Does it not seem more effective to breathe directly to cure disease of the breathing organs, than to take the remedy into the stomach?

Vapo-Cresolene

Established 1877.
Cures Whooping Cough, Croup, Catarrh, Colds, Grippe and Hay Fever.
It cures because the air rendered strongly antiseptic is carried over the diseased surface with every breath, giving prolonged and constant treatment. It is invaluable to mothers with small children.
Is a boon to asthmatics.

BRAIN AND INTELLECT.

The Exact Seat in the Former of the Highest Intellect.

The exact seat in the brain of the highest intellectual faculties has formed a moot point in science since the functions of the organ of mind began to be investigated with accuracy. The general consensus of opinion localizes what we term "mind" in the prefrontal lobes of the brain, but by another school of thinkers the hinder lobes have been credited with performing our highest cerebral duties. The balance of evidence, I should say, is decidedly in favor of the former view and recent researches and observations by Dr. Phelps, an American investigator, would appear to assist in strengthening the opinion that the most important portion of the brain is its anterior region. In the course of the investigations in question some 295 cases of brain injury and disease were examined. In all save two it was noted that interference of extensive nature with the prefrontal region resulted in serious disturbance of the mental faculties. Less severe injury produced less marked effects. These facts parallel the researches of other investigators, and they are further substantiated by what is observed in cases of idiocy connected with a want of development of the frontal lobes of the brain.

As to the relative importance of the two lobes or halves of the cerebrum, or chief brain mass, most of us know that each half governs the opposite side of the body, and that, as we are right-handed, so we may be called left-brained. The superiority in functional importance of our left brain is not questioned, and it is therefore interesting to find Dr. Phelps insisting, from the results of his investigations, that our left brain lobe is really the intellectual brain. The right half, it is added, is capable of sustaining severe injury without marked mental effects supervening, and cases are quoted in support of this fact. Indeed, such cases have frequently puzzled physiologists, seeing that the disturbance of the intellect has in no sense been commensurate with the injury to the brain. On the notion of the greater importance of our left brain and on the theory that severe injury which does not produce actual mental breakdown really involve the right lobe, the puzzling constitution of the brain may be explained in part at least. But the last word has not been said concerning the brain's "ways and work." Inquiries of the left half do not always produce serious effects as regards the mental life, while we have had some physiologists insisting that we have really two brains, and that while the left lobe is the Jekyll of the intellect the right, on occasion at least, is apt to play the part of Hyde. A fascinating theory this, but one which, unless substantiated, is not likely to appeal to its inquirer. London Chronicle.

Rebuilt by Sir Christopher Wren.
Work has been commenced in connection with the demolition of the old church of St. George, Botolph, near the Monument, London, which has been closed for over eleven years. The church, which was one of those rebuilt by Sir Christopher Wren after the Great Fire, is only fifty feet long, thirty-six feet wide, and thirty-six feet high, flat-roofed, and with a steeple at the northwest corner eighty-four feet high. The parish is in accord with the church, for its area is only five hundred yards by two hundred yards. The parishioners, in 1896 numbered thirty-four. The first rector after the rebuilding was the famous Dr. Shortcock, who raised the ferment against the non-jurors so graphically described by Macaulay, and who in 1691 became Dean of St. Paul's under Tillotson's primacy. The only tablet of any historical interest in the church is that to the famous Alderman William Beckford, which is thus inscribed: "Sacred to the memory of that real patriot, the Rt. Hon. William Beckford, twice Lord Mayor of London, whose incessant spirited efforts to serve his country hastened his dissolution on the 21st of June, 1770, in the time of his Majesty and the 65th year of his age." With the demolition of the church will doubtless cease a series of payments connected with it that have furnished a rare text for city reformers. The church was closed in 1891 as unsafe, yet payments have been annually made since to the rector £408, parish clerk £40, sexton £45, beadle £30, organist £10, and the organist's wife £10, with age long since, and £60 to a curate. There were other payments, but why and what for is a city mystery.

The British as Shipbuilders.
Great Britain, says a writer in "Britain at Work," builds in a year about double the tonnage produced by the rest of the world. One British shipbuilder produces the output of the rest of the world, including warships, of the United States, and almost equals the production of both Germany and France.

Shipbuilders in the face even of opposition. The value of the shipbuilding industry in Great Britain is fairly prosperous year. The output of the industry is valued at £27,000,000, and no less than £5,000,000 of that sum is expended in wages. Machinery is included in the estimate of the value, and engine-shop pay-rolls in the wages bill. The figures refer to the finished ship.

The number of men employed in shipyards and engine-shops is, off and on, about 180,000, and nearly a score of trades go to make the muster.

From Messina to England.
A considerable trade in live quails takes place yearly from Messina to the United Kingdom. The birds are caught in the neighborhood of Messina. They are kept from three to four days in cages before being shipped, and are fed on hemp seed and ground corn, and are watered freely every day. It is estimated that from 90,000 to 100,000 are caught annually.

"SALADA"

Ceylon GREEN Tea. It's Pure delicious and healthful, its as far ahead of Japan Tea as "Salada" Black is ahead of all other black teas.

25c and 40c. per lb.

STRICTURE

I guarantee my Latest Method Treatment to be a permanent and positive cure for Stricture and Stricture without cutting, stretching or loss of time.
