There's something about the little black dress that touches a man in a very tender spot. He pats the little one on the head, puts some pennies in her hand, swallows hard and then—starts out to is no doubt that many a man is taken from his family by neglect of simple precautions which would preserve his health. Disease generally begins nowadays in "stomach trouble" because the meals are hasty and the food not digested. From that beginning come dis-orders of the blood, liver, kidneys, heart or nerves. The use of Dr. Pierce's Golden Medical Discovery, for diseases of the organs of digestion and nutrition will avert the catastrophe of more seri-ous disease. Mice as Food in China.

The first thing which strikes the traveler in China, upon his entrance into any of the many cities of the Celestial Empire, is the strings of dried mice which hang from the roofs of the houses suspended by their tails, just as sausages are hung in front of butcher

shops in France. The Chinese hunt these mice with a long, sharp pointed knife, which they plunge into the animals' throats. Then the mice are suspended by the tails until the blood has dripped out, when they are skinned, drawn and smoked. Another favorite dish with the chin-

ese is dogs' feet. The feet of black dogs are considered more of a delicacy than those of any other color, and white dogs are rejected as being tasteless. Dogs' fat, prepared in a special manner, is looked upon as a repast fit for a king.
