The following was received by Drummond & Brown over their private wire from McCormick & Co., Chicago: Great activity and excitement have characterized our wheat market to-day. Opening cables were strong at an advance of 1d in Liverpool, and were followed up by later cables showing an advance of an additional 1½d. London market is improving in same proportion with every other European market. Result has been a strong Chicago market, with large buying for both short and long account, only downward reaction being caused by heavy sales against calls bought from $1.02¼ to $1.02½. Market closes very strong at about top prices. So long as foreign advices continue strong we must renew our advice to buy wheat for a good round profit. Corn and oats have been very active and strong. In spite of the excitement in the grain pits provisions have been sluggish and inactive, due to the enormous receipts of hogs. We believe, however, that if the bulge in grain continues provisions will prove a good purchase and must soon become active.

The Financial Situation.

Henry Clews of New York in his weekly financial review says:

While it is said to be true that "the unexpected always happens," it is equally true that the expected often fails to happen. So it has proved in respect to the general belief that the adjournment of Congress would be followed by an improvement in the stock market. The cheers with which the Exchange on Wednesday greeted the closing of the doors of the Capitol expressed that body's estimate of the end of the vexatious wrangling by which great interests have so long been held in suspense. But, at the same moment, the attention of the market was occupied with a series of accidents which more than offset any benefits accruing from the closing of Congress. Foreign exchange showed a hardening tendency and it was reported that negotiations were pending with the Treasury for $2,000,000 of bar gold for export. Rumors were current of renewed financial embarrassments in the Argentine and of new political difficulties in other parts of South America; and a London cablegram reported that an important firm with South American connections was in difficulties, while rumors also were current affecting the standing of a London bullion firm, and an advance in the Bank of England rate of discount was confidently expected, and the current largeness of our imports as compared with the exports was construed as favoring the export of specie.

Such a concurrence of settling circumstances was more than sufficient to neutralize the exhilarating effect of the adjournment of Congress, and it induced a selling of stocks at the moment when a buying movement had been expected to set in. However, there has since been some abatement of these unfavorable symptoms. The embarrassed South American firm has been tided over; the Bank of England has not advanced its rate and has lost only £168,000 of gold during the week; only $600,000 of gold bars has been put up for export instead of the rumored $2,000,000, and the apprehended failures in London have not occurred. These escapes from misfortune, however, have only partially sufficed to remedy the shock arising from the above rumors, and perhaps for good reason. Both in London and here there is a deep-rooted impression that the Barings embarrassments have produced many weak spots in London finance. It is said that those effects are beginning to extend from Lombard-street to Mincing-lane, and that the inevitable curtailment of banking credits to the South American trade must sooner or later cause embarrassments in that important branch of British commerce. How much real reason there may be for this apprehension it is difficult to judge at this distance; but a distrust of such a nature will need at least time for its cure, and in the meantime the London market and every interest directly dependent upon it is likely to be kept in a sensitive state. While the foreign situation is thus likely to afford little support to New York for some time to come, the market is still unfavorably affected by the large decline in earnings of the C., B. & Q. and the Rock Island roads consequent upon the shortness of the corn crop, which being great representative lines naturally affect other stocks more or less although not at all injured from like causes. It would seem that as the injury to these two roads has been so long and so largely discounted, they may be soon eliminated from the market at large and treated as exceptional cases. March, however, is always a month of caution arising from anticipation of the April settlements; and, for the present, discouraging influences are likely to produce effects disproportionate to their real importance. We may therefore count upon a dull, irregular market until after the first half of April. By that time the market is likely to have fully discounted all present unfavorable conditions, and will be ready to take a decided turn in view of the new crop prospects, which will then begin to assume some distinctness. The banks have lost about $2,270,000 of currency during the week, viz.: $1,100,000 net on the movement with the interior, and $1,170,000 on transactions with the Sub-Treasury; besides which is to be reckoned $600,000 gold put up for export, making a total loss of $2,870,000. For the moment the market is likely to be a fluctuating one, affording chances for fair profits from buying upon the drops and selling on the upward spurts.

EPPS'S COCOA
BREAKFAST.
"By a thorough knowledge of the natural laws which govern the operations of digestion and nutrition, and by a careful application of the fine properties of well-selected Cocoa, Mr. Epps has provided our breakfast tables with a delicately flavored beverage which may save us many heavy doctors' bills. It is by the judicious use of such articles of diet that a constitution may be gradually built up until strong enough to resist every tendency to disease. Hundreds of subtle maladies are floating around us ready to attack wherever there is a week point. We may escape many a fatal shaft by keeping ourselves well fortified with pure blood and a properly nourished frame."—*Civil Service Gazette.*
Made simply with boiling water or milk. Sold only in packets by Grocers, labelled thus;
