

THE BOOK PAGE

Two books at \$1.00 net each, and just from the presses of the Fleming H. Revell Company, New York and Toronto, are as good money's worth as we have seen in many a day. They have the breath of the sea upon them, and tell the story of sea-rovers, not one whit less brave or bold than the men who sailed with Drake or Hawkins or John Paul Jones. **The Harvest of the Sea**, by Dr. Wilfrid T. Grenfell (162 pages, 16 full page illustrations), is a picture of the deep-sea fisherman's life on the Dogger Banks and off the coast of Newfoundland and Labrador, by one who has shared its hardships these twenty years, with no other motive but the love of God. Dr. Grenfell modestly puts the story (his story really) into the mouth of two of his "fisherman friends" to tell, and they tell it with the vividness of those who have been through it all. By a happy chance, Norman Duncan's, **Dr. Grenfell's Parish** (155 pages, 17 full page illustrations) appears as a companion volume. The author needs no introduction. Everyone is still reading his Doctor Luke of the Labrador. The story of this strange "parish," more sea than land, is the furthest remove from a dry record of needs apparent and help given. Its object is, frankly, to let the world know of Grenfell's work on the coasts of Newfoundland and Labrador, how much it is required, what strangely interesting parishioners they are—the Liveyeres the Outport Folk, the People of the Fisher Shore, and how "this Oxford man," who is "master, seaman, missionary, promoter of industry, magistrate, physician, helpful

friend of every fisherman," braves all perils in the doing of his work, counting it "jolly fun." It is a series of vivid pictures, with setting of bleak coast and wild sea, and like *The Harvest of the Sea*, a book which stirs all the heroic blood that is in one's veins. By all means, read these two books, and put them within reach of all the young people.

Mariners, and soldiers, and loyalists, the Nova Scotian judge who became famous as an author under the name of "Sam Slick," a group of notable politicians of early days, the founder of the great Cunard line of steamships, a scientist and college principal of the first rank, and a premier of Canada—here is a wide and fruitful field for the biographer. And Miss Emily P. Weaver in her **Builders of the Dominion: Men of the East** (The Copp, Clark Company, Toronto, 116 pages, 35c.), has worked this field well, telling us in simple style the story in outline of these men, who have powerfully influenced the life of their own country, and of the Empire. This is just the sort of book to give one an honest pride in his own country and its great men. Written primarily for boys and girls at school, the sketches will be read with interest by older people as well.

The scenes of Cyrus Townsend Brady's **The Two Captains** (The Macmillan Company, New York, George N. Morang & Co., Toronto, 413 pages, \$1.50) are laid in the period following the first French Revolution. It describes the adventures of a marquis and vice-admiral, and his beautiful granddaughter—her father had been beheaded by the Republicans.

University of Toronto

FACULTY OF MEDICINE

THE regular course of instruction consists of Four Sessions, of eight months each, commencing October 2nd. There is a distinct and separate course for each of the four years.

The degrees conferred by the University of Toronto in Medicine are Bachelor of Medicine (M.B.), and Doctor of Medicine (M.D.). Students may take a combined course in Arts and Medicine if they wish to do so. Arts students who are taking the Honor course in Natural Science are able to fulfil the requirements of the primary work in medicine during their final years in Arts, and thus it is possible to obtain the degrees of B.A. and M.B. upon six years' University training.

Attention is directed to the efficient equipment of the University laboratories for instruction in the practical subjects of the Medical curriculum. The new building of the Medical Faculty has been completed at a cost of \$175,000.00, in the Queen's Park, and affords extensive laboratory accommodation for Pathology and Physiology which is unsurpassed. The lectures in the final subjects are also delivered in the new lecture theatres. Instruction in the other subjects of the medical course are taught in the various science laboratories and lecture rooms of the University.

To meet the requirements of the Ontario Medical Council, a course of instruction is conducted during a Fifth year. This is entirely optional as far as the University of Toronto is concerned.

Clinical teaching is given in the Toronto General Hospital, Burnside Lying-in Hospital, St. Michael's Hospital, Hospital for Sick Children, and other medical charities of Toronto.

There are special research scholarships offered to graduates in Medicine, and every opportunity is now offered for scientific research work in any of the various laboratories of the University, under the direct supervision of the Professor in charge.

The Faculty provide four medals for the graduating class (one gold and three silver). There are also scholarships available for undergraduates in the First and Second years; these are awarded to the candidates on the results of the annual examinations.

Further information regarding scholarships, medals, etc., may be obtained from the Calendar, or on application to the Secretary.
