Bathing.
Pomatums & Hair Preparations Combs and DESTORES the Stamine of ill-conditioned Horses to Cows, Bullocks, Calves, Sheep and Pigs.

It causes no extra Expense, as it convains far more and better nourishment than its cost of i 1-4 per feed sup pikes in oorn or hay, hence it ensures an actual saving in the keep. But its principal advantages are a great improvement in the digestive functions, the Stamia and general condition of Horses, enabling them to perform far more labour without getting distressed; it imparence vigour to sick, debilitated, or old, apparently worn out Horses, and it puts rapidly the finest flesh on cattle generally, as it enables them to extract the entire nour ishment out of everyhing they feed. In a short time it improves the appearance and value of horses and cattle to 20 to 30 per cent.

is a constitutional disease, a corruption of the blood, by which this fluid becomes vitiated, weak, and poor. Being in the circulation, it pervades the whole body, and may burst out in disease on any

whole body, and may burst out in disease on any part of it. No organ is free from its attacks, nor is there one which it may not destroy. The scrofulous taint is variously caused by mercurial disease, low living, disordered or unhealthy food, impure air, filth and filthy habits, the depressing vices, and, above all, by the venercal infection. Whatever be its origin, it is hereditary in the constitution, descending "from parents to children unto the third and fourth generation;" indeed, it seems to be the rod of Him who says, "I will visit the iniquities of the fathers upon their children."

Its effects commence by deposition from the blood of corrupt or ulcerous matter, which, in the lungs, liver, and internal organs, is termed tubercles; in the glands, swellings; and on the surface, lungs, liver, and internal organs, is termed tuber-cles; in the glands, swellings; and on the surface, eruptions or sores. This foul corruption, which genders in the blood, depresses the energies of life, so that scrofulous constitutions not only suffer from scrofulous complaints, but they have far less power to withstand the attacks of other diseases; consequently, vast numbers perish by disorders which, although not scrofulous in their nature, are still rendered fatal by this taint in the system. Most of the consumption which decimates the human family has its origin directly in this scrofulous contamination; and many destructive diseases of the liver, kidneys, brain, and, indeed, of all the organs, arise

from or are aggravated by the same cause.

One quarter of all our people are scrofulous their persons are invaded by this lurking infection, and their health is undermined by it. To cleanse it from the system we must renevate the blood by an alterative medicine, and invigorate it by healthy food and exercise. Such a medicine we

the most effectual remedy which the medical skill of our times can devise for this every where preof our times can devise for this every where prevailing and fatal malady. It is combined from the most active remedials that have been discovered for the expurgation of this foul disorder from the blood, and the rescue of the system from its destructive consequences. Hence it should be employed for the cure of not only scrofula, but also those other affections which arise from it, such as Expurry and Syx Dispage Sx Avenove Fine Rase. and Skin Diseases, St. Anthony's Fire, Rose, OF ERYSIPELAS, PIMPLES, PUSTULES, BLOTCHES, BLAINS and Boils, Tumors, Tetter and Salt BLANS and Bolls, JUNDES, TELES and BOLLS, RHEUMATISM, SYPHILITIC and MERCURIAL DISEASES, DROPSY, DYSPERSIA, DEBILITY, and, indeed, ALL COMPLAINTS ARISING FROM VITIATED OR IMPURE BLOOD. The popular belief in "impurity of the blood" is founded in truth, for scrofula is a degeneration of the blood. The particular purpose and virtue of this Sarsaparilla is to purify and regenerate this vital fluid, without which sound health is impossible in con-

vanced stages of the disease. So wide is the field of its usefulness and so numerous are the cases of its cures, that almost every section of country abounds in persons publicly known, who have been restored from alarming and even desperate diseases of the lungs by its use. When once tried, its eases of the lungs by its use. When once tried, its superiority over every other medicine of its kind is too apparent to escape observation, and where its virtues are known, the public no longer hesitate what antidote to employ for the distressing and dangerous affections of the pulmonary organs that are incident to our climate. While many inferior remedies thrust upon the community have failed and been discarded, this has gained friends by every trial, conferred benefits on the afflicted they can never forget, and produced cures too numerous and too remarkable to be forgotten.
