High - class  
Piano

# The Bell Piano

Canada's  
Largest  
Makers

**Popular in Educational Institutions and With Musicians Generally.**  
It is the only **Piano**, with the **Illimitable Quick Repeating Action**, securing to the pianist a responsiveness in touch and facilities for execution unequalled by the ordinary action.

The Bell Piano

*Autonola*

will interest every one, whether musician or not. It is a high-grade **Bell Piano**, fitted with an interior player mechanism, which, with the aid of a perforated music sheet and operation of foot pumpers and time-regulating levers, produces with accuracy the most difficult musical composition. Can also be played as an ordinary piano.

*Autonola*

(ENGLAND).

## OVER 10,000 FARMERS HAVE SOLD, EXCHANGED OR THROWN ASIDE OTHER SEPARATORS FOR THE "MELOTTE." WHY?

Because they find the "MELOTTE" skims cleanest, turns easiest, lasts longest, and is therefore the best, the cheapest, most economical and efficient hand separator made.

### The "Melotte" Cream Separator

will pay for itself in the first year by increased yield of butter and cream alone. It gives one pound of butter extra per week from each cow. Then why lose this increased profit? We will send you the "MELOTTE" on one week's free trial. Why not become convinced that the "MELOTTE" will make more money than any other separator in the world? We will gladly send you all the information you need, but the final and only test is to try it for one week at our expense. Write to-day and become acquainted with the separator that pays for itself in one year; that costs 75% less for repairs, renewals and oils; that takes one-third less power to turn than any other, and which won't wear out.
