THE CLOUD THAT PASSED.

Leaving their plates of soup unfinished, the two fled out of the restaurant and along the platform, amid the ringing of bells, the shricking of engines, and the angry shouts of guards. The Frenchman was watching for them, with the door of their compartment held open, and they had just time to sink panting into their just time to sink panting into their seats, when "Pronti!" was roared out in a stentorian voice, and the train

She was only conscious of the dusty glare of the afternoon sun, the weary sameness of the marrow strip of dry scorched plain through which the train was now passing, and the endless monotony of the chain of hills beyond on her left. The knowledge that these hills were the Apennines gave her no thrill such as the mere thought that she was looking on the Alps had given her in the morning. Even when, on a touch from George, she turned her head to look through the window on her right, and she knew that the blue sea on which her eyes fell was the Mediterranean, she felt no rapture, no enthusiasm. She was disappointed with herself that she should feel none, at the same time that she was disgusted with the extravagant enthusiasm of the two German ladies, who kept exclaiming in their hard voices at regular intervals. tween their attempts at making conversation in Italian with the only Italian in the compartment—a modestlooking young woman of the bourclass, who was evidently not much accustomed to travel, and seemed less at home than any of the for-

Priscilla was glad when the next sta-

tion was reached and the Italian girl alighted from the train. But her departure did not improve matters, for her place in the compartment was at once taken by a large German of the intellectual-machine type—one of those men (to be found only in the fatherland) who seem to be capable of doing daily twelve or fifteen hours' brain work without showing any signs of fatigue. The two ladies hailed their countryman with effusion, and then the three hard voices went to work with such energy that they seemed to exhaust the air in the compartment. The brooches were again brought out for inspection, and were gravely ex-amined and commented on by the newcomer, maps were spread open, Baedeker was consulted, and all the time the ceaseless stream of talk went
