interred in the Roman Catholic

the late Mrs Chick had some difficulty
in getting through to Plum Hollow,
but the people all along the way
showed the greatest kindness and fore-
thought possible by turning out and
breaking the roads, thus making it pos-
sible for the relatives to get through
in time to perform their last sad mis-
sion.Miss Olive Johnson of Jasper is

the order of the day, but the condition

THERE'S no mistaking the expression of a man whose farm is well "improved." He looks as prosperous as he feels.

It isn't the size of a place that counts most, nor its actual dollars-and-cents value. It's rather that "well-kept," thrifty appearance; the appearance that makes you think of fat stock, and well-filled barns, and comfortable, contented living.

Neat, permanent improvements go further in giving a farm this appearance than any other feature.

Concrete Is The Ideal Material

for such improvements. It is neat, harmonizing with its surroundings in the country. Everlasting, it cannot be injured by fire, frost, wind or lightning. Age—instead of causing it to decay—actually makes it stronger.

Concrete never needs repair—first cost is last cost. New improvements can be added year after year with less expense than would be required to keep wooden structures in repair.

Concrete walks, feeding floors, dairy-barns, ice-houses, root-cellars, well-curbings, fence posts, silos—which of these does your farm need most? Whatever you want to build, it's best to build it of concrete.

Do you want to know more about this subject of permanent farm improvements? Then write for your copy of

"What The Farmer Can Do With Concrete."

It's a book of 160 pages, telling how other farmers have used the "handy material" to good advantage. Published to sell at 50c. a copy, it is now being offered free to all farmers who write for it. Address
