tive Tribesmen of Cape Mudgeexed Because Their Festivities Are Interfered With.

dignation Meetings Held and Exitement So High That Trouble Is Anticipated.

The Indians in the vicinity of Cape dge are in a state of great excitement now over the arrest on Tuesday last Johnny Moon and his father, the ef of the Cape Mudge tribe. In conuence, Mr. Edward Wilson, storeper and hotel proprietor, came to the yesterday in post haste in quest of A. W. Vowell, the superintendent ndian affairs. He says the Indians. making no threats nor resorting tolence, but they are in the sulks and are thoroughly aroused that, unless lomacy is displayed in dealing withmen, trouble may be looked for.

there are numerous traders along the st, as well as settlers, prospectors and ners, and as a wise precautionary easure he believes that something ould now be done to placate the nded natives. They have been holdindignation meetings over what v consider the "cultus" conduct of white officers of the law, and the isensus of opinion at these "pow ws" has been to fight to the bitter their grievances in the provinal ourts. There are among them ne who know what civilization in this ect is, and hence their action. But this is not the dangerous aspect

affairs that confronts Mr. knows that most of the Indians sess some kind of a fire n, and that their number is ily being increased through the rival from all parts of the coast of sins, brothers and visitors to partipate in the festivities of a long-heraldpotlach. Once maddened by whisky e festive company might make things v interesting for the civilized com

What happened to bring about the esent agitated feeling of the natives es not seem altogether clear. The hnny Moon arrested had issued nuabout this time or a little later, and f about this time or a little later, and id, either in this or some other way, oused suspicion, of which Constable anson, Cortez island, sought corroberator of. Whereupon the officer visited ape Mudge last Tuesday and placed untrarest the father and son, Mr. Wilnsays giving no explanation for his tion. The old man resisted arst and so attracted a crowd of anketed and husky natives to the ach, where just prior to the steamer's ach, where just prior to the steamer's parture with the two prisoners, a cont took place, resulting in the hoary-aded chief being taken from the thorities, and the latter being hurdly driven away, the young prisoner ong with little objection.

This story Mr. Wilson reluctantly reted as he was, he said, desirous of seeg the authorities before having the sws published.

SPORTS AND PASTIMES.

With delightful weather and a large out of golfers of both sexes, the ixed foursome tournament of the G.C., at the Oak Bay links yesterday, est pleasurable gatherings in the local story of the ancient and royal game. e scores returned were throughout ry creditable, as will be noted by the ided complete record of the

The 2.866 ton British steamship Agapanthus, under special charter to the Nippon Yusen Kaisha Company, reached Seattle Friday after a specially rough voyage. She came by the great circle, running within seventy miles or more of the Aleutan islands. The storms drove her some distance out of her course, and caused a delay of about five days. None of the officers or crew were the worse for the shaking up received, however, and there was no damage to cargo. The Agapanthus' outgoing cargo will be the largest that has ever left Seattle, including 6,000 tons of steel rails, cotton, flour, etc.

THE VICTORIAN ERA. Among the features of the celebrations to be held in Great Britain in this year in honor of the longest reign in British annals, that which will have most interest to the world at large is the proposed "Victorian Age Exhibition," which is designed to make a display of the world's

progress during the reign of the present To make the exhibition more impresthe time of Victoria's accession and the TWIXT THE CUP AND THE LIP.

San Francisco, Jan. 8.—The Coptic

San Francisco, Jan. 8.—The Coptic

Like Kingdom. These ships were chartered by two prominent grain brokers, owing to their not being able to obtain room in the regular liners and because more advantageous rates were severely sev lives in 1897. Such an exhibition will be instructive as well as interesting,

important feature of the celebrations for The exhibition is to be divided into eight sections—fine arts, historical and commemorative, drama, music, econo-mic, scientific, commercial and industrial, and women's work. The last de-partment of the exhibits will be in itself an evidence of how much the world has changed since Victoria came to the It would hardly have entered the heads of the directors of any kind of an exhibition in 1837 to give recognition to women to anything like the extent of providing a special department for the display of their accomplishments.

It will be interesting to see in which of these various sections the contrast exhibited between the old and the new will be most striking. It is not likely that in art, drama and music much advance will be shown, but in the departments of science, industry, economics and vigorous your now weak body can be made. Hudyan is for man. The great Hudyan is to be had only from the Hudson Medical Institute. This wonderful discovery was made by the specialists of the old famous Hadson Medical Institute. It is the strongest and most powerful vitalizer made. It is so powerful that it is simply wonderful how harmless it it. You can get it from nowhere but from the Hudson Medical Institute. Write for circulars and teaching the world with the last sixty years.

This will be interesting to see in which of these various sections the contrast exhibited between the old and the new will be shown, but in the departments of science, industry, economics and commerce there will be displayed an advance which will amount to a verifiable revolution. Unless the connecting links between the old and the new are displayed in the exposition, it is to be had only from the Hudson Medical Institute. It is the strongest are most of men instead of a new generation had come into the world with the last sixty years.

This exhibited between the old and the new will be shown, but in the departments of science, industry, economics and commerce there will be shown, but in the departments of science, industry, economics and commerce there will be shown, but in the departments of science, industry, economics and commerce there will be shown, but in the departments of science, industry, economics and commerce there will be shown, but in the departments of science, industry, economics and commerce there will be shown, but in the departments of science, industry, economics and commerce there will be shown, but in the departments of science, industry, economics and commerce there will be shown, but in the departments of science, industry, economics and commer It will be interesting to see in which

are such that it is time for our historians to make a new division of the world's history. The old distinctions into ancient times, the middle ages and modern times no longer suffices. The change between the condition of the world to-day and that of sixty years ago is greater than the change which oc-curred in the sixteenth century and sep-arated what what is called modern from medieval times. The world has been completely revolutionized mentally, morally, politically and industrially. The Napoleonic era marks a red dividing line between our time and those which eceded it and the accomplishments of the Victorian era have carried us into an environment so widely different that we live in what is almost altogether a new world.
