THE FARMER'S ADVOCATE.

A Valuable Suggestion on every page the latest CANADA CEMENT CONCRE FOR PERMANENCE

Get this Book about Concrete-It is absolutely Free to any Farmer

OU can increase your farm profits by knowing

something of Concrete. And this book of ours —"What the Farmer can do with Concrete" contains all the vital information about Concrete for farm use. Yet it's free-we are glad to send it free because, every copy that is read by a farmer results in the use of more of our product, "Canada Cement," the important ingredient of successful concrete mixtures

With the aid of this book any farmer can readily learn the methods that will produce good Concrete; by its simple directions he can build, or have built, such sanitary helps and money-making improvements as water troughs, culverts, foundations, feeding floors and manure pits.

DRESS

Every Farm Needs a Concrete Manure Pit "Over two hundred millions of dollars" is the estimate placed by the Canadian Government on the annual loss in this country in manure waste from exposure and poor handling. A waste that could be saved if every farm had a concrete pit for keeping manure, similar to the one pictured above. Three hundred dollars a year loss from manure waste is a conservative estimate for the average farm. To avoid this loss-to conserve the liquid manure, you must keep this valuable fertilizer in Concrete.

Full directions for building a pit of Concrete are given in our book. The work can be easily done with any labor available—and such a pit will pay for itself, in fertilizer saved, within one season.

Get the book now-Build your pit before another season goes by.

Ask for Canada Portland Cement, the uniformly reliable brand. It can be secured from more than 2,000 dealers throughout Canada. If your dealer cannot supply you, write our nearest Sales Office.

Get Clean Milk

In winter, when the cows are stabled and it is hard to keep the udders clean, clip the flanks and udders every few weeks—a few minutes will do it if you use a Scewart No. 1 Machine—then the parts can be wiped in a jiffy and the milk will be clean and free irom dirt. Clip horses also. Get one from your dealer, or write direct to us. CHICAGO FLEXIBLE SHAFT CO. Dept. A 161, 12th St. and Central Avenue, Chicago, III.
