THE Frost & Wood Company Limited

For over half a century we have been manufacturing plows. We have long since passed the stage when the building of plows was an experiment, but having profited by those years of experience, we are now building a complete and successful line of plows for use in all kinds and conditions of land. Once we sell a customer a plow he is always our friend—that is the best recommendation we can give you.

F. & W. COMBINATION PLOW EQUIPPED AS A PRAIRIE BREAKER.

The MOULDBOARDS on all our Plows are soft-centre crucible steel—a material specially manufactured for the purpose. The HANDLES on all F. & W. Plows are fitted by hand, and carefully adjusted before leaving the factory. The CLEVISSES and JAWS on all F. & W. Plows are of malleable iron. The clevis can be promptly adjusted to act either as a stiff or swinging clevis. Send for our Catalogue "F" and get acquainted with our line.
