FLY FUMA

is a liquid preparation which, when applied to any animal in the form of a spray, or rubbed on with a brush or bath, will protect the animal from the attacks of flies of all kinds, mosquitoes, gnats, fleas, etc. It is a positive protection

It has been thoroughly tested, and gives satisfaction. The time it affords protection from one spraying varies under different conditions of weather. If cows are treated in the morning before milking it affords an absolute protection during milking and the greater part of the day. Toward evening its effect will have diminished, so as to require another application before milking. Sprayed on a fly or other insect will not stay a moment, whether on a cow, horse, dog, or on inanimate objects. Sprayed on the stable walls and ceiling, the flies will all leave as fast as they can find a hole to get out. **PRICE, 40c. PER CAN OF ABOUT ONE QUART.** One-eighth of a cent a day protects an animal, and in the case of cows they will return the investment many fold by the increased flow of milk in fly time. Your horse will serve you far better and not try your patience. **FLY FUMA** may save a man's money by saving his horse's harness and vehicle; save shoeing, as horses will not stamp their legs off chasing the flies. **FLY FUMA** may save a man's money by saving his horse's health. Prevents spread of disease. Cures mange on cats, dogs, etc. Cures scratches and other leg and foot trouble in horses by are sufficient. Cures skin diseases. Heals sores. Cures scratches and other leg and foot trouble in horses by are sufficient. Applied to the walls and ceilings of stables where there are myriads of flies, they will leave instantly. Use on fattening hogs in fly time. The best way to apply it is with the **ELECTRIC BUG EXTERMINATOR.**
