

TYPHOID FEVER.

Attention is directed to a timely announcement which appears elsewhere in this journal over the signature of Parke, Davis & Co., and bears the caption, "Typhoid Fever." Prophylaxis, diagnosis and treatment, in logical sequence, are briefly and comprehensively considered in this advertisement.

Typhoid Vaccine, Prophlactic, is suggested as a suitable immunizing agent. This product is a twenty-four-hour culture of the typhoid bacillus, grown on inclined agar and suspended in physiologic salt solution to which has been added 0.2 per cent. trikresol as a preservative. It is accurately standardized. That this vaccine confers immunity from typhoid fever has been shown by an abundance of clinical evidence.

In the diagnosis of typhoid fever the Typhoid Agglutometer has undoubtedly done much to popularize the Widal test and to extend the usefulness of that valuable diagnostic aid. Parke, Davis & Co. supply two forms of the agglutometer, designated as No. 1 and No. 2. Directions for use accompany each outfit.

For the treatment of typhoid fever, Typhoid Phylacogen is an agent of established value. A marked effect of its use in all favorable cases is an early subsidence of the fever and a prompt establishment of convalescence. The technique of dosage and other particulars of the treatment are covered in Parke, Davis & Co.'s literature on Typhoid Phylacogen.

SANMETTO IN PREGNANCY.

In pregnancy, where elimination is deficient, as indicated by headache, slight disturbance of the digestion and diminution of solids and urea in the urine, Sanmetto in connection with calomel is remarkably effective. The calomel acts upon the cells of the body, those of the liver especially, effecting proper removal of the waste and accumulated toxins. Sanmetto increases the activity of the kidneys, in this way promoting the removal of excrementitious products from the blood, and at the same time acts as a systematic tonic enabling the body to more completely dispose of its waste products through its organs of elimination, and resist the evil effects from systemic absorption or auto-toxins.

MODERN MARITAL THERAPY.

Amid the veritable swarm of new medicinal agents of all varieties that have been introduced to the therapist during the last twenty years,
