N. CARR & CO., Ltd. Hamilton, Ont

> The first in There is a difference of opinion in respect to the proper age and size of trees for planting, but it has been proved that a tree which is 1 year old at planting will, as a rule, come into bearing at about the same time older trees do. But, for different reasons, many orchardists prefer larger and older trees. ary methods is al is not a last ex : 18, 19). The Christ, and he Younger trees cost less originally, and, on account of the smaller root system, there is less labor in planting. Besides, they transplant much

ch to present a mai agencies industrial train rs of the gospe ower of God un

Where a number of trees are to b purchased it is good economy to visit the nursery and make a personal selection. When this cannot be done, it should be specified with the order that only first-class stock be sent, with the privilege of rejecting any poor stock. By purchasing directly from the nursery, the agent's commis-sion is saved, and better stock obtain-ed, and there is less trouble in setkroy Road ed, and there is less trouble in settling any differences.

Early orders secure the pick of the stock. The kind of stock desired, the number of branches, height of head, etc., should be stated definitely. It should also be stated in the order that substitutes will be accepted. When this is not mentioned, the nure recommend feels of the state dar. HAVE ACRE ORCHARD ON EVERY

16). The world-crisis existing and impending, is unique in opportunity, No matter Last branch with the decadence of long-established systems of religious faith creates un-paralleled possibilities in all fields, which will not linger. The under-lying principles of missionary enterthe farmer specializes in he should have an orchard, even if it should be only a small one. An acre orchard would give all the fruit a namily could consume. By having all the fruit one car utiline, the cost fruit one sat utilize, the cost of living can be sept down considerably. As a rule, the location of the orchard is limited, as it is wanted close to the abouse. But where there is choice of location, the soil should have first consideration. There is no definite soil that will tit all fruit equally well. From do best in heavy clay loans or cors: apples in cury II. Aims, methods and results. The aim of Christian missions is first to evangelize to spread the knowledge of the great transforming truths of Christianity. This is a means, not the end. The great design of gospel preaching is unchanged and unchanging. It remains the "power of God unto salvation." Social and civilizing agencies and intellectual development have their place, but must clay loams or coss; apples in ciay loams or gravely loam; che.ries, in gravely loam, rich prums lo well ob a variety of soils. The larges, variety of fruit howeve, do best on clay company loams of the company of the

gravelly 'oams. The kine of sussell 's next impor-tant, tuless the surface soi' is five or six feet deep. A surso; that will not let water through is not suitable, as it prevents deep rooting and brings the water table very close to the surface. On the other hand, a sandy or coarse gravel subsolvail leache moisture pess through too quickly and will be anti-wor le to the trees in dry seasons. A majous limestone subsoil is not, as it and so the roots to work deep, and it is also be eved that the limestone aids in the tion of highly-colored fruit. tion of highly-colored fruit.

The orchard should never be plant ed on a low piece of ground. When jure the trees on the low land, walk those higher up escape unharmed. Cold air has a tendency to sink and warm air to rise because of diffe ance in weight. This causes the frosts on

the low gound. The exposure, or the general direction of the slope of the site is another important consideration. On land that is rolling it is impossible for all the land to slope in the same direc-tion, but if the orchara is located near a lake or other body of watc. the exposure should be toward the water. In case of a region o. high winds the orchard should be away from the prevailing winds. A nonthern exposure retards the growth in the spring, resulting in less injury to the blossoms from late spring frosts. Large bodies of rater, warming slowly, retard the growth.

SUMMER SANDWICHES.

The most delicious of all the summer sandwiches can be made right from the garden. Nothing makes a more acceptable lunch for a summer day than a vegetable sandwich, with a crisp, cool filing and a bit of mayonnaise and a giase of iced tea. Cut smaller in fancy shapes this is an ideal menu for the porch tea also. Lettuce sandwiches have for a long time been favorites. To make them, pick the lettuce the might before, wash thoroughly and put in a cheese-cloth bag on the ice. When ready to use it will be very crisp. Vegetable sandwiches are always better made just before using, as the dressing softens them. If this be out of the question, they may be opened and the mayonnaise or cooked dressing spread on them.

the question, they may be opened and the mayonnaise or cooked dressing spread on them.

Another good sandwich is made from ripe tomatoes simply sprinkied with a bit of sait. The tomatoes are cut very thin, and either brown or white bread is used. A particularly dainty and delicious sandwich for a refreshment sandwich is made from cucumbers. Try to pick them all about the same size. Peel and crisp on the ice. Cut small circles of bread, a little larger than the slices and put one slice between, covered with a bit of mayonnaise.

If a more substantial sandwich desired, a supper sandwich for ample, malie a potato salad chopped chives, cut large all brown bread, spread with belettuce leaf on each alice are the salad.

made by meahing berries; goosebe
ries and currants should be cook
a bit, sweetening them and spres ing between slices of white bread when cool. Unusual sandwiches for a garder

Unusual sandwiches for a gardem party can be made by picking nasturium, clover or rose blossoms and packing them above both the bread and butter to be used in an air tight tin box the night before. Wrap the butter in a cloth. When the sandwiches are made they will have the flavor and odor of the flowers used. Serve on sandwich plates garnished with the flowers.

Original "Gag Bule."

"Gag rule" was a phrase applied to a resolution passed by congress in May. 1836, that three-fourths of all petitions, memorials, resolutions, propositions or paptr₃ relating in any way to the subject of slavery or the abolition of slavery should lie on the table without being printed or referred. The rule was abolished a few years later.

Little Things Cause Sunshine.

The sunshine of life is made up of very little beams that are bright the time. To give up something giving up will prevent unhan to yield, when persisting will and fret others; to go a litt rather than come against a keep the agricultural in plements from rusting: Melt together lard and powtake an ill look or a cross ly, rather than resent or se are the ways in which three parts of the former, and if it is and storms are kept off. and ant and steady sunshine secu

the iron or teel with a brush.

The heifer calves from the better cows should be saved. To "cash in" a good heifer cal "re veal when she a good helter (2) 17% veal when she might readily replace a poor cow, is an economic crime. While feed is required to rear a calf well, such expenditure is justified if the selection is based on records. One calf in five should be reared to maintain the size Jennie was asked why she did no go next door any more to play with her little chum. She replied: ispositions didn't match, so banded our acquaintance."

Be Kind Always.

One great trouble with unkind thoughts is that it is so very difficult to keep them only thoughts; sooner or later they find utterance. We may fancy that we are keeping our un-charitable opinions to ourselves, but they are almost certain to express themselves in look or tone, if not in word. The only way to be really kind is to be kind clear through.—Exchange.
