

incipient and limited lesions. 3. A settlement or colony for assorted cases where light employment might be utilized.

Dr. J. Kingston Fowler refers in his answer to his well-known paper on the open air treatment read November 14, 1899. He endorses the Nordrach System as confirmed by his experience and observation since 1899, which is:—

1. An absolutely open air life day and night, in sunshine, fog or rain.

2. No *liegehalle*.

3. An abundant diet, regulated by the physician in charge, who must attend at all the meals.

4. Rest before meals.

5. Exercises regulated by the strength and temperature of the patient.

Dr. Fowler goes into extended details and gives strong arguments and strong conclusions in support of his views. He thinks every hospital should have a sanatorium attached.

NOTES.

We understand that Sir Victor Horsley expressed the opinion that the Toronto meeting of the British Medical Association was the best ever held from a scientific standpoint, excepting, perhaps, that of 1886.

Notices have been sent to many physicians throughout the United States and are appearing in the medical and public press regarding an "American International Tuberculosis Congress" to be held in New York City, November 14th to 16th next, and an association known as "The American Anti-Tuberculosis League," which is to meet in Atlantic City next June at the time of the meeting of the American Medical Association.

It should be stated that the gathering in New York next November and the one in Atlantic City next June have no connection whatever with the International Congress on Tuberculosis authorized at the last session in Paris in 1905, which will hold its
