

OVER ONE HUNDRED IN USE.

MINERVA
PAPER CUTTER.

Patented Nov. 23, 1869.

Cuts Thirty Inches.

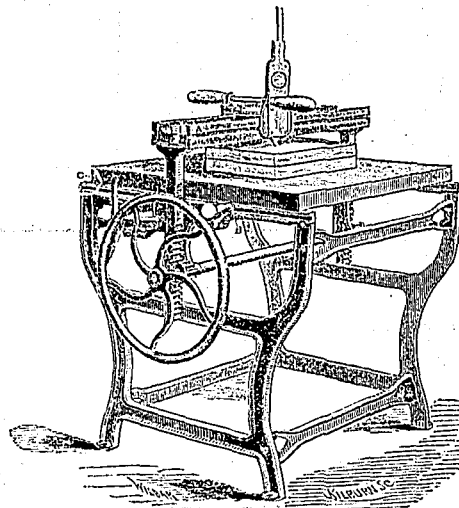

THE CHEAPEST AND BEST MACHINE IN THE MARKET.

Price, \$250, Boxing, \$5.

THE superiority of this Machine is in its great power and the rapidity of its operation. The cut is clean, smooth, and true. The knife having descended to a given point rises immediately without reversing the motion of the machine. There are both back and side gauges, the former is moved by a hand wheel placed in front of the table.

The Best Plow Cutter in the Market.

PATENT
FRANKLIN PAPER CUTTER.

Price, 30 inch, Iron Frame, \$60.

THIS Machine is far superior to any other low-priced Paper Cutter in the Market. from the facility with which paper is cut to any size, after being placed upon the cutting table, without moving it. As soon as the paper is properly squared, and one cut is made, the head (A) is raised by the wheel, as in the ordinary cutter, and may be moved backwards or forwards, parallel with the cutting board, by turning the small crank handle (B) without disturbing the paper. Another great improvement is the use of a lever (C) and a spring to hold the head (A) in position when raised, instead of the treadle.

ROTARY CARD CUTTER.

25 inch, \$35. 30 inch, \$40.
