T. G. SHAUGHNESSY'S VISIT

HE IS PLEASED WITH THE PRO-GRESS THE COUNTRY ISMAKING.

vide Facilities for Iv.

Mr. A. W. Ross of Columbia is in the city. He visited the Boundary country and went to the end of the track at Midway as one of the party which accompanied President Shaughnessy of the (P. R. On the return trip from Midway the party visited the site where the The lowest rate hitherto in voque ha pyritic smelter is now being built by been the \$4.50 one in force on certain Messis. Laidlaw & Co. After this the classes of ores at the Northport smelter. rarty visited the smelter being erected by Paul Johnson of Greenwood. Mr. the mining interests and cannot tail to Johnson took the party all through the have a beneficial effect. Good news conworks and fully explained his plans.

Then the party left for the Granby smelter, arriving there at 1 p. m. on the 30th to pour in, and the outlook could not be instant. Mr. J. P. Graves the manager. instant. Mr. J. P. Graves, the manager, much brighter. The year 1900, which Mr. Hodges, the superintendent, and Mr. started in so gloomity and so full of troubles. Fummertelt, the assistant manager, took the party over the buildings and works the party over the buildings and works. during the past few months, and the President Shaughnessy was delighted at year will go out with everything in a the manner in which the works were prosperous condition. The sales by days

ranning and the apparent success of the smelter. The management of the smelter complained of the want of sufficient coke in order to start the second furnace and c run the same without intermission. The president and the other officials of P. R. present assured Mr. Graves that the required coke would be torththat next week the second furnace will will be treated by the Granby smelter. The major portion of the ore will be the Knob Hill and Old Irionsides. Mr. Shaughnessy expressed himself as being more than satisfied with the results of the development of the mining interests in the country during the past year, and stated that not one of the spurs that the company had built to the mines and the mining camps had proved useless; the result of which will be that the company's policy in the tuture will be to aid rapidly as they show productiveness.

Mr. Shaughnessy announced that the railroad's policy would be liberal, both the interests of the smelters and that his visit an order has been given for the construction of the most modern best equipped of cars of a number sufficient to meet the current and grow-ing requirements of the shipping mines. The president stated that since his visit of last year he found consider improvement in the mining industry of the province, and he has great faith in its future. He thought the mining industry had got over the center and from now on it would go ahead rapidly. In short, Mr. Shaughnessy thinks the progress of the mines of this section from now on will be rapid, and he feels certain that there will be a great increase in the output of ore during the coming year. This will increase the number of workers and the population. Under the circumstances there is cer-tain to be a largely augmented business for the railroad, and he is determined to provide all the necessary facilities for handling it expeditiously and

THE MACCABEES.

The proceedings began by the exhibition of a huge snowball, represented by cotton wool, and filled with all kinds of toys and small matters of a more useful description. These were sold successure, the eagerness of the buyers quickly melting the bulk of the snowball. Then followed a pretty Maccaucan drill, which was gone through by ladies in tri-colored sashes worn knotted under the arm, the dress itself being white. The evolution of the ladies provoked much admiration, of the ladies proviked much admiration, though some military critics present (but they were men) pretended that they could do better. After this the ladies invented a new game on their guests, about 200 of whom had by this time assembled. A Rocky mountain canner hird had been smuored over the canary bird had been smuggled over the border in sections, and the game was to fit the sections together when bindfold-ed. Those who knew most of the nature of the songster came out away ahead, while those who knew least got the booby prize, so that the competitors in

the novel play were fixed anyway.

After this the social devoted itself to odd games around the room, breaking up into little knots and coteries, and had a good time. There was loss of tun, and everybody was sorry when the pleas and everybody was sorry when the pleasant social came to an end.

IT IS THE LOWEST YET.

A Freight and Treatment Rate of \$4 Offered at Greenwod.

Mr. Paul Johnson, of the smelter at Greenwood has offered to make a con tract with the Winnipeg mine for a freight and treatment rate of \$4 per ton the contract to commence on December It is understood that similar offers have been made to other mine owner by Mr. Johnson. This is said to be \$1.50 per ton less than what the Winniper has been paying to the Granby smelter at Grand Forks for transporting and treating its ore. It will enable the min ing and treating of all ores than run \$8

Mr. Johnson is putting up a smelter which is supplied with all the modern improvements and is well verseod in tthe reduction of ore and he says that he can make money on a \$4 rate.

Giant 1,000 at 3 1-8, 5,000 at 3 1-8, 5,000 at 3 1-4, 500 at 3 1-4, 500 at 3 1-4, 500 at 3 1-67: Rambler-Cariboo, 500 at 25 1-4, 2,000 at 24 3-4; White Bear 2,500 at 2 1-2.

THE STOCK MARKET.

The Sales for the Wes.: Aggregated 158,500 Shares.

The stock market has been steady du ing the week which ended last evening as is shown by the fact that 158,500 shares were disposed of outright and 30, 000 shares on 60 and 30 days calls. The latter dealings were all in Giant stock, which continues to hold the middle of the stage in this market. White Bear is being largely dealt in the Calls Giant, 60 d plus 1-2 cent down. Calls-Giant, 60 days, 5,000 at 3 1-2, is being largely dealt in, too. The announcment made in this issue that Mr. Paul Johnson, the manager of the Grand Forks smelter, has offered a freight and treatment rate of \$4 to the Winnipeg at 73-4; Rambler-Cariboo, 500 at 25, 1,000 and other mines in the Boundary cou try is important, because it is the lowest rate that has yet been offered and means increased profits for the mine operators. This rate may be regarded as another distinct forward step on the part of for the week ending yesterday were as

ows:	A TO SHEET AND A S
Thursday	22,500

Saturday	35,000
Monday	11,000
Tuesday	40,000
Wednesday	30,000
	158,000

Against 164,900 for the previous week. Giant sold to the extent of 66,500 shares on the board during the week. In addition to this about 30,000 shares were sold on options. The price at the commencement of the week ranged from 31-8 to 31-2 cents, and yesterday it was from 31-4 to 31-2 cents. From this it will be seen that the lowest price yes terday was one-eighth of a cent higher than the lowest price of Thursday last, while the highest price was the same.

the development of mining properties as p.500 shares during the week. The price rapidly as they show productiveness on Thursday last was 81-4 cents and on Tuesday it sold for 13-4 cents. There were no sales yesterday of this stock. Tamarac sold to the extent of 1,500 shares during the week, and the price was 51-2 cents. The company has let a contract for the erection of a tramway and in three months will commence ship-

during the week, and the price was 14 cents. The work of developing this property continues along the usual lines, and a car of high grade ore is sent to smelter about every 10 days.

tre Star, and the price is \$1.67.
White Bear sold largely, and 55,000
were disposed of on the board, and it is said that an equal number were disposed of off the board. Toronto, too, has pur-chased freely of the stock. The price on Friday last was 2 1-2 cents, and yester-day it had risen to 3 1-2 cents. The rea-son for this is said to be because the insiders are purchasing. The management is of the opinion that the Good Bear vein runs into the White 3: ground and explorations at depth are o be com-

The lady Maccabees gave one of their delightiul socials yesterday evening in the lower hall of the Miners' Union, It was in every way an unqualified success.

The proceedings began by the exhibition level, and the work of development is

being pushed.

A broker reports that there is some in-

yesterday of the Rossland Mining and work when the small expense is consid-
