country where the Indian can be seen untouched by civilization. This whole region is practically unmapped as yet. A knowledge of the geological conditions in terior Labrador will be likely to help greatly in the solution of many problems. There are animals, it is said, of this wild land, too, unknown anywhere else in the globe. For all these reasons Leonidas Hubbard jr.'s, expedition this summer, under jr.'s, expedition this summer, under the auspices of Outing, will be watched with great interest. Mr. Hubbard left Regolette, on the Ham-ilton Inlet. arrly in Inlet. ilton Inlet, early in July. He took a Cree Indian from Rupert's House and one white companion, believing that a small party can live off the country better than a large one, and, for try better than a large one, and, lore-seeing a more harmonious enduring of the privations and dangers of the journey. It is perhaps one of the most sensible and practically important expeditions in some years

Immense Canadian Coal Area.

The people of Canada have no conception of the value of the property the Dominion Coal Company have out there," said Dr. Druc have out there," said Dr. Druce Riordan of Toronto, whe has just returned from a trip to Sydney, Cape Breton. "The area of coal land extends for a distance of forty-five miles from Sydney to Louisburg. Five collieries are now working, raising 11,000 tons of coal a day. The general sales agent, Mr. Diek, told me they could easily sall for titled. me they could easily sell four times the quantity of coal they are now raising. They cannot keep up with their orders. The coal area owned their orders. The coal area owned by the company is so extensive that other shafts and collieries can be put in to meet any future demand. The amount of coal is conceded by examount of coal is conceded by ex-perts to be so enormous that in 100

perts to be so enormous that in 100 years, even if the output is ten times what it is now, the supply will not be exhausted. Excellent, up-to-date machinery is in use, and the way they handle the product is perfect, while their shipping facilities are most modern."

Dr. Riordan said that the miners are principally Nova Scotians, born in the country. There is no foreign clement there. Dr. Kendall, who represents Sydney in the Dominion Parliament, told him that many of the miners have savings bank acthe miners have savings bank accounts from \$2,000 to \$5,000 each. Many of the miners make \$160 a month. The two Sydneys, as they are called in Cape Breton, show every existence of the month. ery evidence of prosperity

assemble the products which g make steel and iron cheaper than any other place in the world.

Ontario Christian Endeavorers The 1903 Convention of the Ontaro Christian Endeavor Union will asio Christian Endeavor Union will assemble in Stratford, the Classic city, on Tuesday, Wednesday and Thursday, Sept. 29, 30 and Oct. 1. The convention of 1900 was held in Guelph and not since that time has the convention been held in Western Ontario and a great deal of interest is centered with this meeting. Father Endeavorer Clark, the man that Canada gave to Christian Endeavor, is expected to be present, as is also the new general secretary, Von Ogden Vogt, and these men coming as they do direct from the firing line and with new enthusiasm gained at the do direct from the firing line and with new enthusiasm gained at the great Denver International, the convention promises to be very inspiring and helpful to all who may attend. Reduced rates have been secured on the convention plan and tickets will be good to go on Sept. 25th and return Oct. 5th, and if 300 or more attend (which is more than likely) the rates will be single fare for the round trip from all Ontario points to Stratford.

WEED REMEDIES. How to Use Wayside Growths to Cure

Many of the plants that are popu larly known to-day as "just common weeds" were treasured by the ancients, and even so recently as "grand-mother's day," for their medicinal properties, says a Canadian herbalist In fact, our grandparents believed implicitly that in every locality might be found the last that the last the implicitly that in every locality might be found the plants that would prove effective for the diseases of that country. The people of to-day are slowly awakening to a realization of the value of these inexpensive home remedies, many of which are sold by druggists under a different name.

There is a frequent demand for remedy for catarrh in the head. Much relief may be obtained by using a nasal douche, twice a day, of warm water with a little salt and swee milk added. Afterward snuff pure olive oil into the nostrils. The douche cleanses and the olive off heals, which may prove effective in some cases, but a "weed remedy" has proved more effective. A bad case of catarrn nas been cured by smoking mullein leaves. The smoke must be forced through the nostrils; it has a tendency to heal and dry those passages leading to the lungs. Mullein is a plant that grows wild in many states and resembles tobacco leaf in color, shape growth.

best of salve can be made from the mullein blossoms. blossoms are gathered and put into a bottle and hung in the sun they will in time become oil, which is very healing. They may be fried in fresh butter and the liquid strained into

boxes ready for use when cold.

"May butter is best to use for salves," said an elderly lady. No doubt some readers may think this is superstition, but after much thought will agree with her. In May pastures are generally of clover pastures are generally of clover dandelion, etc., and these are said contain excellent medical proper ties. Clover tea and salve made from the clover blossoms is said to be an effective cancer cure.

Old Hay Best for Horses.

A correspondent puts the oft-repeated query, "Why is it that all
veterinarians advise the feeding of
old hay in preference to new, and
trainers of race horses and fitters of
high-class carriage horses invariably
use old hay till they are forced to
use the new?" This question has
been answered many times, but apparently there are always many men
who desire to have the reply made
all over again. Old hay is preferable for the reason that it has entirely passed through the process of
sweating or fermentation. This rendsweating or fermentation. it much less liable to cause digestive disorders in the equine sub-ject. Again, many different sorts of insects lay their eggs on the stems of the grasses which enter into the of the grasses which enter into the composition of hay. These remain on the stems when the grass is cut down and the process of curing does not destroy their vitality. Hence when new hay is fed, these eggs, replete with life, are taken into the horse's stomach and there hatch out, causing much trouble. Then, in all new hay there is much more water than in old hay and as the results. new hay there is much more water than in old hay, and as the nourishment comes from the dry matter, a lesser quantity of the old hay does the same work of nutrition, and the old is, for that additional reason, to be preferred. Those are the main reasons for the preference of all good horsemen for old hay.—Chicago Drov-ers' Journal.

Lifetuoy Soap—disinfectant—is strongly ecommended by the medical profession as a safeguard against infectious diseases.

There are two things in which we should thoroughly train ourselves — to be slow in taking offence and slower in givin git.

THE LATEST AND BEST

MODES OF THE MOMENT.

ome Smart Black and White Effects,

The Short Skirt.

Many women look their smartest in black, which is of course always useful, but navy blue runs it very close in popularity. A charming blue alpaca skirt seen recently was made with five flounces, just clearing the ground, with a smart little bolero fastening into the waist by a broad satin band. This decorated with black applique, and the

d a collar of Irish crochet sleeves were loose and open. This was ed with a spotted black and white foulard and was worn with a foulard

blouse and a toreador toque of black straw trimmed with a black and white

The short skirt with box plaits is practical and becoming. The plaits look their best coming from a small shaped hip piece, which keeps the hips plain while the fullness is allowed to spring out around the feet.

Deep purple hats are smart with linen costumes, and especially so when worn with purple petticoat and stockings and a purple sunshade.

Very full elbow sleeves are seen on lace evening dresses. The illustration shows a gown of silk mull having a fichu effect and a large chiffon rosette. JUDIC CHOLLET.

WHAT IS WORN.

Smart Wraps Both In White and Colors-Walking Skirts. A smart evening dress seen recently was of rose pink taffeta cut princess with a high sash belt of point d'alen con, which lace also fell in points on the low decolletage. The sleeve cor sisted of a tiny puff at the top of rose chiffon. This chiffon also formed innumerable frills right up the trained

skirt to the knees.

The popularity of the sack coat nev. wanes. There is no more becoming garment for mountain wear, and in fact for outing wear generally.

Many walking skirts are made in checks and plaids, and most of these have a little short bolero to match.

Red and white and green and gray are considered the smartest, but of course they can only be worn by women with elight figures.

Skirts are more gauged than ever, and the smarter ones are cut all in one piece with a fullness around the feet sometimes measuring ten yards. They are pretty in musius and other supple

The white wrap is a very modish thing and ranges from the little sack coat to the elaborate half length sack of white lace on a foundation of white

of white lace on a foundation of white satin or taffeta.

A beautiful evening gown is of yellow chiffon over yellow satin, the chiffon, embroidered with gold pallettes, running in long lines from walst to hem. Pale pink resea and clusters of forgetmenots are worked on the skirt in satin ribbon embroidery, and on the low bodies there are little hanging garlands of ribbon forgetmenots. A large black hat, with a white ostrich feather under the brim, is worn with this lovely frock.

this lovely frock. The cut shows a smart automobile coat of deep red.
